ICC Product Catalog

EFFECTIVE JUNE 2014

People Helping People Build a Safer World®

Dedicated to the Support of Building Safety Professionals

An Overview of the International Code Council

The International Code Council is a member-focused association. It is dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets choose the International Codes.

Services of the ICC

The organizations that comprise the International Code Council offer unmatched technical, educational and informational products and services in support of the International Codes, with more than 200 highly qualified staff members at 16 offices throughout the United States. Some of the products and services readily available to code users include:

- CODE APPLICATION ASSISTANCE
- EDUCATIONAL PROGRAMS
- CERTIFICATION PROGRAMS
- TECHNICAL HANDBOOKS AND WORKBOOKS
- PLAN REVIEW SERVICES
- ELECTRONIC PRODUCTS
- MONTHLY ONLINE MAGAZINES AND NEWSLETTERS
- PUBLICATION OF PROPOSED CODE CHANGES
- TRAINING AND INFORMATIONAL VIDEOS
- BUILDING DEPARTMENT ACCREDITATION PROGRAMS
- EVALUATION SERVICE FOR CODE COMPLIANCE
- EVALUATIONS UNDER GREEN CODES, STANDARDS AND RATING SYSTEMS

Additional Support for Professionals and Industry:

ICC EVALUATION SERVICE (ICC-ES)

ICC-ES is the industry leader in performing technical evaluations for code compliance, providing regulators and construction professionals with clear evidence that products comply with codes and standards.

INTERNATIONAL ACCREDITATION SERVICE (IAS)

IAS accredits testing and calibration laboratories, inspection agencies, building departments, fabricator inspection programs and IBC special inspection agencies.

INTERNATIONAL CODE COUNCIL

The International Code Council® Product Catalog includes a comprehensive selection of codes and references to assist you with your work ensuring public safety. This collection of International Codes®, standards, commentaries, and study tools is your single source for the most current building, sustainability and fire protection references available.

ICC's goal is to provide excellent service and selection to our members and other professionals worldwide. If you can't find what you need or have questions, our customer service team is ready to help. Simply call us at 1-800-786-4452. When it comes to quality, service, and customer satisfaction, ICC delivers.

2015 INTERNATIONAL CODES®

Available in many formats for added convenience:

- Soft Cover
- Loose Leaf
- CD-ROM
- eBook
- **NEW!** PDF/Redline
Contains the 2015 I-Code plus a Redline version showing deletions and additions to the 2012 edition marked in color.

Free Subscription with Purchase

Watch 2015 I-Code preview videos online.

ICC Training for the 2015 I-Codes will be available Fall 2014.

a. 2015 International Building Code® (IBC®)

The scope includes all buildings except detached one- and two-family dwellings and townhouses up to three stories. The 2015 IBC contains many important changes such as:

- An automatic sprinkler system is required within a building when the roof is used for A-2 assembly occupancy with an occupant load exceeding 100 or for other assembly uses exceeding 300.
- Carbon monoxide alarm provisions have been relocated, reformatted and revised.
- More detailed scoping requirements for recreational facilities are included within the new Section 1110.
- A modification allows egress through an elevator lobby when access to at least one exit is available without passing through the lobby.
- A new definition for Cross-Laminated Timber (CLT) was added to Chapter 2, and the ANSI/APA PRG 320-2011 product manufacturing standard is referenced in Chapter 23 and added to Chapter 35.
- New code sections were added covering rooftop mounted photovoltaic solar panels.
- “Vegetative roof” is defined in Section 202 to be consistent with the definition in the IgCC and ASTM D1079. A reference to ASTM E 2397 was added for determining soil loads on vegetative roofs.

b. 2015 International Fire Code® (IFC®)

The IFC contains regulations to safeguard life and property from fires and explosion hazards. Topics include general precautions, emergency planning and preparedness, fire department access and water supplies, automatic sprinkler systems, fire alarm systems, special hazards, and the storage and use of hazardous materials. Key changes to the IFC include:

- Decorative material requirements were revised to be more comprehensive and provide more details for healthcare occupancies.
- Section 910 was heavily revised to address overall smoke removal. Mechanical smoke removal requirements have been revised and clarified.
- CO alarm requirements have been heavily revised, making the installation requirements clearer and relocated by F360-13. Educational occupancies were added as regulated occupancies.
- Limited area sprinklers requirements were revised to be more comprehensive.
- A new IFC (and IBC) Section 915 replaces and greatly expands upon former Section 908.7 on Carbon Monoxide detection and alarm requirements.

c. 2015 International Residential Code® For One- and Two-Family Dwellings (IRC®)

This comprehensive code comprises all building, plumbing, mechanical, fuel gas and electrical requirements for non-commercial one- and two-family dwellings and townhouses up to three stories. The IRC contains many important changes regarding:

- Common walls separating townhouses must now be rated for 2 hours when an automatic fire sprinkler system is not installed.
- Remodeling of an existing basement does not trigger the emergency escape and rescue opening requirements unless a new bedroom is created.
- Ramps that do not serve the required egress door are now permitted to have a slope not greater than 1 unit vertical in 8 units horizontal.
- Carbon monoxide alarms now require connection to the house wiring system with battery backup. A carbon monoxide alarm is required in bedrooms when there is a fuel-fired appliance in the bedroom or adjoining bathroom.
- Changes to lumber capacities have changed the span length floor for floor joists, ceiling joists and rafters in the prescriptive tables of the IRC.
- New sections and tables provide prescriptive methods for posts, beams, joists and connections in deck construction.
- The girder and header span tables of Chapter 5 have been moved into Chapter 6. Multi-ply and single header tables are combined. A new section describing rim board headers is added.

d. 2015 International Energy Conservation Code® (IECC®)

The IECC addresses energy efficiency on several fronts including cost savings, reduced energy usage, conservation of natural resources and the impact of energy usage on the environment. Key changes include:

- Climate-appropriate alternative added for buildings located in Tropical Zones.
- In the residential provisions, the inclusion of the Energy Rating Index Compliance Alternative as another compliance path adds more flexibility to the IECC.
- Separate Chapters dealing with existing buildings were created in both IECC Commercial and Residential Provisions.

c

d

a. 2015 International Plumbing Code® (IPC®)

The IPC provides minimum regulations for plumbing facilities in terms of both performance and prescriptive objectives, and provides for the acceptance of new and innovative products, materials, and systems. Important changes include:

- Public toilet facilities are not required for occupancies that have limited areas for public access.
- Water temperature limiting devices are required for footbaths and head shampoo sinks.
- In a replacement water heater installation situation when a nearby drain point is unavailable for the required pan, a code modification allows the pan to be used without a drain line.
- Fixtures such as water closets and urinals that utilize nonpotable water must be identified with words and a symbol that nonpotable water is being used. The color purple is established for identifying distribution piping conveying nonpotable water.
- The application of a primer to drain, waste and vent PVC pipe and fittings prior to solvent cementing is not required for 4-inch pipe size and smaller.

The IPC also includes its companion document, 2015 *International Private Sewage Disposal Code®*, for design, installation, and inspection of private sewage disposal systems.

c. 2015 International Mechanical Code® (IMC®)

Establishes minimum regulations for mechanical systems using prescriptive and performance-related provisions. The IMC was developed with broad-based principles that make possible the use of new materials, methods and design. Important changes include:

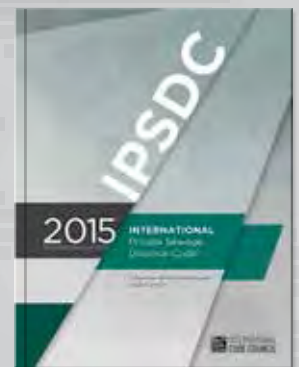

- Condensate pumps located in uninhabitable spaces and used with condensing fuel-fired appliances and cooling equipment must be connected to the appliance or equipment to prevent water damage if the pump fails.
- The ventilation system for enclosed parking garages must operate continuously or be automatically controlled for intermittent operation utilizing both carbon monoxide and nitrogen dioxide detectors.
- New text recognizes the use of dryer exhaust duct power ventilators (DEDPV) for installations that exceed the allowable exhaust duct length for clothes dryers.
- New text regulates the design and construction of exhaust shafts that serve domestic kitchen exhaust systems in multi-story buildings.

b

c

d. 2015 International Fuel Gas Code® (IFGC®)

Addresses the design and installation of fuel gas systems and gas fired appliances through requirements that emphasize performance. Key changes include:

- The section on protection of piping has been completely rewritten.
- Line regulators installed in rigid piping must have a union installed to allow removal of the regulator.
- Specific installation requirements were added for the safe installation of ANSI Z21.69 connectors for commercial cooking appliances.
- New text recognizes the use of dryer exhaust duct power ventilators (DEDPV) for installations that exceed the allowable exhaust duct length for clothes dryers.

e. 2015 International Swimming Pool And Spa Code™ (ISPSC™)

The only comprehensive swimming pool code coordinated with the current requirements in the I-Codes and APSP standards. Developed with the Association of Pool & Spa Professionals (APSP), the ISPSC will establish minimum regulations for public and residential pools, spas, and hot tubs using prescriptive and performance-related provisions.

Benefits of the ISPSC:

- Seamless integration with the widely adopted family of I-Codes.
- Meets or exceeds Virginia Graeme Baker Act requirements.
- Also contains APSP-7 Standard for Suction Entrapment Avoidance.
- Includes provisions for water parks, diving, barriers, general design, and water quality safety.
- Covers fencing, decks, lighting, heaters, circulation systems, pumps, accessibility, diving, sanitizing equipment, filters, and suction fittings.

Important changes include:

- The term “pool and spa” replaces “aquatic vessel” throughout the code. This change eliminates confusion and deletes an unnecessary definition.
- Fall protection guards for springboards that are greater than 5 feet (1.5 meters) above a pool deck are now required. The guards will significantly reduce injuries from falls from high springboards.
- Public pools are now required to have signage indicating how to reach emergency services by phone.

a. 2015 International Existing Building Code® (IEBC®)

Encourages the use and reuse of existing buildings. The code covers repair, alteration, addition and change of occupancy for existing buildings and historic buildings, while achieving appropriate levels of safety without requiring full compliance with the new construction requirements contained in the other I-Codes. Key changes include:

- Requirements related to the addition of sleeping units and dwelling units as they relate to the requirements for Accessible units, Type A units and Type B units have been moved to Chapter 11 on Additions. The different levels of change of occupancy as addressed in Chapter 10 are clarified.

NFPA 70® 2014: National Electrical Code® (NEC®)

The electrical code designated for use with the I-Codes
 More than 3,700 proposals and 1,600 comments reveal the scope of advancements in the 2014 NEC®. Be prepared to use the latest technologies and protect people from electrical hazards. Update to the new benchmark for safe electrical design, installation, and inspection!

Major changes impact residential, commercial, and industrial electrical installations. Many revised and all-new requirements in this edition will have an impact on electrical work industry-wide:

- Expanded AFCI and GFCI protection in homes
- Continued emphasis on making installations safe for electrical workers
- New Code coverage of new methods to distribute low voltage power
- New approaches toward ensuring the safety of photovoltaic (PV) electric systems
- Plus hundreds of other revisions that allow for the safe implementation of the latest in electrical system and equipment technology. (950 pages)

I-Quest, 2015/2012 International Codes

ICC offers an electronic option just right for you. This powerful tool contains the complete searchable text of the 2015 or 2012 International Codes®.

