INTERNATIONAL CODES[®]

2018 International Building Code® (IBC®)

This code applies to all buildings except detached one- and two-family dwellings and townhouses up to three stories. The 2018 IBC contains many important changes such as:

- Accessory storage spaces of any size are now permitted to be classified as part of the occupancy to which they are accessory.
- New code sections have been introduced addressing medical gas systems and higher education laboratories.
- Use of fire walls to create separate buildings is now limited to only the determination of permissible types of construction based on allowable building area and height.
- Where an elevator hoistway door opens into a fire-resistance-rated corridor, the opening must be protected in a manner to address smoke intrusion into the hoistway.
- The occupant load factor for business uses has been revised to one occupant per 150 square feet.
- Live loads on decks and balconies increase the deck live load to one and one-half times the live load of the area served.
- The minimum lateral load that fire walls are required to resist is five pounds per square foot.
- Wind speed maps updated, including maps for the state of Hawaii. Terminology describing wind speeds has changed again with ultimate design wind speeds now called basic design wind speeds.
- Site soil coefficients now correspond to the newest generation of ground motion attenuation equations (seismic values).
- Five-foot tall wood trusses requiring permanent bracing must have a periodic special inspection to verify that the required bracing has been installed.
- New alternative fastener schedule for construction of mechanically laminated decking is added giving equivalent power-driven fasteners for the 20-penny nail.
- Solid sawn lumber header and girder spans for the exterior bearing walls reduce span lengths to allow #2 Southern Pine design values.

2018 International Residential Code® for One- and Two-Family Dwellings (IRC®)

This comprehensive code comprises all building, plumbing, mechanical, fuel gas and electrical requirements for one- and two-family dwellings and townhouses up to three stories. The IRC contains many important changes such as:

- An updated seismic map reflects the most conservative Seismic Design Category (SDC) based on any soil type and a new map reflects less conservative SDCs when Site Class A, B or D is applicable.
- The townhouse separation provisions now include options for using two separate fire-resistant-rated walls or a common wall.
- An emergency escape and rescue opening is no longer required in basement sleeping rooms where the dwelling has an automatic fire sprinkler system and the basement has a second means of egress or an emergency escape and rescue opening.
- The exemption for interconnection of smoke alarms in existing areas has been deleted.
- New girder/header tables have been revised to incorporate the use of #2 Southern Pine in lieu of #1 Southern Pine.
- New tables address alternative wood stud heights and the required number of full height studs in high wind areas.

2018 International Green Construction Code® (IgCC®)

A whole systems approach to the design, construction and operation of buildings, the IgCC contains measures that result in better indoor environments, lower impact on natural resources, better neighborhood connections, and improved walkability. Its revised format includes ANSI/ASHRAE/USGBC/IES 189.1-2017 *Standard for the Design of High-Performance Green Buildings Except Low-Rise Residential Buildings*. The IgCC provisions allow the seamless coordination with either the IECC® or ASHRAE Standard 90.1 for ease of adoption in any jurisdiction.

2018 International Fire Code® (IFC®)

The IFC contains regulations to safeguard life and property from fires and explosion hazards. Topics include general precautions, emergency planning and preparedness, fire department access and water supplies, automatic sprinkler systems, fire alarm systems, special hazards, and the storage and use of hazardous materials. Key changes to the IFC include:

- New provisions address hazards related to outdoor pallet storage, higher education laboratories, mobile food trucks and plant processing and extraction activities.
- Mass Notification Requirements for college and university buildings have been added to the code.
- Sprinkler protection is now required in existing Group A-2 occupancies having an occupant load of 300 or more where alcoholic beverages are consumed.
- A new chapter addresses issues related to Energy Systems.
- Integrated testing requirements for fire protection and life safety systems have been added for high rise buildings and smoke control systems.
- The requirements for gas detection systems have been revised throughout the code to be more reflective of industry practice.
- New provisions require illumination for the exit discharge path of travel to the public way or to a safe dispersal area for all occupancies.
- Provisions have been added to address the hazards associated with outdoor assembly events, indoor trade shows and exhibitions.
- The fire watch requirements for construction and demolition activities have been enhanced.
- Required sprinkler protection of Group E occupancies has been expanded through the introduction of a new thresholds related to fire areas.

2018 International Energy Conservation Code® (IECC®)

The IECC addresses energy efficiency on several fronts including cost savings, reduced energy usage, conservation of natural resources and the impact of energy usage on the environment. Key changes include:

- Revisions to interior and exterior lighting power budgets and better clarity for lighting controls.
- Clarity that regardless of design methodology, system commissioning is required.
- New limits on heated or cooled vestibules.
- Mechanical provisions reorganized based on equipment type rather than design methodology.
- The maximum allowable fenestration *U*-factors in Table R402.1.2 (for the prescriptive compliance path) for climates zones 3 through 8 have been reduced from the values in the 2015 edition.
- The ICC/RESNET 380 standard has been included as one of standards that can be used for determining the air leakage rate of a building or dwelling unit.
- The Energy Rating Index compliance alternative index values have been increased slightly however, the method for determining an index is now required to be in accordance with standard ICC/RESNET 301.

2018 International Plumbing Code® (IPC®)

The IPC provides minimum regulations for plumbing facilities in terms of both performance and prescriptive objectives, and provides for the acceptance of new and innovative products, materials, and systems. Important changes include:

- Updated table for the Minimum Number of Required Plumbing Fixtures.
- Single-user toilet facilities (a room having a single water closet and a single lavatory) are not required to be labeled for use by only a male or female (separated use designations).
- Solar thermal water heating systems need to conform to the ICC 900/SRCC 300 standard.
- Well systems are required to comply with standard NGWA-01 where local requirements do not cover subject matter or are lacking in detail on others.

