# TABLE OF CONTENTS

## CHAPTER 1  SCOPE AND ADMINISTRATION

### PART 1—SCOPE AND APPLICATION

Section
- 101 General ................................................. 1
- 102 Applicability ......................................... 1

### PART 2—ADMINISTRATION AND ENFORCEMENT

- 103 Department of Building Safety ...................... 1
- 104 Duties and Powers of Code Official .......... 2
- 105 Permits .................................................. 3
- 106 Construction Documents ......................... 5
- 107 Temporary Structures and Uses .............. 6
- 108 Fees ..................................................... 6
- 109 Inspections ............................................ 7
- 110 Certificate of Occupancy ......................... 7
- 111 Service Utilities .................................. 8
- 112 Board of Appeals ................................ 8
- 113 Violations ............................................. 8
- 114 Stop Work Order .................................. 9
- 115 Unsafe Buildings and Equipment .......... 9
- 116 Emergency Measures ............................ 9
- 117 Demolition ........................................... 10

## CHAPTER 2  DEFINITIONS

### Section
- 201 General ................................................. 11
- 202 General Definitions .............................. 11

## CHAPTER 3  COMPLIANCE METHODS

### Section
- 301 Compliance Methods ............................ 13

## CHAPTER 4  PRESCRIPTIVE COMPLIANCE METHOD

### Section
- 401 General ................................................. 15
- 402 Additions .............................................. 15
- 403 Alterations ........................................... 16
- 404 Repairs ................................................ 17
- 405 Fire Escapes ........................................... 18
- 406 Glass Replacement ................................ 18
- 407 Change of Occupancy ............................ 18
- 408 Historic Buildings ............................... 19
- 409 Moved Structures ................................ 19
- 410 Accessibility for Existing Buildings .... 19

## CHAPTER 5  CLASSIFICATION OF WORK

### Section
- 501 General ................................................. 23
- 502 Repairs ................................................ 23
- 503 Alteration—Level 1 .................................. 23
- 504 Alteration—Level 2 .................................. 23
- 505 Alteration—Level 3 .................................. 23
- 506 Change of Occupancy ............................ 23
- 507 Additions .............................................. 23
- 508 Historic Buildings ............................... 23
- 509 Relocated Buildings .............................. 23

## CHAPTER 6  REPAIRS

### Section
- 601 General ................................................. 25
- 602 Building Elements and Materials ........ 25
- 603 Fire Protection ..................................... 25
- 604 Means of Egress ................................... 25
- 605 Accessibility ........................................ 25
- 606 Structural ............................................ 25
- 607 Electrical ............................................. 26
- 608 Mechanical .......................................... 26
- 609 Plumbing .............................................. 27

## CHAPTER 7  ALTERATIONS—LEVEL 1

### Section
- 701 General ................................................. 29
- 702 Building Elements and Materials ........ 29
- 703 Fire Protection ..................................... 29
- 704 Means of Egress ................................... 29
- 705 Accessibility ........................................ 29
- 706 Structural ............................................ 30
- 707 Energy Conservation ............................ 31
TABLE OF CONTENTS

CHAPTER 8 ALTERATIONS—LEVEL 2 ........ 33
Section
801 General ........................................ 33
802 Special Use and Occupancy ................. 33
803 Building Elements and Materials .......... 33
804 Fire Protection .............................. 35
805 Means of Egress .............................. 37
806 Accessibility ................................. 41
807 Structural .................................... 41
808 Electrical .................................... 42
809 Mechanical ................................. 42
810 Plumbing ..................................... 42
811 Energy Conservation ....................... 42

CHAPTER 9 ALTERATIONS—LEVEL 3 ........ 43
Section
901 General ........................................ 43
902 Special Use and Occupancy ................. 43
903 Building Elements and Materials .......... 43
904 Fire Protection .............................. 44
905 Means of Egress .............................. 44
906 Accessibility ................................. 44
907 Structural .................................... 44
908 Energy Conservation ....................... 45

CHAPTER 10 CHANGE OF OCCUPANCY ......... 47
Section
1001 General ...................................... 47
1002 Special Use and Occupancy ................. 47
1003 Building Elements and Materials .......... 47
1004 Fire Protection .............................. 47
1005 Means of Egress .............................. 47
1006 Accessibility ................................. 47
1007 Structural .................................... 47
1008 Electrical .................................... 48
1009 Mechanical ................................. 49
1010 Plumbing ..................................... 49
1011 Other Requirements .......................... 49
1012 Change of Occupancy Classification ....... 49

CHAPTER 11 ADDITIONS ....................... 53
Section
1101 General ...................................... 53
1102 Heights and Areas ........................... 53
1103 Structural .................................. 53
1104 Smoke Alarms in Occupancy
   Groups R and I-1 .............................. 54
1105 Accessibility ............................... 54
1106 Energy Conservation ....................... 54

CHAPTER 12 HISTORIC BUILDINGS .......... 55
Section
1201 General ...................................... 55
1202 Repairs ..................................... 55
1203 Fire Safety ................................... 55
1204 Alterations ................................. 56
1205 Change of Occupancy ....................... 56
1206 Structural .................................. 57