I-Quest’s Microsoft Fast Folio® search engine allows you to:

- Enjoy multiple search capabilities
- Utilize hyperlinks to sections and tables within each code
- Copy and paste text, figures, and tables
- Highlight and bookmark frequently used sections
- Add your own searchable notes to text or hide them
- Use the “Update” feature to keep your code current
- Backup installation

Please note, I-Quest is not MAC-compatible. 2009 editions are also available.

I-Quest, Single User

Enables one code user to load CD content on one computer.

2015 Complete Collection

Contains all 2015 I-Codes. (If purchased before the 2015 IgCC is released in April 2015, an update will be sent to the registered computer when the book is available.)

SINGLE USER.....(8007Q15) 1,281.00 961.00

2012 Complete Collection (Includes ICC A117.1-2009)

SINGLE USER.....(8007Q12) 1,281.00 961.00

2012 IBC®

SINGLE USER.....(8000Q12) 229.00 172.00

All Versions Include Update Feature

2012 International Codes in PDF

Search easily through the 2012 International Codes® in PDF format using Adobe® Reader® version 8.0 or later, and use the “Update” feature to keep your code current! View all of the text, illustrations, figures, equations, tables and margin rulings. The Single Seat version allows for installation on one computer. Volume Licensing 5-seat versions allow for installation based on the number of seats purchased. Mac and Windows® compatible. All versions allow backup installation.

These CDs are protected from duplication by Protectedpdf™ and require Adobe® Reader® 8.0 or later. You are required to login to our secure server and register your copy. You will be able to install this software no more than two times per seat as provided in the license agreement. Neither concurrent use on two or more computers nor use in a local area network or other network is permitted.

2009 Editions are also available.

All Versions Include Update Feature

10, 25 and 50 seat versions are also available.

Use with Codes or Commentaries

Find It Fast With Turbo Tabs

You'll be surprised how easy it is to quickly find a code section using Turbo Tabs. With the most commonly used sections of the code printed on each Tab, you can flip through the code or Commentary and find frequently used sections fast! The soft cover versions contain clear plastic, self-adhesive tabs with key sections of the codes printed in an easy-to-read format. The loose leaf versions contain full-page inserts with key sections printed on the tabs.

Apps for iPad or iPhone

Means of Egress App: 2009 IBC

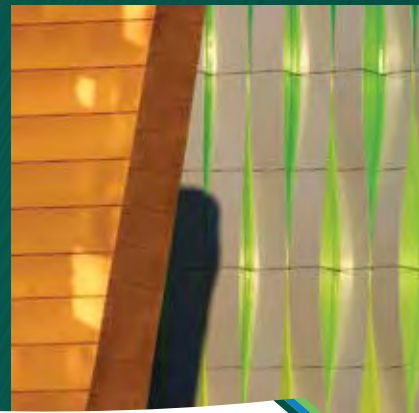

The easy-to-use app compiles critical egress information from multiple resources into a single digital tool. It provides egress-focused text, figures and tables from several ICC publications including the 2009 IBC, Commentary, Q&A, Study Companion and Significant Changes.

SMARTreview™ Fire Safety App

This intuitive, easy-to-use app filters and retrieves fire-resistance rating requirements applied to all Occupancy Groups and Construction Types, and performs calculations for allowable area, area increases and mixed-area ratio for buildings with multiple occupancies, as addressed in the 2009 IBC.

To download, visit www.iccsafe.org/app

APPROVE WITH **CONFIDENCE**

- ICC-ES® Evaluation Reports are the most widely accepted and trusted in the nation.
- ICC-ES is dedicated to the highest levels of customer service, quality and technical excellence.
- ICC-ES is a subsidiary of ICC®, the publisher of the IBC®, IRC®, IPC® and other I-Codes®.

We do thorough evaluations. You approve with confidence.

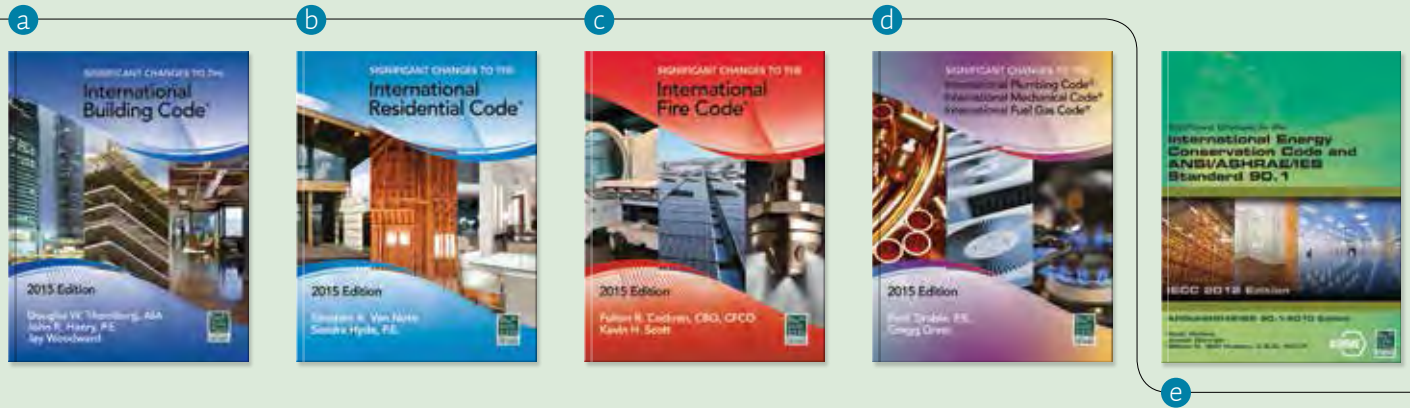

Look for the ICC-ES marks of conformity before approving for installation

Significant Changes to the 2015/2012 International Codes®

Key changes are identified then followed by in-depth discussion of how the change affects real-world application. Coverage reflects provisions with special significance, including new and innovative design ideas and technologies, modern materials and methods of construction, and current approaches to safety and stability. Authored by ICC code experts, these useful tools are “must-have” guides to the many important changes in the 2015 and 2012 International Codes, and accessibility standard ICC A117.1-2009.

“Significant Changes publications take you directly to the most important changes that impact project review and evaluation—saving you a substantial amount of time. Changes to code sections are clear, easy to understand, and include a meaningful visual explanation.”

LYNN UNDERWOOD, MCP, CBO
BUILDING OFFICIAL
NORFOLK, VIRGINIA, DEPARTMENT OF PLANNING AND BUILDING SAFETY

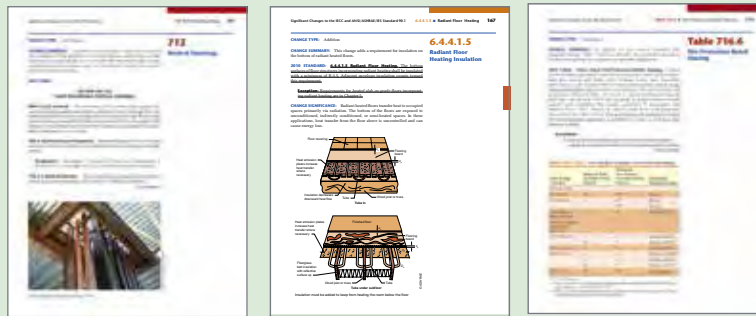

“Very useful training and review tools for transitioning to a new code edition. The books allow code users to zero in on what is important in a relatively short amount of time. The clear and concise writing style conveys the technical information in a clear manner.”

ALI M. FATTAH, P.E.

SENIOR RESEARCH ENGINEER, CITY OF SAN DIEGO, CALIFORNIA, DEVELOPMENT SERVICES DEPARTMENT

Building Code Basics: Based on the 2012 International Codes®

The straightforward, focused approach introduces code requirements with non-code language, allowing readers to gain confidence in their understanding of the material.

Each book contains:

- Full-color illustrations that help readers visualize correct code application.
- A glossary of code and construction terms to clarify key terminology as it applies to the code.
- Practical on-the-job scenarios.

Technically accurate and easy to understand, this is the perfect resource for builders, architects, plan reviewers, inspectors, permit technicians, contractors, and students.

a: Building Code Basics: Commercial, Based on the 2012 IBC

Author Steve Thomas provides an up-to-date, step-by-step guide to understanding and applying the base requirements of the 2012 IBC from technical jargon to more complex regulations. It simplifies critical concepts so that users can begin to build a foundation for learning and applying the code. (265 pages)

SOFT COVER	(4081S12)	38.95	31.95
PDF DOWNLOAD	(8950P255)	36.95	29.95

b: Building Code Basics: Residential, Based on the 2012 IRC

Author and ICC code expert Stephen Van Note uses simplified, non-code language and logical topic organization to make complex code concepts more understandable, while descriptive illustrations and tables explain code fundamentals.

Also included are requirements for plumbing, mechanical, fuel gas, electrical systems, and equipment. (288 pages)

SOFT COVER	(4181S12)	38.95	31.95

NEW EDITION!

c: Building Code Basics: Fire, Based on the 2012 IFC

Author Kevin Scott focuses on the basics of the fire code requirements for controlling ignition sources and fire hazards, fire department access to buildings, building uses and processes, fire protection and life safety systems, special processes and uses, and hazardous materials. (260 pages)

SOFT COVER	(4481S12)	38.95	31.95
PDF DOWNLOAD	(8950P547)	36.95	29.95

d: Building Code Basics: Green, Based on the 2012 International Green Construction Code

A practical guide for familiarizing design professionals, contractors, manufacturers, code officials and others with the commercial requirements of the new IgCC. **Author Peter Kulzyck** helps readers gain a better understanding of higher performance thresholds in the areas of energy, water conservation, and natural resource conservation. This book addresses subjects common to both the IgCC and other green and sustainable rating systems, and includes convenient references to relevant code sections. (128 pages)

STRUCTURAL AND NONSTRUCTURAL IN ONE VOLUME!

2012 International Building Code Handbook

A comprehensive, full-color guide to the 2012 IBC technical provisions

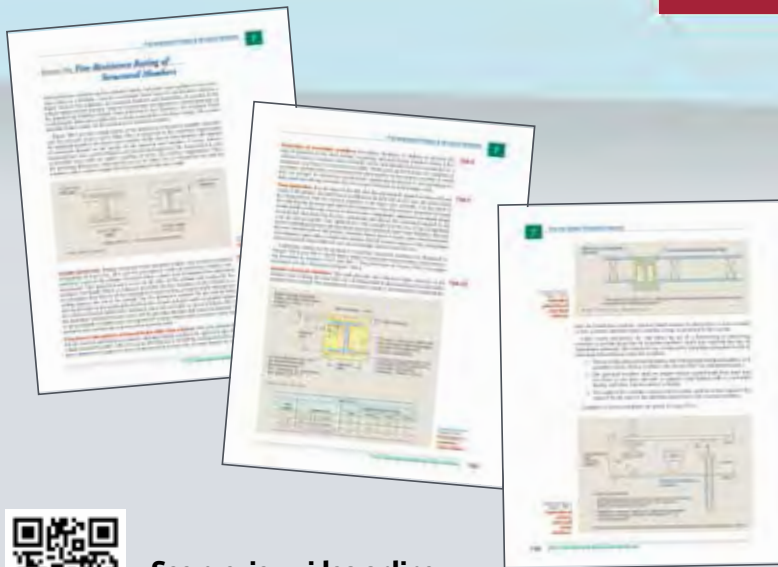

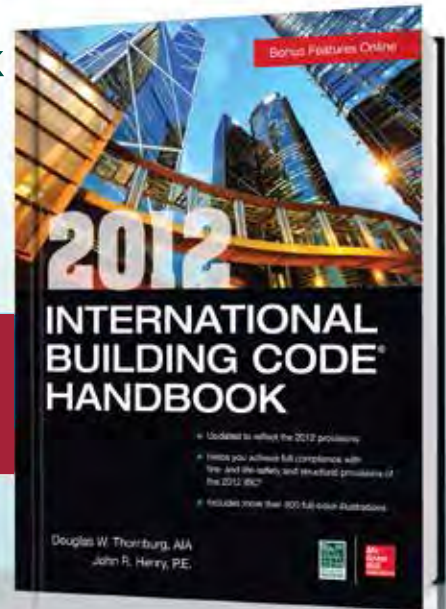

This visual guide makes it easy to understand and apply complex IBC provisions. **ICC code experts Douglas W. Thornburg, AIA, and John R. Henry, P.E.**, skillfully interpret all technical provisions of the code: structural and nonstructural, as well as fire- and life-safety.