2018 International Mechanical Code® (IMC®)

Establishes minimum regulations for mechanical systems using prescriptive and performance-related provisions. The IMC was developed with broad-based principles that make possible the use of new materials, methods and design. Important changes include:

- Added coverage of pollution control units.
- A new exception was added to recognize Type I kitchen hoods listed for clearances to combustibles of less than 18 inches.
- Added coverage for a newer type of non-metallic duct, phenolic duct.
- New coverage for high volume large diameter fans (HVLDD), also referred to as high volume low speed (HVLS) fans.
- Relaxed requirements for sealing of duct joints and seams for Snap-and Button-lock duct joints located within the thermal envelope.

2018 International Fuel Gas Code® (IFGC®)

Addresses the design and installation of fuel gas systems and gas fired appliances through prescriptive and performance requirements. Key changes include:

- A new Section was added to recognize arc-resistant CSST products.
- The code now allows Schedule 10 steel pipe to be used, whereas previously, Schedule 40 was the lightest steel pipe material allowed. Schedule 10 steel pipe joints are allowed to be welded, brazed, flanged or assembled with press-connect fittings. Schedule 10 pipe cannot be threaded.
- The code clarifies that appliance shutoff valves located behind movable appliances, such as ranges and clothes dryers, are considered to be provided with the required access.
- The code now calls for the plastic vent pipe material to be labeled as complying with the standards for the specific pipe material as called out by the manufacturer. As an alternative, the plastic pipe can always be listed to UL1738.
- The clearances between direct-vent appliance vent terminals and openings in the building exterior that could allow combustion products to enter the building have been revised.

2018 International Existing Building Code® (IEBC®)

Encourages the use and reuse of existing buildings. This code covers repair, alteration, addition and change of occupancy for existing buildings and historic buildings, while achieving appropriate levels of safety without requiring full compliance with the new construction requirements contained in the other I-Codes. Key changes include:

- Section 410 Accessibility has been relocated to a new Section 305. Chapters 4, 5, 6, 13 and 14 have been relocated resulting in a reorganization and new chapter numbering.
- Requirements for live loads from Chapters 4 and 8 have been combined and placed in Chapter 3 to apply for all compliance methods.
- Structural components damaged by snow events must be repaired assuming snow loads for new buildings from the IBC.
- A new exception is added for loading of existing structural elements next to an addition in buildings designed using the IRC.
- When a work area includes more than half the building in an alteration, wall anchors must be installed at the roof line along reinforced concrete and masonry walls.
- Buildings undergoing a change of occupancy shall have live, snow, wind and seismic loads checked. Design loads are based on IBC-level forces.
- When a change of occupancy occurs placing a building in a higher risk category, the seismic loads on the building must be evaluated using IBC-level forces. Access to the building must be maintained when passing through or near other buildings and structures.
- Where storm shelters are required based on IBC and ICC 500 for Group E Occupancies, any addition to such existing occupancies where the occupant load of the addition is 50 or more will trigger the construction of a storm shelter.
- Carbon Monoxide provisions have been added in the Prescriptive Method Additions, Alterations Level 2 Additions, and in Additions for I-1, I-2, I-4 and R Occupancies.
- Emergency Escape and Rescue Opening provisions related to being operational have been added to Prescriptive Compliance Method and Alterations Level 1.
- Single exit buildings and spaces under Alteration Levels 2 and 3 have been modified to be more consistent with the IBC.
- The Alterations Level 2 requirement that water for automatic fire sprinkler system be available at the floor of alteration without the need for a fire pump has been moved to Chapter 9 for Alterations Level 3 and the fire pump criterion was deleted.

2018 International Swimming Pool and Spa Code® (ISPSC®)

The only comprehensive swimming pool code coordinated with the current requirements in the I-Codes and APSP standards. Developed with the Association of Pool & Spa Professionals (APSP), the ISPSC will establish minimum regulations for public and residential pools, spas, and hot tubs using prescriptive and performance-related provisions. The ISPSC integrates seamlessly with the family of I-Codes and contains requirements that meet or exceed the Virginia Graeme Baker Act. The ISPSC also contains APSP-7 Standard for Suction Entrapment Avoidance. Important changes in the ISPSC include:

- It was clarified that flotation tank systems for sensory deprivation therapy are not within the scope of the ISPSC.
- Hot water storage tanks are now required to be listed and labeled to a standard.
- New sections were introduced into the code to cover solar thermal water heating systems. Installation requirements refer to the IMC.

2018 International Solar Energy Provisions™ (ISEP™)

Contains all I-Code and NEC solar energy provisions plus key SRCC standards and more!

The ISEP meets the industry's need for a resource that contains the complete solar energy-related provisions from the 2018 International Codes and NFPA 70: 2017 NEC® *National Electrical Code*, and selected standards in one document. The ISEP is organized such that it provides the best and most comprehensive tool for the design, installation and administration of both solar thermal (or solar heating and cooling) and photovoltaic systems.

Two important referenced standards from ICC-Solar Rating & Certification Corporation (ICC-SRCC™) are included:

- ICC 901/SRCC 100-2015: Solar Thermal Collector Standard
- ICC 900/SRCC 300-2015: Solar Thermal System Standard

Additional resources, such as sample solar permitting forms and links to the U.S. Department of Energy solar site, have also been included making the 2018 ISEP the single, most comprehensive document for solar energy code provisions and standards in the nation.

