# TABLE OF CONTENTS

**Study Session 1:**
- 2015 IFGC Chapter 1—Scope and Administration ............................................. 1
- Quiz .................................................................................................................. 15

**Study Session 2:**
- 2015 IFGC Sections 301 through 304—General Regulations I .......................... 21
- Quiz .................................................................................................................. 35

**Study Session 3:**
- 2015 IFGC Sections 305 through 310—General Regulations II ......................... 41
- Quiz .................................................................................................................. 55

**Study Session 4:**
- 2015 IFGC Sections 401 through 406—Gas Piping Installations I ...................... 61
- Quiz .................................................................................................................. 75

**Study Session 5:**
- 2015 IFGC Sections 407 through 416—Gas Piping Installations II ..................... 81
- Quiz .................................................................................................................. 95

**Study Session 6:**
- 2015 IFGC Sections 501 through 503.6.10—Chimneys and Vents I .................. 101
- Quiz .................................................................................................................. 117

**Study Session 7:**
- 2015 IFGC Sections 503.6.11 through 506—Chimneys and Vents II .................. 123
- Quiz .................................................................................................................. 137

**Study Session 8:**
- 2015 IFGC Sections 601 through 614—Specific Appliances I .......................... 143
- Quiz .................................................................................................................. 157

**Study Session 9:**
- 2015 IFGC Sections 615 through 636—Specific Appliances II ......................... 163
- Quiz .................................................................................................................. 178

**Study Session 10:**
- 2015 IFGC Chapter 7—Gaseous Hydrogen Systems ........................................ 185
- Quiz .................................................................................................................. 196

**Answer Keys** ................................................................................................ 203
This study companion provides practical learning assignments for independent study of the provisions of the 2015 *International Fuel Gas Code®* (IFGC®). The independent study format affords a method for the student to complete the program in an unregulated time period. Progressing through the workbook, the learner can measure his or her level of knowledge by using the exercises and quizzes provided for each study session.

The workbook is also valuable for instructor-led programs. In jurisdictional training sessions, community college classes, vocational training programs and other structured educational offerings, the study guide and the IFGC can be the basis for classroom instruction.

All study sessions begin with a general learning objective specific to the session, the specific code sections or chapter under consideration and a list of questions summarizing the key points of study. Each session addresses selected topics from the IFGC and includes code text, a commentary on the code provisions, illustrations representing the provisions under discussion and multiple choice questions that can be used to evaluate the student’s knowledge. Before beginning the quizzes, the student should thoroughly review the IFGC, focusing on the key points identified at the beginning of each study session.

The workbook is structured so that after every question the student has an opportunity to record his or her response and the corresponding code reference. The correct answers are found in the back of the workbook in the answer key.

Although this study companion is primarily focused on those subjects of specific interest to inspectors and contractors involved in fuel gas system installations, it is a valuable resource to any individuals who would like to learn more about the IFGC provisions. The information presented may be of importance to many building officials, plans examiners and combination inspectors.

This study companion was initially developed by Rudy Martinez, Mechanical Code Training Officer in the Department of Building and Safety for the City of Los Angeles. ICC staff provided assistance and updated the material to the 2012 edition. The 2015 *IFGC Study Companion* was updated by Terrell Stripling, Technical Staff member with ICC.

The information presented in this publication is believed to be accurate; however, it is provided for informational purposes only and is intended for use only as a guide. As there is a limited discussion of selected code provisions, the code itself should always be referenced for more complete information. In addition, the commentary set forth may not necessarily represent the views of any enforcing agency, as such agencies have the sole authority to render interpretations of the IFGC.

Questions or comments concerning this study companion are encouraged. Please direct your comments to ICC at studycompanion@icc safe.org.
About the International Code Council®

The International Code Council is a member-focused association. It is dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets choose the International Codes. ICC Evaluation Service (ICC-ES) is the industry leader in performing technical evaluations for code compliance fostering safe and sustainable design and construction.