Features:

- Provides the rationale behind the code provisions to clarify the intent and facilitate proper application and enforcement
- Includes more than 600 full-color illustrations
- Helps you achieve full compliance with every aspect of the code (1,008 pages)

HARD COVER (4000S12) 152.00 ~~119.00~~

NEW FROM NRCA AND ICC!

a: Guidelines For Complying With Building Code Requirements For Roof Assemblies: 2012 International Building Code

This new NRCA publication provides you with all the roofing-related provisions of the 2012 IBC as well as NRCA's explanations of the compliance requirements specifically applicable to roof assemblies. The book also contains appendixes that explain the roofing-related provisions contained in the IFC, IPC, IEBC, IFGC, IWUIC, IECC, IRC, and NFPA's fire code and standard for safeguarding construction, alteration and demolition operation. In one publication, you get all the roofing information you need. (180 pages)

on proper application in everyday practice. The structural load provisions are organized in comprehensive flowcharts, guiding the reader through the requirements. **Author David A. Fanella, Ph.D., S.E., P.E., F.ASCE**, provides a valuable training resource for engineers, architects, plan reviewers, building officials, and students who need to understand how to determine structural loads including dead load, occupancy live load, roof live load and environmental loads such as rain, snow, ice, flood, wind and seismic loads. This edition includes a new chapter on load path, a new section on atmospheric ice loads, completely updated discussion of the new wind design procedures in ASCE/SEI 7-10, and problems at the end of each chapter. A complete Solutions Manual is included as an online bonus. (550 pages)

c: Accessibility PocketBook: 2012 IBC and ICC A117.1-2009

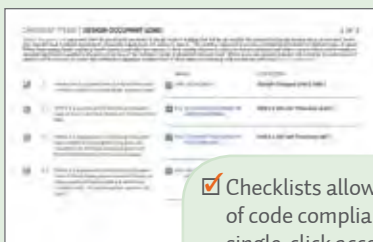

Compiles vital accessibility information you need into one handy source. Accessibility PocketBook contains selected provisions from the 2012 IBC® and the entire text of ICC A117.1-2009: Accessible and Usable Buildings and Facilities. It assists in the design, plan review, construction, and inspection of accessible facilities and features by combining the accessibility provisions of the IBC® with the technical requirements of the A117.1 standard into a single easy-to-reference resource. It is an ideal tool for the job site or the office. (396 pages)

✓ 256 illustrated pages explain the code requirement, list code sections for reference, provide helpful ideas and caveats, and contain links to other pages throughout the Interactive Guide.

✓ Checklists allow you to engage a list of code compliance questions with single-click access to explanatory illustrated pages.

Interactive Guide to the 2012 IBC: An Illustrated Checklist

A new on-screen guide that illustrates key code concepts and organizes code requirements in a way that mirrors the design process. This companion document will help jurisdictions, architects, contractors, and other members of the design team successfully apply the 2012 IBC. Unlike a printed document, this interactive guide takes full advantage of speedy website style interface and is fully searchable to allow a specific concept to be found quickly. Includes:

- Accessibility and Building Code requirements
 - Index of key terms
 - Links to ICC-ES Evaluation Reports

a: Building Codes Illustrated: A Guide to Understanding the 2012 IBC®

Today's design and construction professionals need a clear, practical guide to the 2012 IBC®. *Building Codes Illustrated* combines the graphic skills of author **Frank Ching** with the code expertise of **Steven Winkel, FAIA**, to create an invaluable reference. The guide:

- Highlights major changes between the new code and previous model building codes.
- Uses 875 illustrations and concise explanations to hone the building code down to the fundamentals most relevant to the architect.
- Follows the organization of the IBC. (432 pages)

FROM APA & ICC!

e: A Guide to the 2012 IRC Wood Wall Bracing Provisions

Wall bracing is a common source of confusion and misapplication although it is of critical importance when designing, performing plan review, building or inspecting a structure. This full-color illustrative guide was developed to help building designers, builders, building officials and others using the code in the application of the lateral bracing requirements of the 2012 IRC. The authors identify and explain the key elements of wall bracing and demystify the IRC prescriptive bracing provisions. Topics covered include:

- The IRC's new simplified wall bracing provisions
- The evolution and "language" of wall bracing
- Wind and seismic forces and how they act on structures
- The physical limits of wall bracing
- Bracing methods and options available to the builder/designer
- Rules for the use of bracing
- Determining how much bracing is required with adjustments and variations
- Connection details for bracing units, cripple walls and foundations
- Unique bracing provisions for stone and masonry veneer
- Narrow wall solutions
- Whole house considerations and examples

Jointly published by ICC and APA – *The Engineered Wood Association* with the shared goal of promoting the accurate understanding and correct application of the IRC for safer buildings and communities. (276 pages)

NEW EDITION! INCLUDES STUDY QUESTIONS!

a: Soils, Earthwork, and Foundations: A Practical Approach, Based on 2012 IRC and IBC

Author Kirby T. Meyer, P.E., D.GE, F.ASCE bridges the worlds of geotechnical engineering and foundation design, with construction activities and inspections dealing with soil conditions and building foundations. The book provides illustrations to assist in the understanding of the principles involved in foundations, guidelines for when to call on a geotechnical or foundation design engineer, and tips for effectively communicating with geotechnical and structural professionals. Important features include expanded discussion of earthwork, fill, compaction control, grading control and inspection. Discussion of construction and inspection of roadways and parking lots has been added along with an extensive treatment of the 2012 IBC Special Inspector program. Review questions are included that will assist those studying for the Soils Special Inspection Certification Exam. References to the 2012 IRC and IBC are provided throughout. (300 pages)

b: Residential Inspector's Guide: Based on the 2012 International Residential Code® Chapters 1–33

Your ideal resource for effective, accurate, consistent, and complete residential inspections. This handy pocket guide is designed for residential inspectors conducting building, energy, plumbing, mechanical and fuel gas inspections, and is organized in a manner consistent with the inspection sequence and process for easy use on site. This quick reference compiles the relevant information for effective application of Chapters 1–33 of the 2012 IRC® during the inspection process.

- Quickly identify the relevant IRC section for each topic listed.
- Develop an efficient and effective approach to the inspection process.
- Verify that construction work complies with the code.
- Increase consistency and accuracy of inspections.
- Build procedural and technical consistency within the department of building safety. (300 pages)

FROM NRCA AND ICC!

c: Guidelines for Complying with Energy Code Requirements for Roof Assemblies: 2009 and 2012 IECC

This new publication from ICC and NRCA assists with effective roof construction which is a critical element of energy conservation. It is a step-by-step guide for complying with the requirements of the 2009 and 2012 editions of the IECC and the 2007 and 2010 editions of ASHRAE 90.1 Energy Standard for Buildings Except Low-Rise Residential Buildings referenced in the IECC 2009 and 2012 editions, respectively. The IECC is recognized by the DOE for meeting the agency's energy-saving goals. (176 pages)

DOWNLOAD CRITICAL CODE HISTORY!

d: Code Changes Resource Collection 2012 Edition: A Complete Revision History, 2009 to the 2012 I-Codes

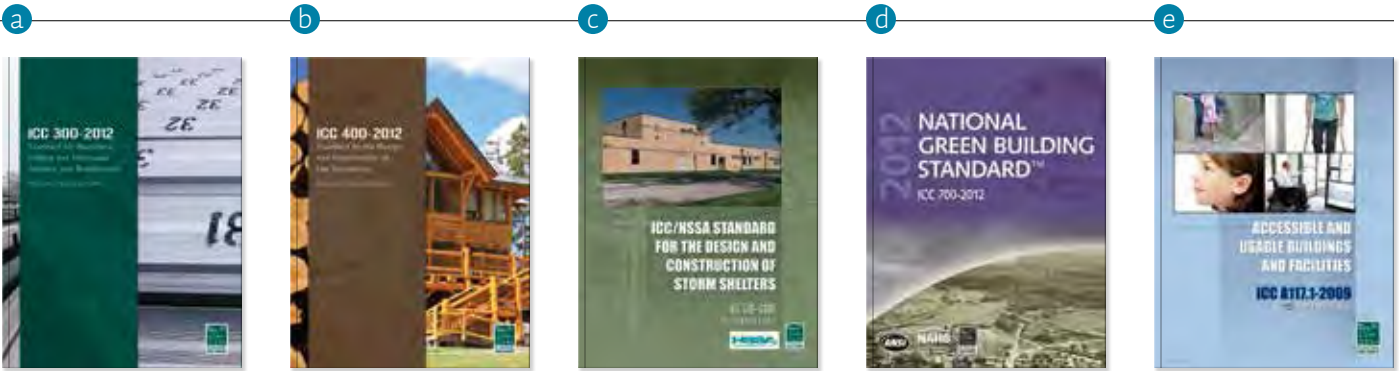

Similar to a legislative history for laws and statutes, this collection provides a comprehensive background on each change that occurred in the 2012 IBC, IRC, IFC, IPC and IMC, including the original proposal, committee action, and final action documentation in a single source. The book compiles the proponent's original reason for the change, unabridged statements that substantiated code development committee actions and the complete documentation for any public comment that was considered prior to final action on the change. This valuable collection greatly simplifies researching the history of a new, revised or deleted code section from 2009 to 2012.

