# Driving Growth and Affordability Through Innovation and Safety

## An Overview of the International Code Council

The International Code Council is a member-focused association. It is dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets choose the International Codes.

## Services of the ICC

The organizations that comprise the International Code Council offer unmatched technical, educational and informational products and services in support of the International Codes, with more than 200 highly qualified staff members at 16 offices throughout the United States. Some of the products and services readily available to code users include:

- CODE APPLICATION ASSISTANCE
- EDUCATIONAL PROGRAMS
- PREFERRED PROVIDER PROGRAM FOR EDUCATORS
- CERTIFICATION PROGRAMS
- TECHNICAL HANDBOOKS AND WORKBOOKS
- PLAN REVIEW SERVICES
- DIGITAL PRODUCTS
- ONLINE MAGAZINES AND NEWSLETTERS
- PUBLICATION OF PROPOSED CODE CHANGES
- TRAINING AND INFORMATIONAL VIDEOS
- BUILDING DEPARTMENT ACCREDITATION PROGRAMS
- EVALUATION SERVICE FOR CODE COMPLIANCE
- EVALUATIONS UNDER GREEN CODES, STANDARDS AND RATING SYSTEMS

## Additional Support for Professionals and Industry:

### ICC EVALUATION SERVICE, LLC (ICC-ES)

ICC-ES is the industry leader in performing technical evaluations for code compliance, providing regulators and construction professionals with clear evidence that products comply with codes and standards.

### INTERNATIONAL ACCREDITATION SERVICE (IAS)

IAS accredits testing and calibration laboratories, inspection agencies, building departments, fabricator inspection programs and IBC special inspection agencies.

### SOLAR RATING & CERTIFICATION CORPORATION (ICC-SRCC)

The industry standard since 1980, ICC-SRCC fulfills the industry's need for a single, national program that allows manufacturers to rate and test the efficiency of solar equipment. In addition, ICC-SRCC now also includes the Small Wind Certification Council's services in its portfolio and can facilitate in independent certification of Wind Turbines.

### S. K. GHOSH ASSOCIATES (SKGA)

The preeminent technical resource on structural codes and standards, SKGA supports Authorities Having Jurisdiction, design professionals and others through its specialized publications, seminars, research projects and services.

### FROM ICC AND SEAOSC!

#### DESIGN GUIDE, VOLUME 1: CITY OF LOS ANGELES MANDATORY EARTHQUAKE HAZARD REDUCTION IN EXISTING NON-DUCTILE CONCRETE BUILDINGS (NDC)

This design guide discusses and demonstrates methodologies for the seismic evaluation and strengthening of existing non-ductile concrete buildings. While aspects of this guide focus on the mandatory City of Los Angeles earthquake hazard reduction ordinance and historical construction practices of the Southern California region, it is generally applicable to any other existing concrete buildings in areas of moderate or high seismicity. The guide collects practical advice, guidance on implementing current evaluation and retrofit methodologies, summaries of relevant and useful reference materials, and detailed examples to address this challenging subject. This design guide was written for use with the 2017 *City of Los Angeles Building Code* based on the 2015 IBC® and ASCE 41-13. It is an excellent resource for practicing professional engineers, architects, building officials, academics, and students evaluating this type of structure. (298 pages)

#### DESIGN GUIDE, VOLUME 2: CITY OF LOS ANGELES MANDATORY EARTHQUAKE HAZARD REDUCTION IN EXISTING WOOD-FRAME BUILDINGS WITH SOFT, WEAK OR OPEN-FRONT WALLS (SWOF)

This design guide provides an example and detailed commentary for the seismic strengthening of existing wood-frame buildings with soft, weak or open-front (SWOF) wall lines subject to the recently passed mandatory Los Angeles Ordinance. The design example in this guide demonstrates a prescriptive, ordinance-based retrofit approach for a typical open-front wall line. Following this example, a demonstration is given showing how FEMA P807 could be used to design a retrofit for the same example building. This design guide was written for use with the 2014 *City of Los Angeles Building Code* based on the 2012 IBC and ASCE 7-10. (114 pages)