GROUP B PROPOSAL SUBMISSION BEGINS FALL 2018!

People Helping People Build a Safer World®

Empowering Participants of the ICC Code Development Process

cdpACCESS is a cloud-based tool that offers participants the opportunity to collaborate, review and submit code change proposals and public comments online. Participation in the ICC Code Development Process through cdpACCESS is open to all users. Voting is accessible to eligible ICC Members*.

Welcome to the new and improved cdpACCESS!

We're following up on a successful 2018 Code Development Cycle with an even better online tool to create, review, collaborate, submit, and vote on code change proposals, modifications, and public comments for the 2021 cycle.

The new cdpACCESS is live, and we'd love to hear back from you. If you have comments, questions, or suggestions for new features, please email us at cdpACCESS@iccsafe.org.

In addition to the improved cdpACCESS, we have a new benefit for you: **hearingvideos.iccsafe.org**. Stream and review videos from the 2015, 2016, and 2018 hearings for free! It's a great way to check out the Hearings from the convenience of your office.

Create, edit and submit code change proposals online! Group B proposal submission begins Fall 2018. Use your **My ICC** account, or **register fast for free at cdpACCESS.com**

COMING SOON!

The municipality's online solution for code book change management

ICC is pleased to offer this online tool to states and municipalities that would like an easy-to-use and intuitive way to manage their own code development process. **cdpVA**, a pilot program created for the Virginia Department of Housing and Community Development, was an award-winning success! We look forward to working with more organizations in the future!

If you have questions about the new cdpACCESS or would like to get **cdpCMS** for your jurisdiction, please email cdpACCESS@iccsafe.org.

*Online Governmental Member Consensus voting is limited to Governmental Member Representatives and Honorary Members and will occur following the Public Comment Hearing. Ballots will be posted for everyone to view however only eligible members can vote.

NEW EDITIONS!

2018 International Codes and Commentary

Includes the full text of the code, including tables and figures, followed by corresponding commentary at the end of each section in a single document. The Download versions contain the complete text in PDF format. Search text, figures and tables; or copy and paste small excerpts from code provisions into correspondence or reports using Adobe® Reader®.

- Read expert Commentary printed after each code section.
- Learn to apply the codes effectively.
- Understand the intent of the International Codes® with help from the code publisher.

2012 and 2015 editions are also available.

Significant Changes to the 2018/2015 International Codes

Key changes are identified then followed by in-depth discussion of how the change affects real-world application. Coverage reflects provisions with special significance, including new and innovative design ideas and technologies, modern materials and methods of construction, and current approaches to safety and stability. Authored by ICC code experts, these useful tools are “must-have” guides to the many important changes in the 2018 and 2015 International Codes, and accessibility standard ICC A117.1.

2018 I-Code Essentials

This helpful series uses a straightforward, focused approach to explore code requirements with non-code language, allowing readers to gain confidence in their understanding of the material. Each book is an invaluable companion guide to the 2018 IBC, IEBC, IRC, IFC or IECC for both new and experienced code users. 2015 editions are also available.

Each book contains:

- Detailed full-color illustrations enhance comprehension of code provisions
- A focused, concise approach facilitates understanding of the essential code provisions
- References to corresponding code sections provide added value as companion guides to the 2018 I-Codes
- Glossary of code and construction terms clarifies their meaning in the context of the code

**A. Building Code Essentials:
Based on the 2018 International Building Code**

Explores those code provisions essential to understanding the application of the IBC in a straightforward and easy-to-read format. The user-friendly approach of the text simplifies critical concepts so that users can achieve a more complete understanding of the code's intent. Full-color illustrations, examples and simplified tables assist the reader in visualizing the code requirements. This up-to-date, step-by-step guide's topic organization reflects the intent of the IBC and facilitates understanding and application of the code provisions. (210 pages)

Structural Load Determination: 2018 IBC and ASCE/SEI 7-16

Discover how to calculate structural loads within the context of 2018 IBC and ASCE/SEI 7-16 requirements. This practical guide by **David A. Fanella** contains information engineers need to design buildings that will withstand the forces of gravity, occupancy, and environmental stress. It includes design

examples, flowcharts, and load diagrams that illustrate complex load provisions. The book explains the proper application of allowable stress design (ASD), load resistance factor design (LRFD), and seismic load combinations. Chapters cover occupancy, roof, rain, snow, ice, wind, seismic, and tsunami loads. Throughout, emphasis is placed on the proper application of load provisions within the scope of everyday practice. B. Guide to the Design of Common Irregularities in Buildings: 2012/2015 IBC and ASCE/SEI 7-10

This guide by **Badri K. Prasad, Douglas S. Thompson, and Rafael Sabelli** fully explains how and why building irregularities impact structural design and provides detailed examples of how to appropriately analyze and design lateral force-resisting elements for various types of irregular buildings located in Seismic Design Category (SDC) B and D. The book references the 2012 IBC and ASCE/SEI 7-10, and references material standards from the 2012 IBC by section number. It is also applicable to the later versions of these standards and the 2015 IBC. Four detailed design examples include an overview of applicable irregularities, a discussion of appropriate analysis and design requirements, determination of key lateral force-resisting system demands, and design of select example elements contained in the building's load path. NEW EDITION! FROM APA & ICC!

F. A Guide to the 2018 IRC Wood Wall Bracing Provisions

Although it is of critical importance when designing, performing plan review, building or inspecting a structure, wall bracing is a common source of confusion and misapplication. This illustrative guide was developed to help building designers, builders, building officials and others using the code in the application of the lateral bracing requirements of the 2018 IRC.