FROM NAHB AND ICC!

d: ICC 700-2012: National Green Building Standard™ (NGBS™)

The only ANSI-approved standard for sustainable residential construction. A collaborative effort between NAHB and ICC, the NGBS outlines the green practices that can be incorporated into new homes, including multifamily buildings, as well as home remodeling and additions, hotels and dormitories, and residential land developments. The green practices address site and lot design, preparation and development; resource, energy, and water efficiency; indoor environmental quality; and operation, maintenance, and building owner education. Four levels—Bronze, Silver, Gold and Emerald—enable residential professionals to go green at a level most appropriate for their project. (178 pages)

REFERENCED IN THE 2012 IBC!

e: ICC A117.1-2009: Accessible and Usable Buildings and Facilities

Since 1961, the A117.1 Standard has been at the forefront of creating a built environment open to everyone. The specifications in this standard enable people with physical disabilities to independently access and use sites, facilities, buildings and elements. This latest edition of the ANSI-approved standard includes:

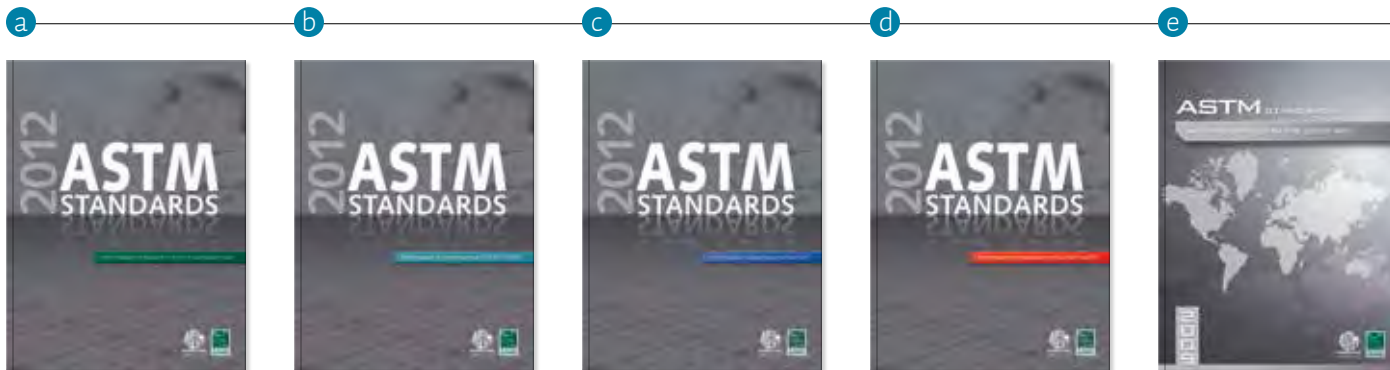

- Additional coordination and clarification of requirements for dwelling units.
- Addition of Type C dwelling unit requirements for use by jurisdictions adopting visitability ordinances for dwellings not regulated by Fair Housing.
- A series of revisions for restroom requirements.
- A new chapter for recreational facilities.
- A new section for variable message signs. (120 pages)

a: ASCE/SEI 7-10: Minimum Design Loads for Buildings and Other Structures

Provides requirements for general structural design and includes provisions for determining dead, live, soil, flood, wind, snow, rain, atmospheric ice, and earthquake loads, and their combinations that are suitable for inclusion in building codes and other documents. Also included is Supplement No. 1, a detailed commentary containing explanatory and supplementary information to assist users of this Standard. (650 pages)

SOFT COVER(9002S10) 165.00 148.00

2005 Edition is also available.

SOFT COVER(9002S05) 125.00 112.50

ASCE/SEI 24-05: Flood Resistant Design and Construction

Provides minimum requirements for flood-resistant design and construction of structures located in flood hazard areas. This standard applies to new construction which includes: (a) new structures including subsequent work to such structures, and (b) work classified as substantial repair or substantial improvement of an existing structure that is not an historic structure. Topics include: Basic Requirements for Flood Hazard Areas; High Risk Flood Hazard Areas; Coastal High Hazard Areas and Coastal A Zones; Materials; Dry and Wet Flood Proofing; Utilities; Building Access; and Miscellaneous Construction. (80 pages)

SOFT COVER(9020S05) 59.00 53.00

Steel Construction Manual, 14th Edition (AISC 325-11)

Contains several updates and revisions, including the new HP18 and HP16 series, updated connection tables based on increased bolt shear strength values, revised single-plate and extended single-plate connection design procedures, enhanced prying action procedure, and a revised bracket plate design procedure. The following specifications, codes and standards are printed in Part 16 of this Manual:

- 2010 Specification for Structural Steel Buildings (including the new Chapter N on QC and QA, expanded composite design provisions, and improved slip-critical connection provisions).
- 2009 RCSC Specification for Structural Joints Using High-Strength Bolts.
- 2010 AISC Code of Standard Practice for Steel Buildings and Bridges.

An ideal reference for engineers and plan review engineers. (2,190 pages)

HARD COVER(9206S14) 350.00 175.00

ICC Guideline Series

b: ICC G1-2010: Guideline for Replicable Buildings

Intended to help state and local jurisdictions—as well as owners, designers and builders—streamlining a building document review process to examine and verify replicable construction documents; thus, eliminating repetitive code compliance reviews. A global review of replicable documents paired with a local review of unique jurisdictional requirements could be more cost effective, increase consistency in the application, enhance public safety, conserve local resources, and reduce the time between permit submittal and construction mobilization. (16 pages)

PDF DOWNLOAD..... (8950P042) 24.95 19.95

c: ICC G2-2010: Guideline for Acoustics

Recommends suitable sound isolation performance in commercial and multi-family buildings such as offices, hospitals, schools, condominiums, apartments, hotels, and mixed use buildings. The intent is to reflect the findings of extensive acoustical research to better match expectations for the acoustical comfort of the occupants. Checklists are provided for code officials and designers. (28 pages)

SOFT COVER (7051S10) 24.95 19.95

PDF DOWNLOAD..... (8950P043) 24.95 19.95

d: ICC G3-2011: Global Guideline for Practical Public Toilet Design

Promotes convenient, hygienic and safe public toilet facilities of appropriate design and quality, and gives guidance on the basic care and maintenance of such facilities. The intent is to provide a minimum level of quality to safeguard health, property and public welfare by providing provisions to control the design, construction and installation of public toilets, as well as their quality of materials, location, operation and maintenance, and use. (42 pages)

SOFT COVER (7053S11) 24.95 19.95

PDF DOWNLOAD..... (8950P089) 23.75 19.00

e: ICC G4-2012: Guideline for Commissioning

Guides the code official or regulator in implementation and enforcement of commissioning, either with in-house staff or the use of a third party. This guideline can be adopted in whole or in part by the authority having jurisdiction (AHJ) for use with codes and standards that require commissioning including the IgCC. (100 pages)

a: ACI 318-11: Building Code Requirements for Structural Concrete and Commentary

The code portion covers the materials, design, and construction of structural concrete used in buildings and where applicable in nonbuilding structures. It also covers the strength evaluation of existing concrete structures. The Commentary portion discusses considerations of the committee in developing the code, with emphasis given to the explanation of new or revised provisions. Other documents that provide suggestions for carrying out the requirements of the code are also cited. (503 pages)

SOFT COVER(9021S11) 192.50 154.00

2008 Edition is also available.

TMS 402-11/ACI 530-11/ASCE 5-11: Building Code Requirements and TMS 602-11/ACI 530.1-11/asce 6-11 Specifications for Masonry Structures and Related Commentaries

Referenced by the 2012 IBC for the design and construction of structural masonry, veneer and glass unit masonry. This edition is formatted in a Code/Commentary and Specification/Commentary side by side format so that users can quickly review the commentary related to the code and specification provisions. Features include: a recalibration of allowable stresses, the addition of provisions for infill masonry, a refinement of the quality assurance/special inspection provisions for masonry that includes references to relevant requirements for each inspection task, and more. An ideal standard for engineers, plan review engineers and architects. (319 pages)

SOFT COVER(9026S11) 110.00 99.00

b: 2012 NDS Wood Design Package

This four volume set includes the code-recognized National Design Specification (NDS) for Wood Construction (2012 Edition). The Wood Design Package brings together all required elements for design of wood structures in one comprehensive document. It includes design information and examples for wind and seismic conditions, sawn lumber, structural glued laminated timber, structural-use panels, shear walls and diaphragms, poles and piles, I-joists, structural composite lumber, structural connections (nails, bolts, screws), metal plate connected wood trusses, and pre-engineered metal connectors. This product includes:

- NDS for Wood Construction, 2012 Edition, with Commentary
- NDS Supplement: Design Values for Wood Construction
- 2008 Special Design Provisions for Wind and Seismic (SDPWS) with Commentary
- ASD/LRFD Manual for Engineered Wood Construction

c: 2012 WFCM & Commentary

The ANSI-approved 2012 *Wood Frame Construction Manual (WFCM) for One- and Two-Family Dwellings* was developed by the American Wood Council's (AWC) Wood Design Standards Committee and is referenced in the 2012 IBC® and IRC®. The 2012 WFCM represents state of the art design for one- and two-family dwellings in regions with high winds, high seismic risk or large snow loads. It provides engineered and prescriptive design requirements for wood frame construction used in one- and two-family dwellings. The provisions of the WFCM are based on dead, live, snow, seismic and wind loads derived from provisions of the ASCE 7-10. The primary changes to the 2012 WFCM include:

- Wood structural panels are permitted to resist wind uplift
- Shear wall story offset provisions are clarified
- Design values for lumber, engineered lumber and fasteners are based on the 2012 NDS
- Engineering design values for horizontal diaphragm and vertical wall assemblies are in accordance with SDPWS-08
- Header tables include dropped and raised header conditions

Accompanying the WFCM is an extensive Commentary that provides background information and example calculations for various sections and tables of the WFCM.

a: NFPA 13-2013: Installation of Sprinkler Systems

Revised to the latest requirements for automatic sprinkler system design, installation, and acceptance testing; hanging and bracing systems; underground piping; and seismic protection. Ensure automatic sprinkler systems are designed and installed correctly to prevent fire deaths and property loss. Updates include:

- Modified Chapter 16 and Chapter 17 combine in-rack and ceiling sprinkler requirements
- New Chapter 21 on alternative storage approaches
- New requirements concerning nonmetallic piping and elevators
- The latest coverage on antifreeze, heat tracing and heat loss calculations (443 pages)

SOFT COVER(9406S13) 95.50 87.00

SOFT COVER(9406S10) 95.50 87.00

b: NFPA 13D-2013: Standard for the Installation of Sprinkler Systems in One- and Two-Family Dwellings and Manufactured Homes

Work with the latest rules for every aspect of sprinkler design, water supplies, equipment, and placement. Updates for the 2013 edition include:

- A major change allows a four-head calc that can eliminate conflicts in determining sprinkler coverage for sloped and beam ceilings
- New provisions allow the use of backflow preventer for shutoff
- An update on antifreeze (55 pages)

SOFT COVER(9430S13) 46.50 42.50

d: NFPA 72-2013: National Fire Alarm and Signaling Code

Organizational and technical changes in the 2013 edition clarify fire alarm and emergency communications system rules and improve usability. Revised to incorporate the latest industry developments and technological advances, NFPA 72 is today's source for the installation, testing, and maintenance of fire alarm and emergency communications systems, including mass notification systems.

Changes include:

- New Chapter 7 that consolidates all documentation rules into one location
- Revised forms
- Reorganized inspection table now includes new specific inspection methods
- Testing table merges two previous tables into one with both test methods and frequencies side by side for improved usability
- Revised supervising station transmission methods
- New requirements for audible and visible occupant notification
- Reorganization and update of record of completion and inspection, testing, and maintenance forms
- Revised requirements for emergency communications systems (351 pages)

SOFT COVER(9435S13) 89.00 81.00

Study Companion Series

Based on the 2012 International Codes®

ICC's Study Companions are the ideal way to master the code for everyday application or to prepare for exams. Each comprehensive study guide provides practical learning assignments for independent study. Study Companions can also be used as part of instructor led programs in the workplace, college courses, or vocational training programs.

The Study Companions are organized into study sessions and include learning objectives, key points for review, code text, hundreds of illustrations and commentary applicable to the specific topic. Each study session includes a helpful quiz that allows the learner to measure their level of knowledge. Each Study Companion's answer key lists the code section referenced in each question for further information.

2006 & 2009 editions are also available

BONUS ONLINE QUIZ WITH EACH COMPANION! Enhance your studies with ICC's online quiz containing 60 additional questions to further assist in exam preparation.

a: 2012 International Building Code® Study Companion

Addresses fundamental requirements found throughout the 2012 IBC®, including occupancy classification, types of construction, fire protection systems, fire-resistance-rated construction, and means of egress. (540 pages)

- 18 study sessions
- 630 total study questions with answer key

Great resource for Certification exams: Commercial Building Inspector, Building Plans Examiner, Certified Building Official, Fire Inspector I and II, or Fire Plans Examiner

ICC'S TRAINING AND EDUCATION DEPARTMENT

Industry professionals look to ICC to provide the critical knowledge and experiences necessary to excel in today's challenging world. ICC's educational programs cover a broad spectrum of code, administration and construction related topics, offering some of the highest quality instruction direct from the source.

