ACKNOWLEDGMENTS

With gratitude, the Department of State acknowledges the contributions of the following individuals in the creation of the 2020 Codes of New York State:

STATE FIRE PREVENTION AND BUILDING CODE COUNCIL

Rossana Rosado Chair – Secretary of State, New York State Department of State
Designee - Matthew W. Tebo, Esq.
Francis J. Nerney, Jr. State Fire Administrator, Office of Fire Prevention and Control
Designee - Paul Martin
RuthAnne Visnauskas Commissioner, Division of Housing and Community Renewal
Designee - Michael Weber
Designee - Joseph Palozzola
Robert Reardon Commissioner, New York State Department of Labor
Designee - Vincent R. Rapacciuolo
Honorable Bill de Blasio Mayor, City of New York
Designee - Keith Wen, NYC Department of Buildings
Honorable Michael R. Sabatino, Jr. Councilmember, City of Yonkers
Claudia K. Braymer, Esq. County Board of Supervisors, Warren County
David A. Seeley Supervisor, Town of Irondequoit
Timothy DeRuyscher, P.E. FSFPE Professional Engineer Representative
Patrick Dolan Trade Union Representative, Steamfitters Union, 638
Shawn Hamlin, R.A. Registered Architect Representative, Hamlin Design Group
Robert Hughes Code Enforcement Representative, Village of Pleasantville
Dominic Marinelli Persons with Disabilities Representative, United Spinal Association
Joseph J. Toomey Fire Service Representative, Albany Fire Department
William W. Tuyn Builders Representative, Forbes Capretto Homes

Rossana Rosado Secretary of State
Brendan Hughes Executive Deputy Secretary of State
James W. Leary, Esq. Assistant Executive Deputy Secretary of State
Mark P. Pattison Deputy Secretary of State for Local Government
Matthew W. Tebo, Esq. Deputy Secretary of State for Agency Transformation and External Affairs
John R. Addario, P.E. Director of the Division of Building Standards and Codes
Brian Tollisen, P.E. Deputy Director of the Division of Building Standards and Codes
Gerard A. Hathaway, R.A. Assistant Director for Code Development
Kevin Duerr-Clark, P.E. Assistant Director for Technical Support
Francis “Nick” McAndrew, P.E. Assistant Director for Educational Services
Joseph Hill, R.A. Professional Engineer
Jeffrey M. Hinderliter, P.E. Senior Architect
Emma Gonzalez-Laders, R.A., LEED AP Code Compliance Specialist I
Daniel Carroll Program Aide
Janet Miller Supervising Attorney
Joseph P. Ball, Esq. Senior Attorney
Panagiota K. Hyde, Esq.

IN MEMORIAM

Honorable Judith Kennedy Mayor, City of Newburgh, Code Council Member (2013–2018)
Brendan Fitzgerald Executive Deputy Secretary of State (2016–2018)
PREFACE

Introduction

The Fuel Gas Code of New York State (FGCNYS) establishes minimum requirements for fuel gas systems and gas-fired appliances using prescriptive and performance-related provisions. It is founded on broad-based principles that make possible the use of new materials and new fuel gas system and appliance designs. This 2020 edition was developed as a derivative work of the 2018 edition of the International Fuel Gas Code® (IFGC®) published by the International Code Council® (ICC®).

Intention

This code is founded on principles intended to establish provisions consistent with the scope of a fuel gas code that adequately protects public health, safety and welfare; provisions that do not unnecessarily increase construction costs; provisions that do not restrict the use of new materials, products or methods of construction; and provisions that do not give preferential treatment to particular types or classes of materials, products or methods of construction.

