Introduction

Internationally, code officials recognize the need for a modern, up-to-date property maintenance code governing the maintenance of existing buildings. The *International Property Maintenance Code*, in this 2015 edition, is designed to meet this need through model code regulations that contain clear and specific property maintenance requirements with required property improvement provisions.

The *International Property Maintenance Code* requirements provide many benefits, among which is the model code development process that offers an international forum for code officials and other interested parties to discuss performance and prescriptive code requirements. This forum provides an excellent arena to debate proposed revisions. This model code also encourages international consistency in the application of provisions.

Development

The first edition of the *International Property Maintenance Code* (1998) was the culmination of an effort initiated in 1996 by a code development committee appointed by ICC and consisting of representatives of the three statutory members of the International Code Council at that time, including: Building Officials and Code Administrators International, Inc. (BOCA), International Conference of Building Officials (ICBO) and Southern Building Code Congress International (SBCCI). The committee drafted a comprehensive set of regulations for existing buildings that was consistent with the existing model property maintenance codes at the time. This 2015 edition presents the code as originally issued, with changes reflected through the previous 2012 edition and further changes developed through the ICC Code Development Process through 2013. A new edition of the code is promulgated every 3 years.

This code is founded on principles intended to establish provisions consistent with the scope of a property maintenance code that adequately protects public health, safety and welfare; provisions that do not unnecessarily increase construction costs; provisions that do not restrict the use of new materials, products or methods of construction; and provisions that do not give preferential treatment to particular types or classes of materials, products or methods of construction.

Adoption

The International Code Council maintains a copyright in all of its codes and standards. Maintaining copyright allows ICC to fund its mission through sales of books, in both print and electronic formats. The *International Property Maintenance Code* is designed for adoption and use by jurisdictions that recognize and acknowledge the ICC’s copyright in the code, and further acknowledge the substantial shared value of the public/private partnership for code development between jurisdictions and the ICC.

The ICC also recognizes the need for jurisdictions to make laws available to the public. All ICC codes and ICC standards, along with the laws of many jurisdictions, are available for free in a non-downloadable form on the ICC’s website. Jurisdictions should contact the ICC at adoptions@iccsafe.org to learn how to adopt and distribute laws based on the *International Property Maintenance Code* in a manner that provides necessary access, while maintaining the ICC’s copyright.
Maintenance

The *International Property Maintenance Code* is kept up to date through the review of proposed changes submitted by code enforcing officials, industry representatives, design professionals and other interested parties. Proposed changes are carefully considered through an open code development process in which all interested and affected parties may participate.

The contents of this work are subject to change through both the code development cycles and the governmental body that enacts the code into law. For more information regarding the code development process, contact the Codes and Standards Development Department of the International Code Council.

While the development procedure of the *International Property Maintenance Code* ensures the highest degree of care, the ICC, its members and those participating in the development of this code do not accept any liability resulting from compliance or noncompliance with the provisions because the ICC does not have the power or authority to police or enforce compliance with the contents of this code. Only the governmental body that enacts the code into law has such authority.

**Code Development Committee Responsibilities**
**(Letter Designations in Front of Section Numbers)**

In each code development cycle, proposed changes to this code are considered at the Committee Action Hearings by the International Property Maintenance/Zoning Code Development Committee, whose action constitutes a recommendation to the voting membership for final action on the proposed changes. Proposed changes to a code section having a number beginning with a letter in brackets are considered by a different code development committee. For example, proposed changes to code sections that have the letter [F] in front of them (e.g., [F] 704.1) are considered by the International Fire Code Development Committee at the Committee Action Hearings.

The content of sections in this code that begin with a letter designation is maintained by another code development committee in accordance with the following:

[A] = Administrative Code Development Committee;

[F] = International Fire Code Development Committee;

[P] = International Plumbing Code Development Committee;

[BE] = IBC – Means of Egress Code Development Committee; and

For the development of the 2018 edition of the I-Codes, there will be three groups of code development committees and they will meet in separate years. Note that these are tentative groupings.
Proposed changes to the ICC Performance Code will be heard by the Code Development Committee noted in brackets [ ] in the text of the code.

Code change proposals submitted for code sections that have a letter designation in front of them will be heard by the respective committee responsible for such code sections. Because different committees hold code development hearings in different years, it is possible that some proposals for this code will be heard by committees in both the 2015 (Group A) and the 2016 (Group B) code development cycles.