GET TRAINING FROM THE SOURCE OF THE CODES.

This icon indicates a publication for which a seminar based on the book is available from ICC Training and Education.

For more information about ICC's Training please contact us at:

INSTITUTES

Acquire Skills, Share Experiences, Earn CEUs

ICC's training institutes offer a comprehensive educational experience and a great way to earn much needed CEUs. Learn best practices from the leading experts in the field, build your network of professional contacts and share experiences. Institutes are held across the country throughout the year.

To see the full schedule go to www.iccsafe.org/training.

HIRE ICC TO TEACH

Bring ICC On-Site and Earn CEUs

Give your group the confidence they need to meet tough challenges head-on so they can reach their full potential. ICC's course catalog contains a wide variety of educational topics that are available for contract at a location of your choice. Customized training is also available to fit your needs.

For our full course catalog go to www.iccsafe.org/hireicc.

ICC CAMPUS ONLINE

Earn CEUs at Your Own Pace

Online courses offer access to a comprehensive training and education portal, providing you with an effective and convenient tool to enhance your professional skills. Courses are available anytime for 99 days following registration.

Go to www.iccsafe.org/onlinecampus for our full offerings.

888-ICC-SAFE (422-7233) ext. 33818 or email us at icctraining@iccsafe.org

a: Human Resource Management in Local Government: An Essential Guide, 3rd Edition

Provides an up-to-date framework for today’s human resource issues and best practices. New and expanded chapters include sections on succession planning; issues of equal employment opportunity, affirmative action, and reverse discrimination; the impact of generational differences in work motivation; the latest union developments in the public sector; new case law; discussion of pay policies and benefits; importance of ethics; cutback management; and more. (320 pages)

HARD COVER (962353) 92.00 83.00

NEW EDITION!

b: A Budgeting Guide for Local Government, 3rd Edition

Explores the constantly changing world of budgeting in local government. It anticipates the expanding role of the budgeting office in the next two decades as technology becomes even more central to the budget function and the budgeting office becomes a center of strategic analysis. Discover how the manager can shape the budgeting process to bring change, mediate conflicts between key stakeholders, and take steps to ensure successful implementation of new budgeting procedures. (350 pages)

SOFT COVER (962453) 81.00 73.50

c-d: Legal Aspects of Code Administration

An in-depth explanation of the profession of administering and enforcing building codes organized in a logical sequence with explanation of legal terminology. It is designed to serve as a refresher for those preparing to take the legal module of the ICC Certified Code Official examinations.

c: Audiobook (Unabridged, 6 CD set, approximately 6.5 hours)

6 CD SET (7807S) 54.00 43.25

ONLINE BONUS ITEMS!

a: Building Department Administration, 4th Edition

This fourth edition builds on the vast improvements of the third edition to bring yet another valuable resource to code administrators everywhere. Each chapter has been revised and reformatted, updating this edition to being the most current state-of-the-art information for the needs of the 21st century building safety industry. The compilation and organization of this unique publication has benefitted from the practical knowledge of more than 50 experts participating as authors, contributors, peer reviewers and editors, making it one of the most participatory publications in building safety. It is a comprehensive one-stop resource and is critical to the successful management and operation of building safety administration. (710 pages)

It contains outstanding topics and features such as:

- Tables, graphics and forms
- Information tips in highlighted boxes
- Employee performance evaluation approaches and forms
- Green construction and sustainability
- Disaster mitigation and building security
- Technology and automation in plan review and code administration
- Legal approaches, liability and court cases
- Technology and automation availability and implementation
- Calculation of needed resources and staff levels for an effective department
- Effective multi-departmental plan review and permitting procedures
- Leadership, supervision, and customer relations
- Training and certifications
- Legacy model codes and ICC history
- International approaches
- Records management
- Housing, property maintenance and the public counter

Bonus online features include:

- journal articles
- helpful forms
- book excerpts
- helpful links

Inspector Skills

The first book to address the “other” skills necessary for the people side of inspection, authored by ICC’s Stephen A. Van Note. *Inspector Skills* raises awareness of the importance of “soft skills” and provides guidance for improving those skills. Soft skills are non-technical traits and behaviors that enhance an inspector’s ability to interact with others and to successfully carry out job duties. When coupled with a solid technical knowledge of codes and construction practices, effective soft skills elicit cooperation, generate respect and credibility, and improve the image of inspectors and code safety departments.

Topics include:

- Approaches to inspection
- Getting along
- Customer service
- Ethics
- Effective communication
- And much more!

Order Now!

The book is ideal for inspectors in all disciplines and can also benefit students, permit technicians, plan reviewers and building officials. (166 pages)

2012/2009 I-Code Inspector’s Guides

Your ideal resources for effective, accurate, consistent, and complete inspections for residential, fire, and energy provisions. The Inspector’s Guides provide a comprehensive review of the requirements of the 2012 or 2009 I-Codes® organized in a manner consistent with the inspection sequence for easy use on site. They help you increase inspection effectiveness and consistency by focusing on the most important provisions. Spiral binding and durable laminated covers make them ideal for everyday use.

Code Check: Illustrated Guides to Building Codes

- Field-tested flip-page format
- Reduces violations and call-backs
- Hundreds of illustrations
- Fully researched and accurate
- Compiled by certified inspectors

a: Code Check: An Illustrated Guide to Building A Safe Home, 7th Edition

Using clear language and helpful diagrams, Code Check references the 2012 IRC and cross references the UPC, UMC and NEC® to provide readers with the most precise information to date. With an emphasis on central safety principles, Code Check gets high grades for its accuracy, relevancy, and ease of use. (32 pages)

SOFT COVER (9101S7) 17.00 13.50

Code Check, 6th Edition

This popular field inspection guide contains 110 drawings, references the 2006 and 2009 IRC®, and cross references the UPC, UMC and NEC®. (32 pages)

SOFT COVER (9101S6) 17.00 13.50

NEW EDITION!

b: Code Check Electrical, 7th Edition

Completely updated to the 2014 NEC®, contains 24 tables and 73 drawings, and is cross-referenced to the 2012 IRC®. It is an ideal companion for field inspections, plan review, NEC® study, and for helping to avoid violations on construction projects. (32 pages)

SOFT COVER (5013S14) 18.95 15.95

c: Code Check Commercial

The Code Check field guide covers code issues commonly encountered in the construction of retail stores, offices, warehouses, schools, service stations, hotels, restaurants, apartments and condominiums. It uses clear language and 110 informative diagrams, and is based on the 2009 International Codes, Uniform Codes and the 2008 NEC®. (46 pages)

SOFT COVER (9458S) 22.75 18.50

d: Code Check Plumbing & Mechanical, 4th Edition

Simplifies plumbing provisions of the 2009 IRC and explains in greater detail the 2009 UPC and UMC. Includes 116 drawings and 45 tables. (48 pages)

SOFT COVER (9201S4) 22.75 18.50

e: Code Check Complete, 2nd Edition: An Illustrated Guide to the Building, Plumbing, Mechanical, and Electrical Codes

Contains the complete text of the most current editions of Code Check: Code Check Building, 3rd Edition; Code Check Plumbing & Mechanical, 4th Edition; and Code Check Electrical, 6th Edition. An ideal reference for anyone using the 2009 International and Uniform Codes, and the 2008 and 2011 NEC. It includes 252 illustrations, 110 tables, and a listing of the significant code changes for each book from the previous cycle. (234 pages)

HARD COVER (9456S2) 36.00 28.95

Code Source Series: Top Value Field Guides

These value-packed resources provide easy access to need-to-know information. These unique guides pair comprehensive coverage with supreme readability to highlight critical compliance points. Each book is extensively illustrated to help users identify compliant and non-compliant installations.

a: Special Inspection Manual: 2012 Edition

In extreme natural events such as earthquakes and hurricanes, the most common contributing factor to significant structural damage and building failure is construction that fails to comply with codes, standards and design documents. Having specialized oversight and increasing inspection frequency, duration and detail during the construction process help mitigate construction issues.

Authored by ICC's Sandra Hyde, *Special Inspection Manual* gives detail to oversight and increased inspection requirements. The manual contains the requirements involving special inspection within the *International Building Code*, descriptions of the required special inspections, and information on creating a special inspection program. It supports preparation for special inspection certification exams and aids building departments in their creation of procedures and forms to run a special inspection overview program.

The guidance in the manual is based on recommended practices and the consensus of building officials, design professionals, and inspection and testing agencies. Duties and responsibilities of the special inspector, building official, project owner, engineer or architect of record and contractor are defined. This manual is also helpful for design professionals writing statements of special inspections. (300 pages)

SOFT COVER	(4019S12)	49.95	39.95
PDF DOWNLOAD	(8950P541)	47.00	37.00

INCLUDES BONUS WORKBOOK ONLINE!

b: Concrete Manual: 2012 IBC and ACI 318-11

The *Concrete Manual* provides the guidance and information that inspectors and other construction professionals need to become more proficient in concrete field practices and inspection.

The *Concrete Manual* will:

- Introduce concrete and explain why it behaves as it does
- Explain conventional concrete construction procedures
- Cover special concrete technologies such as Autoclaved, self-consolidating and pervious
- Discuss control and inspection procedures
- Explore statistical quality control methods and their application
- Detail proper field testing procedures
- Detail proper placement of reinforcement

A Resource Reference section includes a list of the concrete industry and technical organizations to contact for additional information. (576 pages)

a: Soils, Earthwork, and Foundations: A Practical Approach, Based on 2012 IRC and IBC

Author Kirby T. Meyer, P.E., D.GE, F.ASCE bridges the worlds of geotechnical engineering and foundation design, and construction activities and inspections dealing with soil conditions and building foundations. The book provides illustrations to assist in the understanding of the principles involved in foundations, guidelines for when to call on a geotechnical or foundation design engineer, and tips for effectively communicating with geotechnical and structural professionals. Building department personnel, inspectors, laboratory personnel, and foundation and earthwork contractors will find the book helpful. Architects and engineers will benefit from the information on design and field applications for foundations. Important features include expanded discussion of earthwork, fill, compaction control, grading control and inspection. Discussion of construction and inspection of roadways and parking lots has been added along with an extensive treatment of the 2012 IBC Special Inspector program. Review questions are included that will assist those studying for the Soils Special Inspection Certification Exam. References to the 2012 IRC and IBC are provided throughout. (300 pages)

Manual for Quality Control for Plants and Production of Structural Precast Concrete Products, 4th edition

Now with more than 340 pages, this manual from PCI contains more information in a convenient new format with standards and commentary printed side-by-side to provide convenient explanation, discussion and amplification of the standards. These standards and the accompanying commentary will serve as a strong foundation for a plant's quality system for the manufacturing of structural precast concrete products. The manual includes new requirements for architectural finishes on structural products (product groups BA and CA), the plant's Quality System Manual, temperature controls for accelerated curing, and control of product tolerances. It comes with a custom loose-leaf binder, tabs for easy reference and a postcard for registering your book for future updates. A must-have for specifiers, producers, testing labs, inspection consultants, teachers, designers and quality technicians.