CHAPTER 13 RELOCATED OR MOVED
   BUILDINGS ............................. 59
Section
1301 General ...................................... 59
1302 Requirements ............................... 59

CHAPTER 14 PERFORMANCE COMPLIANCE
   METHODS .................................. 61
Section
1401 General ...................................... 61

CHAPTER 15 CONSTRUCTION
   SAFEGUARDS ............................ 73
Section
1501 General ...................................... 73
1502 Protection of Adjoining Property ........... 74
1503 Temporary Use of Streets, Alleys and Public
   Property ..................................... 74
1504 Fire Extinguishers ......................... 74
1505 Means of Egress ............................. 75
1506 Standpipe Systems .......................... 75
1507 Automatic Sprinkler System ............... 75
1508 Accessibility ............................... 75
1509 Water Supply for Fire Protection ......... 75

CHAPTER 16 REFERENCED STANDARDS ....... 77
APPENDIX A GUIDELINES FOR THE SEISMIC
   RETROFIT OF EXISTING
   BUILDINGS .............................. 79

**INDEX**                                      289
Preface

Introduction

Internationally, code officials recognize the need for a modern, up-to-date code addressing repair, alteration, addition or change of occupancy in existing buildings. The International Existing Building Code®, in this 2012 edition, is designed to meet this need through model code regulations that safeguard the public health and safety in all communities, large and small.

The International Existing Building Code provisions provide many benefits, including the model code development process, which offers an international forum for building professionals to discuss performance and prescriptive code requirements. This forum provides an excellent arena to debate proposed revisions. This model code also encourages international consistency in the application of provisions.

Development

The first edition of the International Existing Building Code (2003) was the culmination of an effort initiated in 2000 by a development committee appointed by the ICC and consisting of representatives of the three statutory members of the International Code Council at that time, including: Building Officials and Code Administrators International, Inc. (BOCA), International Conference of Building Officials (ICBO) and Southern Building Code Congress International (SBCCI). The intent was to draft a comprehensive set of regulations for existing buildings consistent with and inclusive of the scope of the existing model codes. Technical content of the latest model codes promulgated by BOCA, ICBO and SBCCI as well as other rehabilitation codes was utilized as the basis for the development, followed by a public forum in 2001 and the publication of the 2001 Final Draft. This 2012 edition presents the code as originally issued in 2003 with the changes reflected in the 2006 edition, 2009 edition and with further changes approved through the ICC code development process through 2010. A new edition such as this is promulgated every three years.

This code is founded on principles intended to encourage the use and reuse of existing buildings that adequately protect public health, safety and welfare; provisions that do not unnecessarily increase construction costs; provisions that do not restrict the use of new materials, products or methods of construction; and provisions that do not give preferential treatment to particular types or classes of materials, products or methods of construction.

Adoption

The International Existing Building Code is available for adoption and use by jurisdictions internationally. Its use within a governmental jurisdiction is intended to be accomplished through adoption by reference in accordance with proceedings establishing the jurisdiction’s laws. At the time of adoption, jurisdictions should insert the appropriate information in provisions requiring specific local information, such as the name of the adopting jurisdiction. These locations are shown in bracketed words in small capital letters in the code and in the sample ordinance. The sample adoption ordinance on page xi addresses several key elements of a code adoption ordinance, including the information required for insertion into the code text.
Maintenance

The *International Existing Building Code* is kept up to date through the review of proposed changes submitted by code enforcement officials, industry representatives, design professionals, and other interested parties. Proposed changes are carefully considered through an open code development process in which all interested and affected parties may participate.

The contents of this work are subject to change both through the code development cycles and the governmental body that enacts the code into law. For more information regarding the code development process, contact the Codes and Standards Development Department of the International Code Council.

While the development procedure of the *International Existing Building Code* assures the highest degree of care, ICC, its members, and those participating in the development of this code do not accept any liability resulting from compliance or noncompliance with these provisions, because ICC does not have the power or authority to police or enforce compliance with the contents of this code. Only the governmental body that enacts the code into law has such authority.

**Code Development Committee Responsibilities**

*(Letter Designations in Front of Section Numbers)*

In each code development cycle, proposed changes to this code are considered at the Code Development Hearings by the International Existing Building Code Development Committee. Proposed changes to a code section having a number beginning with a letter in brackets are considered by a different code development committee. For example, proposed changes to code sections that are preceded by the letter [F] (e.g., [F] 1404.2), are considered by the International Fire Code Development Committee at the Code Development Hearings.

The content of sections in this code that begin with a letter designation is maintained by another code development committee in accordance with the following:

[A] = Administrative Code Development Committee;

[B] = International Building Code Development Committee (IBC—Fire Safety, General, Means of Egress or Structural);

[F] = International Fire Code Development Committee;

[P] = International Plumbing Code Development Committee;

[FG] = International Fuel Gas Code Development Committee;

[EC] = International Energy Conservation Code Development Committee; and

[M] = International Mechanical Code Development Committee.
