PREFACE

The principal purpose of the Commentary is to provide a basic volume of knowledge and facts relating to existing structures as it pertains to the regulations regarding property maintenance set forth in the 2021 *International Property Maintenance Code*[®]. The person who is serious about effectively regulating property maintenance will find the Commentary to be a reliable data source and reference to almost all aspects of property maintenance.

As a follow-up to the *International Property Maintenance Code*, we offer a companion document, the 2021 *IPMC*[®] *Code and Commentary*. The basic appeal of the Commentary is thus: it provides, in a small package and at reasonable cost, thorough coverage of many issues likely to be dealt with when using the *International Property Maintenance Code*—then supplements that coverage with historical and technical background. Reference lists, information sources and bibliographies are also included.

Throughout all of this, strenuous effort has been made to keep the vast quantity of material accessible and its method of presentation useful. With a comprehensive yet concise summary of each section, the Commentary provides a convenient reference for property maintenance regulations. In the chapters that follow, discussions focus on the full meaning and implications of the code text. Guidelines suggest the most effective method of application, and the consequences of not adhering to the code text. Illustrations are provided to aid understanding; they do not necessarily illustrate the only methods of achieving code compliance.

The format of the Commentary includes the full text of each section, table and figure in the code, followed immediately by the commentary applicable to that text. As stated in the preface of the 2021 *International Property Maintenance Code*, the content of sections in the code that begin with a letter designation (i.e., [P]502.1) are maintained by another code development committee. Each section's narrative includes a statement of its objective and intent, and usually includes a discussion about why the requirement commands the conditions set forth. Code text and commentary text are easily distinguished from each other. All code text is shown as it appears in the *International Property Maintenance Code*, and all commentary is indented below the code text and begins with the symbol ❖.

Readers should note that the Commentary is to be used in conjunction with the *International Property Maintenance Code* and not as a substitute for the code. The Commentary is advisory only; the code official alone possesses the authority and responsibility for interpreting the code.

Comments and recommendations are encouraged, for through your input we can improve future editions. Please direct your comments to the Codes and Standards Development Department at the Country Club Hills, IL, Central Regional Office.