SOFT COVER	(9133S00)	85.00	76.00
------------------	-----------	-------	-------

e: Inspection, Testing, and Monitoring of Buildings and Bridges

Addressing both applications and emerging technologies related to the inspection, testing, and monitoring of civil engineering structures and structural systems, this book covers a variety of topics by recognized experts in their respective fields. Written by the National Council of Structural Engineers Associations (NCSEA), the book considers visual, destructive and nondestructive evaluation. The organization of the book proceeds from primarily visual inspection and evaluation of structures to more in-depth analysis procedures. Many materials are addressed, including reinforced concrete, structural steel, timber, masonry, and fiber-reinforced polymers.

Key Features:

- Identification of damage to concrete, steel, wood and fiber reinforced composite structures.
- Visual evaluation and remediation for corrosion and fire damage.
- Load testing.
- Nondestructive evaluation.
- Long-term structural health monitoring.
- Many illustrative figures and photos.
- References for further study on each topic.

From ICC and NCSEA!

The book is intended as a reference for engineers routinely faced with complex evaluation requirements. (180 pages)

NEW EDITION!

a: NFPA 70® 2014: National Electrical Code® (NEC®)

The electrical code designated for use with the I-Codes

More than 3,700 proposals and 1,600 comments reveal the scope of advancements in the 2014 NEC®. Be prepared to use the latest technologies and protect people from electrical hazards. Update to the new benchmark for safe electrical design, installation, and inspection!

Major changes impact residential, commercial, and industrial electrical installations. Many revised and all-new requirements in this edition will have an impact on electrical work industry wide:

- Expanded AFCI and GFCI protection in homes
- Continued emphasis on making installations safe for electrical workers
- New Code coverage of new methods to distribute low voltage power
- New approaches toward ensuring the safety of photovoltaic (PV) electric systems
- Plus hundreds of other revisions that allow for the safe implementation of the latest in electrical system and equipment technology. (950 pages)

SOFT COVER	(5000S14)	92.00	82.00
INDEX TABS	(5000TS14)	19.50	17.00

NEW EDITION!

b: Analysis of Changes, 2014 NEC®

Get a jumpstart on more than 200 of the most crucial changes that impact your work. IAEI presents vital changes in an easy-to-use format and filled with valuable advice from the experts. (368 pages)

SOFT COVER	(5005S14)	68.00	62.00
------------------	-----------	-------	-------

NEW EDITION!

c: NFPA 70® 2014 National Electrical Code® Handbook

A one-stop source of *National Electrical Code* information, the 2014 NEC Handbook from NFPA does much more than bring you up-to-code. It also explains the reasoning behind NFPA 70®: NEC concepts, provides real-world examples, and gives you the background behind Code revisions, so you can work with authority.

Features:

- Complete 2014 NEC® text for convenient reference
- Explanations from experts involved with NEC development
- First-time commentary on four new articles that expand NEC coverage to address industry needs
- Commentary on important changes involving AFCIs and GFCIs, electrical worker safety, and green energy systems
- Full-color photos and visuals such as schematics, floor plans, flow charts, and cross-sectional graphics
- Extracted data from other NFPA documents and UL White Book

Written by experts who are at the center of the NEC development process, the 2014 NEC Handbook is loaded with essential information about Code application from the experts who know the NEC best. Revised NEC text is highlighted in yellow to make Code changes stand out. Commentary and examples are printed in blue. Vertical rules alert you to new articles, figures, and tables; and bullets signal deletions. Insightful, comprehensive, and dependable, no other source compares with the 2014 NEC Handbook. (1,266 pages)

NEW EDITION! COLOR FIGURES!

a: Building Code Basics: Fire, Based on the 2012 IFC®

A comprehensive reference that breaks down the code in an easy-to-read format using non-code language. Author and ICC code expert **Kevin Scott** pulls together related information from various sections of the IFC into one convenient location. An ideal resource for inspectors, plan checkers, permit technicians and contractors that contains full-color illustrations that help readers visualize correct application and a glossary of code and construction terms. (251 pages)

Firestopping, Joint Systems, and Dampers

This new ICC publication is a comprehensive and user friendly guide addressing the critical life safety topic of fire containment. **Author Jay Woodward** guides the user in a straightforward manner to help ensure dampers and firestopping are installed, inspected and maintained properly. It will assist plans examiners, design professionals, fire and building inspectors in confirming they are specifying or inspecting the correct system. The book references the 2015 IBC, IMC and IFC, and is applicable to the 2012 using a cross reference table in the back.

c: Flammable Finishes Application Guide, 2012 Edition

This guide assists code officials, design professionals and the regulated community in understanding the 2012 IFC®, IMC® and IBC® requirements for the application of flammable finishes. Chapter 1 addresses the general provisions of IFC Chapter 24 and includes an analysis of spray finishing, dip tanks, powder coating, and the manufacturing of rigid thermoplastics application processes and the hazards associated with each process. Chapter 2 addresses the protection of operations. The remaining chapters address the IFC, IMC and IBC requirements for spray finishing, dipping activities, powder coating and manufacturing of reinforced plastics. In addition, the guide also addresses NFPA 33, 34 and 70. (112 pages)

d: High-Piled Combustible Storage Application Guide, 2012 Edition

Assists code officials and design professionals in the proper application of Chapter 32 of the 2012 IFC® and requirements for automatic sprinkler systems designed in accordance with NFPA 13. Features:

- Explains the requirements for the classification of commodities including Group A, B and C plastics.
- Discusses the requirements for high piled storage areas.
- Provides a detailed explanation of various storage methods and how they contribute to the growth and spread of fire.
- Includes information on the various methods of automatic sprinkler system design including control mode and suppression mode sprinklers and the variables that have the greatest impact on the design and performance of the automatic sprinkler system.
- Contains a case study of a fire involving a sprinklered Group M occupancy using high-piled combustible storage that analyzes contributing factors to the performance of the sprinkler system.

a: Commercial Kitchen Hood Application Guide, 2009 Edition

Developed to assist code officials, design professionals, and food service providers with a comprehensive analysis of the applicable ICC code for hood systems. The application guide introduces the reader to the fire and health hazards of commercial cooking operations and reviews the applicable provisions in the IFC®, IMC®, IBC®, IFGC®, and IECC®. The guide covers: design requirements for ventilation and makeup air; kitchen exhaust hoods and grease duct systems; various IFC requirements for automatic fire-extinguishing systems, portable fire extinguishers, and kitchen inspection and maintenance requirements. Each chapter contains questions and answers, key concepts and important definitions. (108 pages)

FROM NAHB AND ICC! 100+ ILLUSTRATIONS!

a: 2012 Home Builders' Jobsite Codes: A Quick Guide to the 2012 IRC

This user-friendly guide by ICC code expert **Steve Van Note** is packed with illustrations, tables, figures and a glossary to facilitate your understanding of the 2012 IRC. It is an ideal field guide for builders, trade contractors, design professionals, inspectors, and others involved in the design and construction of residential buildings. This easy-to-transport resource discusses the impact of 2012 code changes in energy efficiency, and details new fire safety and hurricane protection measures.

It includes more than 100 detailed illustrations and covers: blower door tests, whole-house mechanical ventilation, fire protection of floors, wall bracing methods, roof construction, hot water piping, high-efficiency lighting, gray water recycling, and more. (345 pages)
SOFT COVER (7103S12) 21.95 19.95

b: DeWALT Residential Construction Codes, Complete Handbook

Well-known author **Lynn Underwood** covers the most commonly used code requirements in the 2012 IRC and presents them to users in a format that is easy to navigate and easy to understand. The handbook's wide range of residential construction topics include: building, plumbing, mechanical, and electrical installations, with high-dimensional illustrations to help explain code application. Clear, straightforward terminology and valuable code reference citations are included throughout the book, enabling users to understand and discuss code requirements in the field. (337 pages)

Comprehensive coverage includes:

- Administrative standards
- Building planning
- Floors
- Roofs and roof coverings
- Energy efficiency
- Definitions of terms
- Foundations
- Walls and wall coverings
- Chimneys and fireplaces

c: Wood-Framed Shear Wall Construction: An Illustrated Guide, 2nd Edition

This unique guide gives carpenters, builders, engineers, inspectors, and others an understanding of one of the most important structural components in today's framed buildings—the wood-framed shear wall. Author **Thor Matteson, S.E.**, shares practical insight he has gained as both a structural engineer and carpenter.

Features:

- Coverage of shear walls from basic requirements to advanced application.
- A new chapter on the basics of seismic strengthening of older wood-framed buildings.
- Explanation of the five essential qualities required in any shear wall.
- Quick Start figure illustrating many basic shear wall requirements.
- A thorough Field Inspection Checklist.
- Improved page layout for easy reference. (200 pages)

REFERENCED BY 2012 IBC!

a: ICC A117.1-2009: Accessible And Usable Buildings and Facilities

Since 1961, the A117.1 Standard has been at the forefront of creating a built environment open to everyone. The specifications in this standard enable people with physical disabilities to independently access and use sites, facilities, buildings and elements. This latest edition of the ANSI-approved standard includes:

- Additional coordination and clarification of requirements for dwelling units.
- Addition of Type C dwelling unit requirements for use by jurisdictions adopting visitability ordinances for dwellings not regulated by Fair Housing.
- A series of revisions for restroom requirements.
- A new chapter for recreational facilities.
- A new section that addresses variable message signs.

c: Code Source: Accessibility

With this single resource, readers can learn to translate key accessibility requirements for commercial, residential and existing buildings into clear, understandable and easily applicable explanations. The book is the perfect collection of the most critical provisions from four major industry publications: the 2009 IBC, ICC/ANSI A117.1-2003, ADAAG 2004 and the Federal Fair Housing Act's Accessibility Guidelines (FH Act). This concise, thorough resource will help readers learn and quickly reference basic code-compliant accessibility standards. It can also help readers avoid costly litigation and retrofitting.

PDF DOWNLOAD	(8950P259)	23.00	18.50

d: ICC A117.1-2009 Standard And Commentary (Accessible And Usable Buildings And Facilities)

This publication's easy-to-use format includes the full text of the ICC A117.1 standard, including tables and figures, followed by the corresponding commentary for each section. The ICC A117.1 standard provides the technical requirements to make sites, facilities, buildings and elements accessible to and usable by people with physical disabilities. The commentary and accompanying figures explain the background and intent of the requirements and suggest the most effective method of application. Potential consequences of not following the provisions of the standard are discussed.