Topics covered include:

- Understanding wind and seismic forces on a house
- History of bracing and how it works
- Learning the “language” of bracing
- The physical limits under which bracing can be used
- Bracing options available to the builder/designer
- Rules for the use of bracing
- Determining how much bracing is required with adjustments and variations
- Connection details for bracing units
- Cripple walls and foundations
- Special bracing provisions for stone and masonry veneer
- Whole house considerations

The guide is jointly published by ICC and APA – The Engineered Wood Association with the shared goal of promoting the accurate understanding and correct application of the IRC for safer buildings and communities. (265 pages)

A. ANSI/RESNET/ICC 301-2014: Standard for the Calculation and Labeling of the Energy Performance of Low-Rise Residential Buildings using an Energy Rating Index

This standard provides a consistent, uniform methodology for evaluating and labeling the energy performance of residences. The methodology compares the energy performance of an actual home with the energy performance of a reference home of the same geometry, resulting in a relative energy rating called the Energy Rating Index. Where the energy performance of the actual home and the reference home are equal, the Energy Rating Index is 100 and where the actual home requires no net purchased energy annually, the Energy Rating Index is 0 (zero).

ANSI/RESNET/ICC 380-2016: Standard for Testing Airtightness of Building Enclosures, Airtightness of Heating and Cooling Air Distribution Systems, and Airflow of Mechanical Ventilation Systems

This standard provides a consistent, uniform methodology for evaluating the airtightness of building envelopes and heating and cooling air ducts, and the airflows of mechanical ventilation systems. These test procedures can be used as building diagnostics, in quality assurance and control, for determining compliance with codes and standards, and to determine input to energy simulations and ratings. The Standard recognizes some test procedures are easier to perform depending on house and HVAC system characteristics, and different codes and standards have specific testing requirements. Therefore, the Standard presents several alternative approaches for each measurement to allow flexibility in application of the standard.

C. ICC 500-2014: ICC/NSSA Standard for the Design and Construction of Storm Shelters

Published by ICC and the National Storm Shelter Association, this ANSI-approved standard provides minimum design and construction requirements for storm shelters that provide a safe refuge from storms producing high winds, hurricanes, and tornadoes. This standard provides design requirements for the main wind-resisting structural system and components and cladding of these shelters, and provides basic occupant life safety and health requirements for these shelters including means of egress, lighting, sanitation, ventilation, fire safety, and floor space. D. ICC 600-2014: Standard for Residential Construction in High-Wind Regions

This ANSI-approved standard provides wind resistant designs and construction details for residential buildings of masonry, concrete, wood-framed or cold-formed steel framed construction sited in high wind regions. It contains prescriptive requirements and other details of construction for buildings sited in wind climates of 120 to 180 mph in 10 mph increments. It provides an adoptable, contemporary set of prescriptive requirements that supplement the IRC® provisions. (218 pages)

FROM ASHRAE, NAHB AND ICC!**E. ICC/ASHRAE 700-2015: National Green Building Standard™ (NGBS)**

This ANSI-approved standard was developed for all types of sustainable residential construction. The NGBS outlines a variety of green practices that can be incorporated into new homes and multifamily buildings, as well as hotels, dormitories and land developments. The standard also delivers stand-alone chapters for both home remodeling and additions and renovations of multifamily buildings. The green practices address site and lot design, preparation and development; resource, energy and water efficiency; indoor environmental quality; and operation, maintenance and building owner education.

Four levels—Bronze, Silver, Gold and Emerald—enable residential professionals to integrate sustainability and high performance at a level most appropriate for their businesses and specific housing markets. Changes for the 2015 edition better align the NGBS with the I-Codes and expand the application of innovative practices. (228 pages)

ICC A117.1-2017: Standard for Accessible and Usable Buildings and Facilities

Since 1961, the A117.1 Standard has been at the forefront of creating a built environment open to everyone. The specifications in this standard enable people with physical disabilities to independently access and use sites, facilities, buildings and elements. Key changes in the 2017 edition apply to:

- clear floor space, turning space and the accessible route, increasing maneuverability for users of powered wheelchairs and scooters.
- the accessible route through a parking lot.
- charging of powered wheelchairs when parked for duration.
- spaces for sign language interpreter stations and sign language video booths.
- electric vehicle charging stations.
- water bottle filling stations.
- classroom acoustics.

ICC Guideline Series

I. ICC G1-2010: Guideline for Replicable Buildings

Intended to help state and local jurisdictions—as well as owners, designers and builders—streamlining a building document review process to examine and verify replicable construction documents; thus, eliminating repetitive code compliance reviews. A global review of replicable documents paired with a local review of unique jurisdictional requirements could be more cost effective, increase consistency in the application, enhance public safety, conserve local resources, and reduce the time between permit submittal and construction mobilization. G. GA-600-15: Gypsum Association Fire Resistance Design Manual, 21st Edition

With more than 700 systems addressing almost every imaginable condition, the GA-600-2015 contains almost 100 new assemblies that supplement and expand existing systems for walls and partitions, floor-ceiling systems, area separation walls, and many others.

Among these are 20 new head-of-wall and base-of-wall systems that significantly expand the options for perimeter relief. The systems in this manual utilize gypsum products to provide fire resistance to: walls, partitions, floor-ceilings, roof-ceilings, columns, beams, girders, trusses. Systems are classified according to their typical uses and their fire-resistance ratings. A section on strain relief systems containing fire-resistance rated control joint and perimeter relief details is also included. Every system in the book is designed and evaluated to meet specific levels of fire resistance. (305 pages)

Overwhelmed with a backlog of Plan Reviews?