For instance, every section of Chapter 1 of this code is designated as the responsibility of the Administrative Code Development Committee, and that committee is part of the Group B portion of the hearings. This committee will hold its code development hearings in 2016 to consider all code change proposals for Chapter 1 of this code and proposals for Chapter 1 of all I-Codes except the International Energy Conservation Code, International Residential Code and ICC Performance Code. Therefore, any proposals received for Chapter 1 of this code will be assigned to the Administrative Code Development Committee for consideration in 2016.

It is very important that anyone submitting code change proposals understand which code development committee is responsible for the section of the code that is the subject of the code change proposal. For further information on the code development committee responsibilities, please visit the ICC website at www.iccsafe.org/scoping.

### Marginal Markings

Solid vertical lines in the margins within the body of the code indicate a technical change from the requirements of the 2012 edition. Deletion indicators in the form of an arrow (>) are provided in the margin where an entire section, paragraph, exception or table has been deleted or an item in a list of items or a table has been deleted.

A single asterisk (*) placed in the margin indicates that text or a table has been relocated within the code. A double asterisk (**) placed in the margin indicates that the text or table immediately
following it has been relocated there from elsewhere in the code. The following table indicates such

<table>
<thead>
<tr>
<th>2015 LOCATION</th>
<th>2012 LOCATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>None</td>
<td>None</td>
</tr>
</tbody>
</table>

**Italicized Terms**

Selected terms set forth in Chapter 2, Definitions, are italicized where they appear in code text. Such terms are not italicized where the definition set forth in Chapter 2 does not impart the intended meaning in the use of the term. The terms selected have definitions that the user should read carefully to facilitate better understanding of the code.
# TABLE OF CONTENTS

## CHAPTER 1  SCOPE AND ADMINISTRATION . . . . 1

### PART 1—SCOPE AND APPLICATION . . . . . . . . . . . . 1

*Section*

101 General ........................................... 1
102 Applicability ....................................... 1

### PART 2—ADMINISTRATION AND ENFORCEMENT ........................................ 2

*Section*

103 Department of Property Maintenance Inspection .................................. 2
104 Duties and Powers of the Code Official ............................................. 2
105 Approval ............................................. 2
106 Violations ............................................. 3
107 Notices and Orders ..................................... 3
108 Unsafe Structures and Equipment .................................................. 4
109 Emergency Measures ............................................ 5
110 Demolition ............................................. 6
111 Means of Appeal ........................................ 6
112 Stop Work Order ......................................... 7

## CHAPTER 2  DEFINITIONS ......................... 9

*Section*

201 General ............................................. 9
202 General Definitions ..................................... 9

## CHAPTER 3  GENERAL REQUIREMENTS ............. 11

*Section*

301 General ............................................. 11
302 Exterior Property Areas .................................. 11
303 Swimming Pools, Spas and Hot Tubs ........................................ 11
304 Exterior Structure ...................................... 12
305 Interior Structure ....................................... 13
306 Component Serviceability .................................. 14
307 Handrails and Guardrails .................................. 15
308 Rubbish and Garbage ..................................... 15
309 Pest Elimination ........................................ 15

## CHAPTER 4  LIGHT, VENTILATION AND OCCUPANCY LIMITATIONS ........... 17

*Section*

401 General ............................................. 17
402 Light .................................................. 17
403 Ventilation ............................................. 17
404 Occupancy Limitations ...................................... 17

## CHAPTER 5  PLUMBING FACILITIES AND FIXTURE REQUIREMENTS ........... 19

*Section*

501 General ............................................. 19
502 Required Facilities ....................................... 19
503 Toilet Rooms ........................................... 19
504 Plumbing Systems and Fixtures ........................................ 19
505 Water System ........................................... 19
506 Sanitary Drainage System ..................................... 20
507 Storm Drainage .......................................... 20

## CHAPTER 6  MECHANICAL AND ELECTRICAL REQUIREMENTS .............. 21

*Section*

601 General ............................................. 21
602 Heating Facilities ....................................... 21
603 Mechanical Equipment ...................................... 21
604 Electrical Facilities ....................................... 21
605 Electrical Equipment ....................................... 22
606 Elevators, Escalators and Dumbwaiters .................................. 22
607 Duct Systems ............................................ 23

## CHAPTER 7  FIRE SAFETY REQUIREMENTS .... 25

*Section*

701 General ............................................. 25
702 Means of Egress ......................................... 25
703 Fire-resistance Ratings ...................................... 25
704 Fire Protection Systems ...................................... 25

## CHAPTER 8  REFERENCED STANDARDS ........... 27

## APPENDIX A  BOARDING STANDARD ............ 29

*Section*

A101 General ............................................. 29
A102 Materials ............................................. 29
A103 Installation ............................................. 29
A104 Referenced Standard ..................................... 29

## INDEX ............................................. 31