In addition to addressing each section of the standard, the commentary addresses many items revised or added since the 2003 edition of the standard, including:

- Coordination of requirements for the various types of dwelling units
- Technical requirements for Type C (Visitable) Units added
- Variable Message Signs
- Increased consistency of sign requirements
- Location of toilet paper dispenser
- New chapter for a variety of types of recreational facilities

A must-have reference for architects, designers, facility professionals, building owners, and code officials who want a better understanding of ICC A117.1-2009.

a: Illustrated Code for Designers: Non-Residential

This interactive DVD equips interior design students with the knowledge needed to work within the laws, codes, regulations and standards that apply to non-residential environments. It explains how codes related to safety, accessibility and more must be integrated into the design process at various stages, and explores how they affect different project types, including office, retail, healthcare and assembly environments. Based on the 2009 IBC, with many North American standards addressed as well, the DVD creates an active learning environment in which students will learn to use codes as an integral part of the design process. Features:

- Interviews with designers and code officials
- Case studies that provide examples in applications of varying scope, recognizing the wide variation in interior design practice
- Graphic and written timelines illustrating key times during project phases to consult specific laws, codes, regulations and standards
- Multiple interactive tools that encourage critical decision-making

INTERACTIVE CD!

b: Illustrated Codes for Designers: Residential

This CD creates an active environment with relevant examples and explanations building departments can use to quickly show designers what is incorrect or missing in a plan. The CD describes the basics of the 2009 IRC using animation with an emphasis on visual examples and flowcharts to help explain the process. The publication explores each stage of the design process including plumbing, mechanical and electrical provisions in the design of one- and two-family dwellings. It is a perfect mix to assist designers and plan reviewers at all levels of experience. Features:

- Visual and accurate presentation of code requirements to facilitate decision-making
- Video clips of interviews with designers and code officials discussing common issues
- Includes jurisdictional design information tied to geographic locations across the country

CD.....(9652S) 85.00 76.50

c: Building Codes Illustrated: A Guide To Understanding The 2012 IBC®

Today's design and construction professionals need a clear, practical guide to the 2012 IBC®. *Building Codes Illustrated* combines the graphic skills of author **Frank Ching** with the code expertise of **Steven Winkel, FAIA**, to create an invaluable reference. The guide:

- Highlights major changes between the new code and previous model building codes.
- Uses 875 illustrations and concise explanations to hone the building code down to the fundamentals most relevant to the architect.
- Follows the organization of the IBC. (432 pages)

d: Construction Management of Healthcare Projects

An in-depth look into the challenging and dynamic enterprise of project management for healthcare facilities, this is an essential resource for construction managers unfamiliar with the particulars associated with healthcare facilities. It covers critical specifics such as: regulations affecting healthcare; traditional and innovative delivery methods for healthcare construction; and safety and infection control. This is an authoritative, single source of comprehensive, practical information as to how to successfully deliver healthcare facility construction projects and services.

Features:

- Interviews with managers of the largest companies that serve the healthcare industry
- Case studies of successful/existing projects all across the U.S.
- Perspectives on construction management that include the depth and breadth of the healthcare industry from for-profit chains, not-for-profit religious and charity organizations, government-operated facilities, and critical access and HUD hospitals.

f: Interactive Guide to the 2012 IBC: An Illustrated Checklist

A new on-screen guide that illustrates key code concepts and organizes code requirements in a way that mirrors the design process. This companion document will help jurisdictions, architects, contractors, and other members of the design team successfully apply the 2012 IBC. Unlike a printed document, this interactive guide takes full advantage of speedy website style interface and is fully searchable to allow a specific concept to be found quickly.

Includes:

- 256 explanatory illustrated pages
- 7 checklists
- Accessibility and Building Code requirements
- Index of key terms
- Links to ICC-ES Evaluation Reports

f: ICC 700-2012: National Green Building Standard™ (NGBS™)

The only ANSI-approved standard for sustainable residential construction. A collaborative effort between NAHB and ICC, the NGBS outlines the green practices that can be incorporated into new homes, including multifamily buildings, as well as home remodeling and additions, hotels and dormitories, and residential land developments. The 2012 edition incorporates changes that make the NGBS easier to use and align provisions with the latest model codes. Key updates include:

- The Energy Efficiency Chapter has been substantially revised.
- The remodeling provisions have been incorporated into two new standalone chapters.
- The point assignments for Water Efficiency practices have been reanalyzed to achieve an improved internal consistency with regard to actual water savings.

NEW EDITION!

a: Application Guide for the 2012 IBC Concrete Provisions

This publication by **S.K. Ghosh and Ali Hajjhashemi, Ph.D.** is indispensable for designing a concrete structure using Chapter 19 of the 2012 IBC, which references ACI 318-11. The publication consists of three parts. Part 1 is an extended commentary on the provisions of 2012 IBC Chapter 19, the primary emphasis being on providing design guidance. Part 2 thoroughly discusses every significant change from ACI 318-08 to ACI 318-11. Part 3 contains 12 detailed design examples using 2012 IBC Chapter 19 and ACI 318-11. Detailed designs of reinforced concrete columns, flat plates, corbels, anchors, and a host of other items are included. (150 pages)

NEW EDITION!

Seismic Design Using Structural Dynamics: Based on the 2012 IBC, 2015 IBC and ASCE 7-10

Dynamic analysis procedures are more complicated than the more traditional static procedure and, over the years, many questions have been asked about code provisions concerning this. This publication was created to answer those questions and demystify the application of the code. This book addresses the two methods by which a designer may comply with the seismic design requirements of the 2012 or 2015 IBC: Equivalent Lateral Force Procedure (ASCE 7-10 Section 12.8) and Dynamic Analysis Procedure (ASCE 7-10 Section 12.9 and Chapter 16).

SOFT COVER	(9183S15)	58.00	49.00
PDF DOWNLOAD	(8950P641)	55.00	46.00

NEW EDITION!

b: Design of Wood Structures: ASD/LRFD, Seventh Edition

The leading text and reference on wood design is now fully updated to the 2012 IBC and 2011 NDS. This indispensable reference by **Kelly Cobeen, Kenneth Fridley, Donald Breyer, and David Pollock Jr.** leads you through the complete design of a wood structure (except for the foundation), following the same sequence used in the actual design/construction process.

Coverage includes:

- Vertical design loads and lateral forces
- Design for vertical loads—beams and columns
- Design for lateral forces—horizontal diaphragms and shear walls
- Connection design

The book combines dual-format ASD/LRFD specification, equations, and problems throughout. The 2010/2011 ASCE-7 Standard Instructor's Manual is also included. (1,056 pages)

INCLUDES BONUS SOLUTIONS MANUAL!

c: Structural Loads: 2012 IBC and ASCE/SEI 7-10

Presents load requirements in a straightforward manner with emphasis placed

[Watch preview video online!](#)

on proper application in everyday practice. The structural load provisions are organized in comprehensive flowcharts that guide the reader through the requirements. **Author David A. Fanella, Ph.D., S.E., P.E., F.ASCE**, provides a valuable training resource for engineers, architects, plan reviewers, building officials, and students who need to understand how to determine structural loads including dead load, occupancy live load, roof live load and environmental loads such as rain, snow, ice, flood, wind and seismic loads. This edition includes a new chapter on load path, a new section on atmospheric ice loads, completely updated discussion of the new wind design procedures in ASCE/SEI 7-10, and problems at the end of each chapter. A complete Solutions Manual is included as an online bonus. (550 pages)

100 WORKED-OUT EXAMPLES!

d: Seismic and Wind Forces: Structural Design Examples, 4th Edition

Newly updated to the 2012 IBC, ASCE/SEI 7-10, ACI 318-11, NDS 2012, 2011 MSJC Code, and 2010 AISC 341, 358 and 360 by **well-known author Alan Williams**. In each chapter, sections of the code are presented, analyzed and explained in a logical and simple manner and are followed by illustrative examples. More than 100 completely worked-out design examples are included in the chapters to clearly show proper application of the code requirements. (594 pages)

NEW!

e: Tall and Super Tall Buildings: Planning and Design

Featuring contributions from 30 global experts, this book describes the technical developments and special design features used for landmark buildings. This authoritative resource addresses HVAC systems, sustainability, geotechnical and foundation engineering, wind engineering, and more. Construction photographs and detailed diagrams are included throughout. This is the definitive guide for engineers, architects, project managers, building inspectors, and anyone involved in the planning and design of tall and supertall buildings. (416 pages)

NEW EDITIONS! NEW EXAMPLES!

2012 IBC and 2009 IEBC Structural/Seismic Design Manuals

ICC has again partnered with the Structural Engineers Association of California to publish this popular series of Manuals. Now expanded to five volumes, each volume provides a step-by-step approach to applying the structural provisions of the 2012 IBC® and referenced standards. The series is an excellent reference and study guide for the NCEES Structural Exam. The manuals are filled with invaluable examples to assist civil and structural engineers, architects, academics, and students.

SEAO Structural/Seismic Design Manual, 2009 IEBC: Existing Building Seismic Hazard Reduction Design Examples

A step-by-step approach to properly applying the structural/seismic design provisions of the 2009 IEBC. The manual uses clear, concise and graphic guidance on the application of specific provisions of the code. Features:

- Examples addressing the major structural deficiencies in existing buildings
- Examples from each Appendix Chapter of the 2009 IEBC
- Appropriate code and standard references cited for each step
- 2012 IEBC Updates where applicable (447 pages)

CodeMaster Series: Quick Reference Tools

These handy laminated reference tools contain great amounts of valuable information on a variety of structural topics using tables, flowcharts and numerous illustrations. They provide shortcuts and tips, and condense applicable code requirements into easy-to-follow tables with corresponding code sections.

FROM NCSEA AND ICC!

a: Guide to the Design of Building Systems for Serviceability: In Accordance with the 2012 IBC and ASCE/SEI 7-10

Provides practical information and design examples for design professionals to evaluate the serviceability performance of buildings in accordance with the requirements of the 2012 IBC and referenced standards. **Author Kurt D. Swensson, Ph.D., P.E., LEED AP**, provides detailed explanations and examples of proper application of code provisions and standards for a broad scope of materials, building systems, and building components, covering the vast majority of limit states encountered in the structural design of buildings. Each chapter contains basic information necessary for consideration of serviceability performance and several example problems associated with an example building type. (220 pages)

FROM SFPE AND ICC!

b: Engineering Guide: Fire Safety for Very Tall Buildings

A new information tool from ICC and SFPE for designers, builders and all engineering professionals to better understand fire protection issues in very tall buildings. The focus is on fire and related events and the effect of these events on life safety and fire fighter safety. Topics covered include: risks, unique challenges, egress, smoke management, fire fighter needs, structural fire resistance, design, site infrastructure, commissioning, inspection, maintenance, and change of occupancy/use. (155 pages)

200+ COLOR FIGURES! CD INCLUDED!

c: 2009 IBC® Handbook: Structural Provisions

This completely detailed and in-depth discussion on the IBC provides a great wealth of code knowledge for anyone working with the structural provisions of the code. Well-known authors **S. K. Ghosh, Ph.D.**, and **John Henry, P.E.**, cover the requirements in Chapters 16–23 and trace the historical background and rationale of code provisions. More than 200 full-color drawings, tables and figures clarify the application and intent of code requirements. The bonus CD contains the complete Handbook as well as many helpful structural references. (681 pages)

HARD COVER	(4001S09)	99.95	79.95

A limited supply is available.

d: Significant Changes to ASCE 7-10: Illustrated Guides

This new series by ASCE focuses on the updates to the wind and seismic load requirements of ASCE 7-10. Each reference includes brief summaries of changes to the wind or seismic provisions affecting actual practice or enforcement, followed immediately by the precise wording of the change. These publications are ideal for structural engineers, architects, contractors, building officials, inspectors and allied professionals. Features:

- Each update is explained straightforward language.
- Includes diagrams, examples, and color photographs and illustrations.

d: Significant Changes to the Wind Load Provisions of ASCE 7-10: An Illustrated Guide

Author T. Eric Stafford, P.E. (160 pages)

PTI M10.3-00: Field Procedures Manual for Unbonded Single Strand Tendons

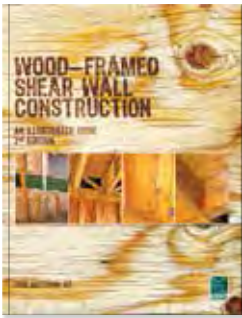

This manual provides guidance for field personnel involved in the installation, stressing, and finishing of unbonded single-strand tendons. It also provides information for the inspection of construction and the use of unbonded single-strand tendons, and contains extensive discussion of job-site troubleshooting. (61 pages)

SOFT COVER	(9630S)	29.00	26.00
------------------	---------	-------	-------

e: PTI M10.2-00: Specification for Unbonded Single Strand Tendons

This publication presents performance specifications for single-strand unbonded post-tensioning tendons in prestressed concrete structures. Specifications are given for both tendons in normal and aggressive (corrosive) environments. A commentary to each section is also provided. Revisions include clearer guidelines on defining aggressive environments, acceptance criteria for prestressing strand, compliance standards for encapsulated assemblies, and general enhanced provisions for corrosion protection of unbonded tendons. (36 pages)

**WINNER: SEAC AWARD OF MERIT!
150+ COLOR ILLUSTRATIONS!**

a: Wood-Framed Shear Wall Construction: An Illustrated Guide, 2nd Edition

This unique guide gives carpenters, builders, engineers, inspectors, and others an understanding of one of the most important structural components in today's framed buildings—the wood-framed shear wall. Author **Thor Matteson, S.E.**, shares practical insight he has gained as both a structural engineer and carpenter.