The I-Code experts at ICC's Plan Review Services *can help you reduce your plan review backlog, even in the busiest construction season.* With more than 200 years of combined experience with applications of the codes, no plan review is too complex or too large for our experienced team of I-Code professionals.

With expertise in ALL the International Codes® (I-Codes®), we can perform complete plans reviews or a specific aspect of a plan.

Either way, you'll receive the most detailed and precise plan reviews in the industry!

Codes Reviewed

- ICC International Codes
- State and local amendments based on the I-Codes (except Performance Code)

Disciplines Reviewed

- Building (structural & nonstructural)
- Fire Protection Systems (includes sprinklers)
- Electrical

Study Companion Series

Based on the 2018 International Codes®

ICC's Study Companions are the ideal way to master the code for everyday application or to prepare for exams. Each comprehensive study guide provides practical learning assignments for independent study. Study Companions can also be used as part of instructor led programs in the workplace, college courses, or vocational training programs.

The Study Companions are organized into study sessions and include learning objectives, key points for review, code text, hundreds of illustrations and commentary applicable to the specific topic. Each study session includes a helpful quiz that allows the learner to measure their level of knowledge. Each Study Companion's answer key lists the code section referenced in each question for further information.

2015 editions are also available.

C. Legal Aspects of Code Administration, 2017 Edition

An excellent starting point for building officials who want to become better acquainted with the duties and legal responsibilities of enforcing the building code. It is also designed to serve as a refresher for those preparing to take the legal module of the ICC Certified Building Official or Certified Fire Marshal, or both, examinations. Organized in a logical sequence, this book will take the reader from the earliest building codes to modern codes. Building officials must understand their role in shaping, administering, and enforcing the building code. As agents of state and local governments, building officials must also understand the law and execute their duties in accordance with prevailing statutory and case law. This book will examine and discuss those duties and allow building officials to become successful at their jobs. This updated edition includes recent court decisions affecting building officials. Inspector Skills

The first book to address the “other” skills necessary for the people side of inspection, by ICC’s **Stephen A. Van Note**. *Inspector Skills* raises awareness of the importance of “soft skills” and provides guidance for improving those skills. Soft skills are non-technical traits and behaviors that enhance an inspector’s ability to interact with others and to successfully carry out job duties. When coupled with a solid technical knowledge of codes and construction

practices, effective soft skills elicit cooperation, generate respect and credibility, and improve the image of inspectors and code safety departments.

Topics include:

- Approaches to inspection
- Getting along
- Customer service
- Ethics
- Effective communication
- And much more!

The book is ideal for inspectors in all disciplines and can also benefit students, permit technicians, plan reviewers and building officials. (166 pages)

Report Writing for Code Inspectors

Report writing skills are essential to success in your code enforcement career. Notices of violation, letters, and reports are public documents that may be read by supervisors, attorneys, judges, citizens, design professionals, contractors, and reporters. Quality inspection reports and notices of violation help ensure code compliance, impress superiors, and win respect from colleagues. They

facilitate repairs, reinforce requirements for safe operations, and ensure unsafe practices are discontinued. *Report Writing for Code Inspectors* covers: basic principles for organizing and writing reports, bullet style, punctuation, capitalization, sentence structure, English usage, and the specialized vocabulary you need for your reports.

Sample reports are included, along with a pre-test, post-test, practice exercises, and complete answer key. (232 pages)

A. Structural Steel Inspector's Workbook, 2014 Edition

Steel Structures Technology Center and ICC have co-published this helpful workbook by **Robert Shaw, P.E.**, based on the requirements of the IBC, the standards of the AISC, AWS, Research Council on Structural Connections, Steel Joist Institute, and Steel Deck Institute, and inspection resources from ICC. The workbook provides practical exercises to learn about the various codes and standards governing steel building construction. It is designed in an independent-study format, enabling readers to progress at their own pace with simple, straightforward multiple-choice questions to test their knowledge. The workbook is an ideal resource for those working to attain ICC Certification for Structural Steel and Bolting Inspection, or Structural Welding Inspection. (156 pages)

B. Special Inspection Manual: 2012 Edition

In extreme natural events such as earthquakes and hurricanes, the most common contributing factor to significant structural damage and building failure is construction that fails to comply with codes, standards and design documents. Having specialized oversight and increasing inspection frequency, duration and detail during the construction process help mitigate construction issues.

Authored by ICC's Sandra Hyde, *Special Inspection Manual* gives detail to oversight and increased inspection requirements. The manual contains the requirements involving special inspection within the *International Building Code*, descriptions of the required special inspections, and information on creating a special inspection program. It supports preparation for special inspection certification exams and aids building departments in their creation of procedures and forms to run a special inspection overview program.

The guidance in the manual is based on recommended practices and the consensus of building officials, design professionals, and inspection and testing agencies. Duties and responsibilities of the special inspector, building official, project owner, engineer or architect of record and contractor are defined. This manual is also helpful for design professionals writing statements of special inspections. (300 pages)

C. Concrete Manual: 2015 IBC and ACI 318-14

Author **Gerald Neville, P.E.**, provides the guidance and information inspectors and other construction professionals need to become more proficient in concrete field practices and inspection.

The *Concrete Manual* will:

- Introduce concrete and explain why it behaves as it does.
- Explain conventional concrete construction procedures.
- Cover special concrete technologies such as Autoclaved, self-consolidating and pervious.
- Discuss control and inspection procedures.
- Explore statistical quality control methods and their application.
- Detail proper field testing procedures.
- Detail proper placement of reinforcement.

