# PREFACE

## HISTORY

The State of Florida first mandated statewide building codes during the 1970s at the beginning of the modern construction boom. The first law required all municipalities and counties to adopt and enforce one of the four state-recognized model codes known as the “state minimum building codes.” During the early 1990s a series of natural disasters, together with the increasing complexity of building construction regulation in vastly changed markets, led to a comprehensive review of the state building code system. The study revealed that building code adoption and enforcement was inconsistent throughout the state and those local codes thought to be the strongest proved inadequate when tested by major hurricane events. The consequences of the building codes system failure were devastation to lives and economies and a statewide property insurance crisis. The response was a reform of the state building construction regulatory system that placed emphasis on uniformity and accountability.

The 1998 Florida Legislature amended Chapter 553, *Florida Statutes*, Building Construction Standards, to create a single state building code that is enforced by local governments. As of March 1, 2002, the *Florida Building Code*, which is developed and maintained by the Florida Building Commission, supersedes all local building codes. The *Florida Building Code* is updated every three years and may be amended in the interim in accordance with criteria set out in Section 553.73, *Florida Statutes*.

## SCOPE

The *Florida Building Code* is based on national model building codes and national consensus standards, in addition to Florida-specific provisions. The code incorporates all building construction-related regulations for public and private buildings in the State of Florida other than those specifically exempted by Section 553.73, *Florida Statutes*. It has been harmonized with the *Florida Fire Prevention Code*, which is developed and maintained by the Department of Financial Services, Office of the State Fire Marshal, to establish unified and consistent standards.

The model codes used for the *Florida Building Code*, 9th Edition (2026) include: the 2024 editions of the *International Building Code*®; the *International Plumbing Code*®; the *International Mechanical Code*®; the *International Fuel Gas Code*®; the *International Residential Code*®; the *International Existing Building Code*®; the *International Energy Conservation Code*®; the *National Electrical Code*, 2023 edition; or substantive criteria from ASHRAE Standard 90.1-2022. State and local codes adopted and incorporated into the code include the *Florida Building Code, Accessibility*, and special hurricane protection standards for the High-Velocity Hurricane Zone.

The code is composed of nine main volumes: the *Florida Building Code, Building*, which also includes state regulations for licensed facilities; the *Florida Building Code, Plumbing*; the *Florida Building Code, Mechanical*; the *Florida Building Code, Fuel Gas*; the *Florida Building Code, Existing Building*; the *Florida Building Code, Residential*; the *Florida Building Code, Energy Conservation*; the *Florida Building Code, Accessibility* and the *Florida Building Code, Test Protocols for High-Velocity Hurricane Zones*. Chapter 27 of the *Florida Building Code, Building*, adopts the *National Electrical Code*, NFPA 70, by reference.

Under certain strictly defined conditions, local governments may amend technical requirements to be more stringent than the code. All local technical amendments to the *Florida Building Code* must be adopted in accordance with the requirements of Section 553.73(4), *Florida Statutes*, and reported to the Florida Building Commission, then posted on [www.floridabuilding.org](http://www.floridabuilding.org) in legislative format for 30 days prior to being enforced. Local amendments to the *Florida Building Code* and the *Florida Fire Prevention Code* may be obtained from the Florida Building Commission website, or from the Florida Department of Business and Professional Regulation or the Florida Department of Financial Services, Office of the State Fire Marshal, respectively.

## ADOPTION AND MAINTENANCE

An updated edition of the *Florida Building Code* is adopted triennially by the Florida Building Commission. The code may also be amended between updates in order to incorporate the Florida Building Commission’s interpretations into the code, address conflicts, and update standards, among other statutorily specified reasons. Minimum requirements for permitting, plans review and inspections are established by the code, and local jurisdictions may adopt additional administrative requirements that are more stringent. Local technical amendments are subject to strict criteria established by Section 553.73(4), *Florida Statutes*. They are subject to Commission review during each triennial update of the code, and may be either adopted into the updated edition of the code or repealed. Local technical amendments are also subject to appeal according to the procedures established by Section 553.73(4), *Florida Statutes*.