Order this Award Winner!

Features:

- Coverage of shear walls from basic requirements to advanced application.
- A new chapter on the basics of seismic strengthening of older wood-framed buildings.
- Explanation of the five essential qualities required in a shear wall.
- Quick Start figure illustrating many basic shear wall requirements.
- A thorough Field Inspection Checklist.
- Improved page layout for easy reference. (200 pages)

- ATC-20 Addendum (94 pages)

SOFT COVER	(9364S)	42.00	39.95
------------------	---------	-------	-------

ATC-20-1 Field Manual: Postearthquake Safety Evaluation of Building

The pocket-sized companion to the ATC-20 Report summarizes the postearthquake safety evaluation procedures in brief concise format designed for ease of use in the field. (159 pages)

SOFT COVER	(9365S)	26.00	24.95
------------------	---------	-------	-------

c: Soils, Earthwork, and Foundations: A Practical Approach, Based on the 2012 IRC and IBC

Author Kirby T. Meyer, P.E., D.GE, F.ASCE bridges the worlds of geotechnical engineering and foundation design, with construction activities and inspections dealing with soil conditions and building foundations. The book provides illustrations to assist in the understanding of the principles involved in foundations, guidelines for when to call on a geotechnical or foundation design engineer, and tips for effectively communicating with geotechnical and structural professionals. Building department personnel, inspectors, laboratory personnel, and foundation and earthwork contractors will find the book helpful. Architects and engineers will benefit from the information on design and field applications for foundations. Important features include expanded discussion of earthwork, fill, compaction control, grading control and inspection. Discussion of construction and inspection of roadways and parking lots has been added along with an extensive treatment of the 2012 IBC Special Inspector program. Review questions are included that will assist those studying for the Soils Special Inspection Certification Exam. References to the 2012 IRC and IBC are provided throughout. (300 pages)

SOFT COVER	(4036S12)	56.95	44.95
PDF DOWNLOAD	(8950P275)	54.95	43.95

d: Geotechnical Testing, Observation, and Documentation, Second Edition

This indispensable, in-depth field manual by **Tim Davis** will help you understand common laboratory and field tests, classify soil accurately, interpret project recommendations, and document the entire construction monitoring process. This expanded edition includes: sample test questions with answer key; comprehensive case studies; a quick reference for tools and references, compaction equipment, and frequently used formulas and equations; a glossary of more than 500 terms; and many ready-to-use forms. (225 pages)

2014 ICC CERTIFICATIONS

ICC Certification & Testing provides nationally recognized credentials that demonstrate a confirmed commitment to protect public health, safety, and welfare. Raise the professionalism of your department and further your career by pursuing ICC Certification.

NEW FOR 2014

Exams based on the 2012 International Codes will be offered via both paper-and-pencil and computer-based testing throughout 2015 and beyond. Exams based on the 2009 International Codes will be offered via computer-based testing through June 2015, and 2009- and 2012-based paper-and-pencil exams will be available until further notice. Exams based on the 2006 International Codes will be offered via paper-and-pencil only, through the end of 2014. New exams launching in July 2014 include several each in the Commercial Fire Alarm and Commercial Fire Sprinkler areas.

ICC IS A ONE-STOP SHOP

Did you know ICC Certification and Testing offers more than 665 exam titles for National Certification, UST/AST, and Contractor/Trades programs? Ask us for more information on how we can meet all your testing needs. For details, visit www.iccsafe.org/certification, email us at certexam@iccsafe.org, or call us at 1-888-422-7233. For fastest service, dial 0 for general questions; for specific information on your certification, dial extension 5524.

Following are major certifications and required exam reference materials, most of which can be purchased through this catalog or at shop.iccsafe.org.

SPECIAL INSPECTION EXAMS AND REFERENCES FOR 2014

For more information on Special Inspector examinations, visit www.iccsafe.org/certification.

Prestressed Concrete

2012 IBC®, ACI 318-11, Manual for Quality Control for Plants and Production of Structural Precast Concrete Products (MNL-116-99, 4th edition), Field Procedures Manual for Unbonded Single Strand Tendons (2000, 3rd edition), Specifications for Unbonded Single Strand Tendons (2000, 2nd edition), Recommendations for Prestressed Rock and Soil Anchors (4th edition), ASTM Standards: as Referenced in the 2009 IBC, Model Program for Special Inspection.

Reinforced Concrete

2012 IBC®, ACI 318-11, ASTM Standards: as Referenced in the 2009 IBC, Concrete Manual, Model Program for Special Inspection.

Structural Masonry

2012 IBC®, TMS 402-11/ACI 530-11/ASCE 5-11 & TMS 602-11/ACI 530.1-11/ASCE 6-11, Reinforced Grouted Brick Masonry, Reinforced Concrete Masonry Construction Inspector's Handbook, 2009 Masonry Codes and Specification Compilation, ASTM Standards: as Referenced in the 2009 IBC, Model Program for Special Inspection.

Structural Welding

2012 IBC®, AWS D1.1 Structural Welding Code: Steel ('06 or '08), AWS D1.3 Structural Welding Code: Sheet Steel ('98 or '08), AWS D1.4 Structural Welding Code: Reinforcing Steel ('98 or '05), AWS Standard Symbols for Welding (A2.4-98 or A2.4-07), AISC Steel Construction Manual, Model Program for Special Inspection.

Structural Steel and Bolting

2012 IBC®, Model Program for Special Inspection, AISC Steel Construction Manual.

Spray-Applied Fireproofing

2012 IBC®, AWCCI Technical Manual 12-A, AWCCI Technical Manual 12-B, Model Program for Special Inspection.

Soils Special Inspector

2012 IBC®; ASTM Standards: as Referenced in the 2009 IBC, Geotechnical Testing, Observation, and Documentation (2nd Edition); Soils, Earthwork, and Foundations: A Practical Approach; Model Program for Special Inspection.

CODE OFFICIAL AND COMBINATION CERTIFICATIONS

Watch for changes to the combination designations in 2014, as ICC Certification and Testing realigns some designations to better fit today's job descriptions. For more information on individual certifications needed for each combination certification, visit www.iccsafe.org/certification.

Here are a few of the combination designations you can achieve with ICC:

Commercial Combination Inspector
Combination Plans Examiner
Combination Inspector

Residential Combination Inspector
Energy Code Specialist

Certified Building Official
Master Code Professional (MCP)

References are subject to change. Go to www.iccsafe.org/certification for a current Exam Information Bulletin.

CODE SAFETY PROFESSIONAL EXAMS AND REFERENCES

Most Code Safety Professional exams will be available on the 2009 or 2012 I-Codes via computer-based testing through the end of 2014, with exams based on the 2015 I-Codes available in 2015. Exams listed below are based on the 2012 I-Codes. For more information on exams based on 2009, 2012, or 2015 I-Codes, visit www.iccsafe.org/certification.

***Accessibility Inspector/Plans Examiner**

*Exam based on 2009 International Codes also available. **Exam based on 2008 NEC® also available.

UST/AST EXAMINATIONS

Petroleum storage tanks are regulated by federal and state laws. Many states require that tank workers be licensed or certified before being allowed to install, retrofit or decommission UST and/or AST systems or components. The ICC UST/AST Certification examinations can be used to complement state licensing programs. In some states, individuals are required to pass state-specific examinations.

Please visit www.iccsafe.org/certification for an Exam Information Bulletin listing required references for the following categories:

AST (Aboveground Storage Tank) Installation/Retrofitting	CA UST System Operator	Rhode Island (RI) Class A UST System Operator
UST (Underground Storage Tank) Cathodic Protection	CA Vapor Recovery System Installation and Repair	RI Class B UST System Operator
UST Decommissioning	Colorado (CO) UST System Operator Class A	RI Class A/B UST System Operator
UST Installation/Retrofitting	CO UST System Operator Class B	Utah (UT) Class A UST System Operator
Class A UST System Operator (National)	Connecticut (CT) Class A UST System Operator	UT Class B UST System Operator
Class B UST System Operator (National)	CT Class B UST System Operator	Vermont (VT) Class A UST System Operator

The Future of Code Development is here—cdpACCESS

This new online cloud-based tool, built exclusively for ICC's Code Development Process (cdp), offers Code Council Members the opportunity to collaborate, review, submit and vote on code change proposals and public comments.

Accessible

Participation in ICC's Code Development Process, both currently and under cdpACCESS, is open to all users and is not limited to ICC Members*.

Connected

An online collaboration feature where the discussion on individual proposals and public comments is threaded and retained for follow-up response by invited peers.

Supportive

ICC is committed to supporting our Members as we transition into cdpACCESS for our code development process. You can find help any of the following ways:

- While logged into cdpACCESS.com, click 'Help' at the top for a user's manual.
- Contact ICC staff via:

Email: cdpACCESS@iccsafe.org

Phone: 855-ICC-CDP-1 (422-2371) Monday–Friday, 7 am–7 pm CT

Learn how to create, edit and submit code change proposals online
iccsafe.org/cdpACCESS

**With the exception of online Governmental Member Consensus voting, which is limited to Governmental Member Representatives and Honorary Members and will occur following the Public Comment Hearing. Ballots will be posted for everyone to view however only eligible members can vote.*

Ordering Information

Member discount and billing: Member discount prices are offered to current ICC members only. All members must use their membership number on each order to receive the discount pricing. Orders must be prepaid or charged to a credit card. All orders are to be paid in U.S. funds. Returned checks are subject to a \$25 service charge.

Shipping and Handling: Orders are shipped postage paid via FedEx, UPS or USPS unless otherwise specified. A complete address must be given for each order. Please refer to the order form for shipping charges.

International orders: For faster service, please pay by credit card. All international orders must be prepaid in U.S. funds. Please allow 6 to 8 weeks for first-class mail service. Express delivery and wire transfers are available; please call 1-800-786-4452 for pricing information. *Proof of I.D. may be required.*

Return and Refund Policy

Products may be returned in new, resalable condition within 30 days. Claims for shortages or damage must be made within 5 days of receipt of merchandise. All returns must include an ICC Return Authorization number. Call 1-888-422-7233, x33801 to receive your Return Authorization number. A copy of a paid invoice, a canceled check for the amount of purchase, or other proof of purchase must accompany the shipment of all returns. Unauthorized returns will be delayed in processing and may not be accepted for credit and/or may get returned to the customer.

All returns are subject to a restocking fee of 20 percent of the original selling price. No refund will be issued on overpayments less than \$5.

Returned merchandise must be shipped prepaid to the ICC Distribution Center, 11711 W. 85th St, Lenexa, KS 66214. It is strongly recommended that returned merchandise be shipped through UPS to ensure prompt and efficient delivery because materials shipped at book rate are not traceable through the USPS.

No refunds are made for software, audio or video products. Defective software, audio or video items may be exchanged only for the same titles or editions as the defective item.

If you have any questions on these policies, please call 1-800-786-4452 and ask for a customer service representative.