A Resource Reference section includes a list of the concrete industry and technical organizations to contact for additional information. (576 pages)

J. Soils, Earthwork, and Foundations: A Practical Approach, Based on 2015 IRC and IBC

Authors Kirby T. Meyer and Dean Reed bridge the worlds of geotechnical engineering and foundation design, and construction activities and inspections dealing with soil conditions and building foundations. The book provides illustrations to assist in the understanding of the principles involved in foundations, guidelines for when to call on a geotechnical or foundation design engineer, and tips for effectively communicating with geotechnical and structural professionals. Building department personnel, inspectors, laboratory personnel, and foundation and earthwork contractors will find the book helpful. Architects and engineers will benefit from the information on design and field applications for foundations. Important features include expanded discussion of earthwork, fill, compaction control, grading control and inspection. Discussion of construction and inspection of roadways and parking lots has been added along with an extensive treatment of the 2015 IBC Special Inspector program. Review questions are included that will assist those studying for the Soils Special Inspection Certification Exam. References to the 2015 IRC and IBC are provided throughout. (300 pages)

A. NFPA 70® 2017: NATIONAL ELECTRICAL CODE® (NEC)

The electrical code designated for use with the I-Codes®

With more than 4,000 public inputs and 1,500 comments, the 2017 NEC includes hundreds of updates and five all-new articles paving the way to a safe and efficient electrical future. The NEC sets the foundation for electrical safety in residential, commercial, and industrial occupancies. The 2017 edition of this trusted code presents the latest comprehensive regulations for electrical wiring, overcurrent protection, grounding, and installation of equipment. (900 pages)

B. 2017 NEC® HANDBOOK

Based on NFPA 70® 2017 *National Electrical Code®*, the Handbook explains how to implement requirements and the reasoning behind changes that could affect your designs and installations. It is your go-to source for when you need to resolve technical issues or explain the Code's intent to clients and staff. Rewritten and substantially updated, only the Handbook contains:

- Integrated commentary, positioned in-line with the complete 2017 NEC text, so you can quickly identify solutions.
- A new cross-reference feature that helps you find related information in other Articles.
- 800 photos, tables, and illustrations including schematics, floor plans, and cross-sectional graphics.
- A Summary of Technical Changes table that shows you where and why changes occurred.
- Gray shading within sections indicating technical changes, and "N" icons flagging new Articles, text, tables, and figures. Bullets show where paragraphs were deleted. (1,400 pages)

A. 2018 International Solar Energy Provisions™ (ISEP™)

The ISEP meets the industry’s need for a resource that contains the complete solar energy-related provisions from the 2018 International Codes and NFPA 70: 2017 NEC® *National Electrical Code*, and selected standards in one document. The ISEP is organized such that it provides the best and most comprehensive tool for the design, installation and administration of both solar thermal (or solar heating and cooling) and photovoltaic systems. Similar to the organization of the *International Energy Conservation Code* (IECC®), the Solar Commercial and Residential provisions have been presented in separate parts, to make it user friendly and easy to apply. Two important referenced standards from ICC-Solar Rating & Certification Corporation (ICC-SRCC™) are included:

- ICC 901/SRCC 100-2015: Solar Thermal Collector Standard
- ICC 900/SRCC 300-2015: Solar Thermal Heating System Standard

Additional resources, such as sample solar permitting forms and links to the U.S. Department of Energy solar site, are also included making the ISEP the most comprehensive document for solar energy code provisions and standards in the nation. (188 pages)

E. ICC/ASHRAE 700-2015: National Green Building Standard™ (NGBS)

This ANSI-approved standard was developed for all types of sustainable residential construction. The NGBS outlines a variety of green practices that can be incorporated into new homes and multifamily buildings, as well as hotels, dormitories and land developments. The standard also delivers stand-alone chapters for both home remodeling and additions and renovations of multifamily buildings. The green practices address site and lot design, preparation and development; resource, energy and water efficiency; indoor environmental quality; and operation, maintenance and building owner education. Four levels—Bronze, Silver, Gold and Emerald—enable residential professionals to integrate sustainability and high performance at a level most appropriate for their businesses and specific housing markets. Changes for the 2015 edition better align the NGBS with the I-Codes and expand the application of innovative practices. (228 pages)

B. Wind Design Manual: Based on the 2018 IBC® and ASCE/SEI 7-16, Examples for Wind Forces on Buildings and Solar Photovoltaic Systems

The *Wind Design Manual* offers examples on wind force design that illustrate the practical requirements of provisions in ASCE/SEI 7-16: Minimum Design Loads and Associated Criteria for Buildings and Other Structures. Practicing structural engineers, trained designers, building department engineers, other plan review agencies, professors and students, can all learn from these examples of code-compliant designs engineered to achieve good performance under wind loading. Developed by the Wind Design Manual Task Group of the Structural Engineers Association of California (SEAOC), the publication draws on the expertise of invited authors from various parts of the United States. The *Wind Design Manual* is intended for nationwide use, with example problems that apply to a variety of geographic areas. All are presented in a format similar to the SEAOC Structural/Seismic Design Manuals.