Letter Designations in Front of Section Numbers

The bracketed letter designations for the party responsible for portions of this code are as follows:

ICC Code Development Committee

[A] = Administrative Code Development Committee;

[BF] = IBC—Fire Safety Code Development Committee;

[BG] = IBC—General Code Development Committee;

[BS] = IBC—Structural Code Development Committee;

[E] = International Energy Conservation Code Development Committee;

[F] = International Fire Code Development Committee;

[M] = International Mechanical Code Development Committee; and

[P] = International Plumbing Code Development Committee

New York State Code Development

[NY] = New York State Department of State

The International Fuel Gas Code segregates section numbers into two categories—“code” and “standard.” These are designated by the acronyms “IFGC” and “IFGS.” The 2020 Fuel Gas Code of New York State does not retain these designations.
Marginal Markings

Solid vertical lines in the margins within the body of the code indicate a technical change from the requirements of the 2015 edition. Deletion indicators in the form of an arrow (▼) are provided in the margin where an entire section, paragraph, exception or table has been deleted or an item in a list of items or a table has been deleted.

Italicized Terms

Words and terms defined in Chapter 2, Definitions, are italicized where they appear in code text and the Chapter 2 definition applies. Where such words and terms are not italicized, common-use definitions apply. The words and terms selected have code-specific definitions that the user should read carefully to facilitate better understanding of the code.
The Fuel Gas Code of New York State (FGCNYS) is a code that regulates the design and installation of fuel gas distribution piping and systems, appliances, appliance venting systems, combustion air provisions, gaseous hydrogen systems and motor vehicle gaseous-fuel-dispensing stations. The definition of fuel gas includes natural, liquefied petroleum and manufactured gases and mixtures of these gases.

The purpose of the code is to establish the minimum acceptable level of safety and to protect life and property from the potential dangers associated with the storage, distribution and usage of fuel gases and the byproducts of combustion of such fuels. The code also protects the personnel that install, maintain, service and replace the systems and appliances addressed by this code.

With the exception of Section 401.1.1, the FGCNYS does not address utility-owned piping and equipment (i.e., anything upstream of the point of delivery). See the definition of “Point of delivery” and Section 501.8 for other code coverage exemptions.

The FGCNYS is primarily a specification-oriented (prescriptive) code with some performance-oriented text. For example, Section 503.3.1 is a performance statement, but Chapter 5 contains prescriptive requirements that will cause Section 503.3.1 to be satisfied.

The FGCNYS applies to all occupancies including one- and two-family dwellings and townhouses. The RCNYS is referenced for coverage of one- and two-family dwellings and townhouses; however, in effect, the FGCNYS provisions are still applicable because the fuel gas chapter in the RCNYS (Chapter 24) is composed entirely of text extracted from the FGCNYS. Therefore, whether using the FGCNYS or the RCNYS, the fuel gas provisions will be identical. The FGCNYS does not apply to piping systems that operate at pressures in excess of 125 psig for natural gas and 20 psig for LP-gas (note exception in Section 402.7).

The general Section 104.3 and the specific Sections 304.8, 402.3, 503.5.5 and 503.6.10 allow combustion air provisions, pipe sizing and chimney and vent sizing to be performed by approved engineering methods as alternatives to the prescriptive methods in the code.

Arrangement and Format of the 2020 FGCNYS

The format of the FGCNYS allows each chapter to be devoted to a particular subject, with the exception of Chapter 3, which contains general subject matters that are not extensive enough to warrant their own independent chapter.

Chapter 1 Scope and Administration. Chapter 1 establishes the limits of applicability of the code and describes how the code is to be applied and enforced. A fuel gas code, like any other code, is intended to be adopted as a legally enforceable document, and it cannot be effective without adequate provisions for its administration and enforcement.

Chapter 2 Definitions. Chapter 2 is the repository of the definitions of terms used in the body of the code. Codes are technical documents and every word, term and punctuation mark can impact the meaning of the code text and the intended results. The code often uses terms that have a unique meaning in the code and the code meaning can differ substantially from the ordinarily understood meaning of the term as used outside of the code.

The terms defined in Chapter 2 are deemed to be of prime importance in establishing the meaning and intent of the code text that uses the terms. The user of the code should be familiar with and consult this chapter because the definitions are essential to the correct interpretation of the code and because the user may not be aware that a term is defined.

Chapter 3 General Regulations. Chapter 3 contains broadly applicable requirements related to appliance location and installation, appliance and systems access, protection of structural elements and clearances to combustibles, among others. This chapter also covers combustion air provisions for gas-fired appliances.
Chapter 4 Gas Piping Installations. Chapter 4 covers the allowable materials for gas piping systems and the sizing and installation of such systems. It also covers pressure regulators, appliance connections and overpressure protection devices. Gas piping systems are sized to supply the maximum demand while maintaining the supply pressure necessary for safe operation of the appliances served.

Chapter 5 Chimneys and Vents. Chapter 5 regulates the design, construction, installation, maintenance, repair and approval of chimneys, vents, venting systems and their connections to gas-fired appliances. Properly designed chimneys, vents and venting systems are necessary to conduct to the outdoors the flue gases produced by the combustion of fuels in appliances. The provisions of this chapter are intended to minimize the hazards associated with high temperatures and potentially toxic and corrosive combustion gases. This chapter addresses all of the factory-built and site-built chimneys, vents and venting systems used to vent all types and categories of appliances. It also addresses direct-vent appliances, integral vent appliances, side-wall mechanically vented appliances and exhaust hoods that convey the combustion byproducts from cooking and other process appliances.

Chapter 6 Specific Appliances. Chapter 6 addresses specific appliances that the code intends to regulate. Each main section applies to a unique type of gas-fired appliance and specifies the product standards to which the appliance must be listed. The general requirements found in the previous Chapters 1 through 5 also apply and the sections in Chapter 6 add the special requirements that are specific to each type of appliance.

Chapter 7 Gaseous Hydrogen Systems. Chapter 7 is specific to gaseous hydrogen generation, storage, distribution and utilization systems, appliances and equipment. Note that hydrogen is not within the definition of “Fuel gas,” but it is, nonetheless, commonly used as a fuel for fuel-cell power generation and fuel-cell powered motor vehicles. The scope of Chapter 7 is not limited to any particular use of hydrogen (see Sections 633 and 635). Hydrogen systems have unique potential hazards because of the specific gravity of the gas, its chemical effect on materials and the fact that it is not odorized.

Chapter 8 Referenced Standards. Chapter 8 lists all of the product and installation standards and codes that are referenced throughout Chapters 1 through 7. The standards are part of the code to the extent of the reference to the standard. Chapter 8 provides the full title and edition year of the standards and codes in addition to the address of the promulgators and the section numbers in which the standards and codes are referenced.

Appendix A Sizing and Capacities of Gas Piping. This appendix is informative and not part of the code. It provides design guidance, useful facts and data and multiple examples of how to apply the sizing tables and sizing methodologies of Chapter 4.

Appendix B Sizing of Venting Systems Serving Appliances Equipped with Draft Hoods, Category I Appliances and Appliances Listed for Use with Type B Vents. This appendix is informative and not part of the code. It contains multiple examples of how to apply the vent and chimney tables and methodologies of Chapter 5.

Appendix C Exit Terminals of Mechanical Draft and Direct-vent Venting Systems. This appendix is informative and not part of the code. It consists of a figure and notes that visually depict code requirements from Chapter 5 for vent terminals with respect to the openings found in building exterior walls.

Appendix D Recommended Procedure for Safety Inspection of an Existing Appliance Installation. This appendix is informative and not part of the code. It provides recommended procedures for testing and inspecting an appliance installation to determine if the installation is operating safely and if the appliance is in a safe condition.
# TABLE OF CONTENTS

## CHAPTER 1  SCOPE AND ADMINISTRATION  
1. Title, Scope and Purpose  
2. Applicability  
3. Administration and Enforcement  
4. Materials, Equipment and Methods of Construction  
5. Building Permits, Construction Inspections, Stop Work Orders, and Certificates of Occupancy  
6. Submittal Documents  
7. Service Utilities  

## CHAPTER 2  DEFINITIONS  
1. General  
2. General Definitions  

## CHAPTER 3  GENERAL REGULATIONS  
1. General  
2. Structural Safety  
3. Appliance Location  
4. Combustion, Ventilation and Dilution Air  
5. Installation  
6. Access and Service Space  
7. Condensate Disposal  
8. Clearance Reduction  
9. Electrical  
10. Electrical Bonding  