A wide range of topics is covered:

- General topics (4 examples)
- Special topics (2 examples)
- Buildings (3 examples)
- Solar Photovoltaic systems (7 examples)

C. Seismic Design Using Structural Dynamics: Based on 2015 IBC/ASCE 7-10/ACI 318-14

The 2015 IBC requires the use of a dynamic analysis procedure for the seismic design of a building under certain conditions of irregularity, occupancy, and height. However, dynamic analysis procedures are more complicated than the more traditional static procedure, and over the years, many questions have been asked about code provisions concerning this. This publication by **S. K. Ghosh and Pro Dasgupta** has been created to answer these questions and demystify the application of the code. (186 pages)

Based on the requirements of the 2015 IBC, this time-saving book from **Masonry Institute of America** eliminates repetitious and routine calculations required for masonry design. Code requirements, hundreds of drawings and sound engineering practice are included to assist the engineer and designer in understanding masonry design. Detailed explanations and applications of allowable stress design and strength design procedures are presented. More than 80 step-by-step examples are provided, including a one-story building and a seven-story building. (772 pages)

NEW EDITION!
Significant Changes to the Minimum Design Loads and Associated Criteria for Buildings and Other Structures (ASCE/SEI 7-16)
This handy volume translates the most noteworthy changes to the ASCE 7-16 load provisions into a form quickly accessible to structural engineers, architects, contractors, building officials and inspectors, and allied professionals. Topics include:

- General requirements and load combinations
- Dead and live loads
- Snow, rain, and ice loads
- Earthquake loads
- Wind loads
- New tsunami guidelines

In a user-friendly format, this volume describes 100+ changes accompanied by a detailed analysis, and includes photographs, diagrams, and other visual aids. (368 pages)

Snow Loads: Guide to the Snow Load Provisions of ASCE 7-16
Supplies detailed, authoritative explanations of the snow load provisions contained in ASCE/SEI 7-16. With clear, concise language, author **Michael O'Rourke, Ph. D., P.E.**, illustrates the key concepts for applying the provisions to the design of new and existing structures that could collect falling or drifting snow. Snow Loads discusses flat roof loads, sloped roof loads, partial loads, and all types of conventional drift loading. This guide includes 35 worked examples of real-life design problems, as well as answers to 20 frequently asked questions, including a new one on snow capture by solid walls.

FROM NCSEA AND ICC!

A. Guide to the Design of Common Irregularities in Buildings: 2012/2015 IBC and ASCE/SEI 7-10

This guide by **Badri K. Prasad, Douglas S. Thompson, and Rafael Sabelli** fully explains how and why building irregularities impact structural design and provides detailed examples of how to appropriately analyze and design lateral force-resisting elements for various types of irregular buildings located in Seismic Design Category (SDC) B and D. The book references the 2012 IBC and ASCE/SEI 7-10, and references material standards from the 2012 IBC by section number. It is also applicable to the later versions of these standards and the 2015 IBC. Four detailed design examples include an overview of applicable irregularities. (180 pages)

B. Design of Wood Structures: ASD/LRFD, Seventh Edition

The leading text on wood design references to the 2012 IBC and 2011 NDS. This indispensable resource by **Kelly Cobeen, Kenneth Fridley, Donald Breyer, and David Pollock Jr.** leads you through the complete design of a wood structure (except for the foundation), following the same sequence used in the actual design/construction process. Coverage includes: vertical design loads and lateral forces, design for vertical loads, design for lateral forces, and connection design. The book combines dual-format ASD/LRFD specification, equations, and problems throughout. The 2010/2011 ASCE-7 Standard Instructor's Manual is also included. (1,056 pages)

C. Steel Structures Design for Lateral and Vertical Forces, Second Edition

Author **Alan Williams** covers the fundamentals of behavior and the latest design methods for a variety of steel structures and loads, updated to the 2015 IBC. This comprehensive resource includes information on AISC codes, expanded coverage of seismic loads, and new design methods for multi-story frames, gable frames, and grid frameworks. A brand-new chapter on lateral loads provides explanations of traditional design methods as well as newer innovations in buckling-restrained braces and steel plate shear walls. End-of-chapter problems and solutions apply each concept to real-world design situations and show how code requirements are applied to both the ASD and LRFD methods. (688 pages)

D. Guide to the Design of Building Systems for Serviceability: In Accordance with the 2012 IBC and ASCE/SEI 7-10

Provides practical information and design examples for professionals to evaluate the serviceability performance of buildings in accordance with the requirements of the 2012 IBC and referenced standards.

Author Kurt D. Swenson, Ph.D., P.E., LEED AP, provides detailed explanations and examples of proper application of code provisions and standards for a broad scope of materials, building systems, and building components, covering the vast majority of limit states encountered in the structural design of buildings. Each chapter contains basic information necessary for consideration of serviceability performance and several example problems associated with an example building type. (220 pages)

E. Seismic and Wind Forces: Structural Design Examples, 4th Edition

Updated to the 2012 IBC, ASCE/SEI 7-10, ACI 318-11, NDS 2012, 2011 MSJC Code, and 2010 AISC 341, 358 and 360 by **well-known author Alan Williams**. In each chapter, sections of the code are presented, analyzed and explained in a logical and simple manner and are followed by illustrative examples. More than 100 completely worked-out design examples are included in the chapters to clearly show proper application of the code requirements. (594 pages)

G. Soils, Earthwork, and Foundations: A Practical Approach, Based on the 2015 IRC and IBC

Authors Kirby T. Meyer and Dean Reed bridge the worlds of geotechnical engineering and foundation design, with construction activities and inspections dealing with soil conditions and building foundations. The book provides illustrations to assist in the understanding of the principles involved in foundations, guidelines for when to call on a geotechnical or foundation design engineer, and tips for effectively communicating with geotechnical and structural professionals. Building department personnel, inspectors, laboratory personnel, and foundation and earthwork contractors will find the book helpful. Architects and engineers will benefit from the information on design and field applications for foundations. Important features include expanded discussion of earthwork, fill, compaction control, grading control and inspection. Review questions are included that will assist those studying for the Soils Special Inspection Certification Exam. References to the 2015 IRC and IBC are provided throughout. (300 pages)

S. K. Ghosh Associates LLC, Seismic and Building Code Consulting

S. K. Ghosh Associates LLC (SKGA) serves as a technical resource on structural codes and standards; it administers various training programs, develops and distributes support literature, and provides consultative services.