## CHAPTER 4  GAS PIPING INSTALLATIONS  
1. General  
2. Pipe Sizing  
3. Piping Materials  
4. Piping System Installation  
5. Piping Bends and Changes in Direction  
6. Inspection, Testing and Purging  
7. Piping Support  
8. Drips and Sloped Piping  
9. Shutoff Valves  
10. Flow Controls  
11. Appliance and Manufactured Home Connections  
12. Liquefied Petroleum Gas Motor Vehicle Fuel-dispensing Facilities  
13. Compressed Natural Gas Motor Vehicle Fuel-dispensing Facilities  
14. Supplemental and Standby Gas Supply  
15. Piping Support Intervals  
16. Overpressure Protection Devices  

## CHAPTER 5  CHIMNEYS AND VENTS  
1. General  
2. Vents  
3. Venting of Appliances  
4. Sizing of Category I Appliance Venting Systems  
5. Direct-vent, Integral Vent, Mechanical Vent and Ventilation/Exhaust Hood Venting  
6. Factory-built Chimneys  

## CHAPTER 6  SPECIFIC APPLIANCES  
1. General  
2. Decorative Appliances for Installation in Fireplaces  
3. Log Lighters  
4. Vented Gas Fireplaces (Decorative Appliances)  
5. Vented Gas Fireplace Heaters  
6. Incinerators and Crematories  
7. Commercial-industrial Incinerators  
8. Vented Wall Furnaces  
9. Floor Furnaces  
10. Duct Furnaces  
11. Nonrecirculating Direct-fired Industrial Air Heaters  
12. Recirculating Direct-fired Industrial Air Heaters  
13. Clothes Dryers  
14. Shutoff Valves  
15. Flow Controls  
16. Appliance and Manufactured Home Connections  
17. Liquefied Petroleum Gas Motor Vehicle Fuel-dispensing Facilities  
18. Compressed Natural Gas Motor Vehicle Fuel-dispensing Facilities  
19. Supplemental and Standby Gas Supply  
20. Piping Support Intervals  
21. Overpressure Protection Devices  
22. General  
23. Vents  
24. Venting of Appliances  
25. Sizing of Category I Appliance Venting Systems  
26. Direct-vent, Integral Vent, Mechanical Vent and Ventilation/Exhaust Hood Venting  
27. Factory-built Chimneys  
28. General  
29. Decorative Appliances for Installation in Fireplaces  
30. Log Lighters  
31. Vented Gas Fireplaces (Decorative Appliances)  
32. Vented Gas Fireplace Heaters  
33. Incinerators and Crematories  
34. Commercial-industrial Incinerators  
35. Vented Wall Furnaces  
36. Floor Furnaces  
37. Duct Furnaces  
38. Nonrecirculating Direct-fired Industrial Air Heaters  
39. Recirculating Direct-fired Industrial Air Heaters  
40. Clothes Dryers  
41. Shutoff Valves  
42. Flow Controls  
43. Appliance and Manufactured Home Connections  
44. Liquefied Petroleum Gas Motor Vehicle Fuel-dispensing Facilities  
45. Compressed Natural Gas Motor Vehicle Fuel-dispensing Facilities  
46. Supplemental and Standby Gas Supply  
47. Piping Support Intervals  
48. Overpressure Protection Devices  
49. General  
50. Vents  
51. Venting of Appliances  
52. Sizing of Category I Appliance Venting Systems  
53. Direct-vent, Integral Vent, Mechanical Vent and Ventilation/Exhaust Hood Venting  
54. Factory-built Chimneys  
55. General  
56. Decorative Appliances for Installation in Fireplaces  
57. Log Lighters  
58. Vented Gas Fireplaces (Decorative Appliances)  
59. Vented Gas Fireplace Heaters  
60. Incinerators and Crematories  
61. Commercial-industrial Incinerators  
62. Vented Wall Furnaces  
63. Floor Furnaces  
64. Duct Furnaces  
65. Nonrecirculating Direct-fired Industrial Air Heaters  
66. Recirculating Direct-fired Industrial Air Heaters  
67. Clothes Dryers