SKGA serves as a technical resource on structural codes and standards adopted by structural codes to:

- Enforcement Agencies and Personnel
- Design Professionals
- Academics
- Material Industries

Our technical support includes:

- **Publications** – various code support materials to aid in the learning and comprehension of specific codes.
- **Code Masters** – a condensed clear explanation of difficult code requirements on a particular structural topic in a durable reference tool for everyday use and for taking to P.E. and S.E. exams.
- **Seminars** – continuing education (with PDH) and comprehensive training on a variety of structural engineering topics offered online, face-to-face, or via on-demand recordings for your convenience.
- **Computer Programs** – tools that make code-compliance quick, simple, and easy with intuitive interfaces, easy-to-use workflow, and detailed output reports unmatched in the industry.
- **Seismic and Building Code Consultancy** – on code compliance and other aspects of structural design.

ASSESSMENT center

The ICC Assessment Center (formerly known as ICC Certification & Testing) provides nationally recognized credentials that demonstrate a confirmed commitment to protect public health, safety, and welfare. Raise the professionalism of your department and further your career by pursuing an ICC Certification.

ICC Certifications offer:

- Nationwide recognition
- Increased earning potential
- Career advancement
- Superior knowledge
- Validation of your expertise
- Personal and professional satisfaction

Exams are developed and maintained to the highest standards, which includes continuous peer review by national committees of experienced, practicing professionals. ICC is continually evolving exam offerings, testing options, and technology to ensure that all building and fire safety officials have access to the tools and resources needed to advance in today's fast-paced and rapidly-changing world.

Enhancing Exam Options

In July 2018, the Assessment Center will enhance and streamline our exam options by offering only computer-based testing (CBT) at a test site and PRONTO. We will no longer offer paper/pencil exams.

Proctored Remote Online Testing Option (PRONTO)

Taking your next ICC certification exam is more convenient, more comfortable and more efficient than ever before with PRONTO.

PRONTO provides a convenient testing experience that is accessible 24 hours a day, 7 days a week, 365 days a year. Required hardware/software is minimal – you will need a webcam and microphone, as well as a reasonably recent operating system.

Whether testing in your office or in the comfort of your home, your ICC exam will continue to maintain its credibility while offering more convenience, allowing you to focus on achieving your professional goals. The Assessment Center continues to add exams to the PRONTO exam catalog regularly.

UST/AST EXAMINATIONS

Petroleum storage tanks are regulated by federal and state laws. Many states require that tank workers be licensed or certified before being allowed to install, retrofit or decommission UST and/or AST systems or components. The ICC UST/AST Certification examinations can be used to complement state licensing programs. In some states, individuals are required to pass state-specific examinations.

Please visit the Exam Catalog at www.iccsafe.org/certification for required references for the following categories:

AST (Aboveground Storage Tank) Installation/Retrofitting	California (CA) Vapor Recovery System Testing and Repair	<u>Oregon (OR) Heating Oil Tank Supervisor</u>
UST (Underground Storage Tank) Cathodic Protection	CA Vapor Recovery System Repair	Rhode Island (RI) Class A UST System Operator

Ordering Information

Member discount and billing: Member discount prices are offered to current ICC members only. All members must use their membership number on each order to receive the discount pricing. Orders must be prepaid or charged to a credit card. All orders are to be paid in U.S. funds. Returned checks are subject to a \$25 service charge.

Shipping and Handling: Orders are shipped postage paid via FedEx or USPS unless otherwise specified. A complete address must be given for each order. Please refer to the order form for shipping charges.

International orders: For faster service, please pay by credit card. All international orders must be prepaid in U.S. funds. Please allow 6 to 8 weeks for first-class mail service. Express delivery and wire transfers are available; please call 1-800-786-4452 for pricing information. *Proof of I.D. may be required.*

Return and Refund Policy

Products may be returned in new, resalable condition within 30 days. Claims for shortages or damage must be made within 5 days of receipt of merchandise. All returns must include an ICC Return Authorization number. Call 1-888-422-7233, x33801 to receive your Return Authorization number. A copy of a paid invoice, a canceled check for the amount of purchase, or other proof of purchase must accompany the shipment of all returns. Unauthorized returns will be delayed in processing and may not be accepted for credit and/or may get returned to the customer.

All returns are subject to a restocking fee of 20 percent of the original selling price. No refund will be issued on overpayments less than \$5.

Returned merchandise must be shipped prepaid to the ICC Distribution Center, 11711 W. 85th St, Lenexa, KS 66214. It is strongly recommended that returned merchandise be shipped through UPS or FedEx to ensure prompt and efficient delivery because materials shipped at book rate are not traceable through the USPS.

No refunds are made for software, audio or video products. Defective software, audio or video items may be exchanged only for the same titles or editions as the defective item.

If you have any questions on these policies, please call 1-800-786-4452 and ask for a customer service representative.

International Orders/ Return Policy

For faster service, please pay by credit card. All international orders must be prepaid in U.S. funds. Please allow six to eight weeks for first class mail service. Express delivery and wire transfers are available; please call 001-708-799-2300, x33801, for pricing information.

Products can be returned in new, resalable condition within 30 days. Call 001-708-799-2300, x33801, for details.

All prices subject to change without notice.
All items subject to availability.