Eleven Technical Advisory Committees (TACs), which are constituted consistent with American National Standards Institute (ANSI) Guidelines, review proposed code changes and clarifications of the code and make recommendations to the Commission. These TACs whose membership is constituted consistent with American National Standards Institute (ANSI) Guidelines include: Accessibility; Joint Building Fire (a joint committee of the Commission and the State Fire Marshal); Building Structural; Code Administration/Enforcement; Electrical; Energy; Mechanical; Plumbing and Fuel Gas; Roofing; Swimming Pool; and Special Occupancy (state agency construction and facility licensing regulations).

The Commission may only issue official code interpretations using procedures set out by Chapter 120, *Florida Statutes*. To obtain such an interpretation, a request for a declaratory statement must be made to the Florida Building Commission in a manner that establishes a clear set of facts and circumstances and identifies the section of the code in question. Requests are analyzed by staff,

reviewed by the appropriate Technical Advisory Committee, and sent to the Florida Building Commission for action. These interpretations establish precedents for situations having similar facts and circumstances and are typically incorporated into the code in the next code amendment cycle. Nonbinding interpretations are available from the Building Officials Association of Florida’s website ([www.BOAF.net](http://www.BOAF.net)) and a binding interpretation process is available online at [www.floridabuilding.org](http://www.floridabuilding.org).

#### **MARGINAL MARKINGS**

Solid vertical lines in the margins within the body of the code indicate a change from the requirements of the *Florida Building Code, Residential*, 8th Edition (2023) to the *Florida Building Code, Residential*, 9th Edition (2026) effective December 31, 2026.

Sections deleted from the base code are designated “Reserved” in order to maintain the structure of the base code. Deletion indicators in the form of a solid dot (•) are noted in the margin to indicate deleted text.

#### **ITALICIZED TERMS**

Selected terms set forth in Chapter 2, Definitions, are italicized where they appear in code text (except those in Sections 1903 through 1905, where italics indicate provisions that differ from ACI 318). Such terms are not italicized where the definition set forth in Chapter 2 does not impart the intended meaning in the use of the term. The terms selected have definitions that the user should read carefully to facilitate better understanding of the code.

#### **ACKNOWLEDGMENTS**

The *Florida Building Code* is produced through the efforts and contributions of building designers, contractors, product manufacturers, regulators and other interested parties who participate in the Florida Building Commission’s consensus processes, Commission staff and the participants in the national model code development processes.

**CONTENTS**

<b>APPENDIX D</b>	<b>RECOMMENDED PROCEDURE FOR SAFETY INSPECTION OF AN EXISTING APPLIANCE INSTALLATION</b> .....	<b>575</b>	AM102	Definition .....	613
<b>APPENDIX E</b>	<b>FLORIDA STANDARD FOR MITIGATION OF RADON IN EXISTING BUILDINGS</b> ..	<b>581</b>	AM103	Means of Egress.....	613
<b>APPENDIX F</b>	<b>FLORIDA STANDARD FOR PASSIVE RADON-RESISTANT NEW RESIDENTIAL BUILDING CONSTRUCTION</b> .....	<b>589</b>	AM104	Smoke Detection.....	614
<b>APPENDIX AG</b>	<b>PIPING STANDARDS FOR VARIOUS APPLICATIONS</b> .....	<b>595</b>	<b>APPENDIX N</b>	<b>VENTING METHODS</b> .....	<b>615</b>
AG101	Plastic Piping Standards .....	595	<b>APPENDIX AO</b>	<b>AUTOMATIC VEHICULAR GATES</b> .....	<b>621</b>
AG102	Referenced Standards .....	596	AO101	General .....	621
<b>APPENDIX AH</b>	<b>PATIO COVERS</b> .....	<b>597</b>	AO102	Definition .....	621
AH101	General.....	597	AO103	Automatic Vehicular Gates .....	621
AH102	Definition.....	597	<b>APPENDIX AP</b>	<b>SIZING OF WATER PIPING SYSTEM</b> ...	<b>623</b>
AH103	Exterior Walls and Openings.....	597	AP101	General .....	623
AH104	Height.....	597	AP102	Information Required.....	623
AH105	Structural Provisions .....	597	AP103	Selection of Pipe Size.....	623
AH106	Special Provisions for Aluminum Screen Enclosures in Hurricane-Prone Regions .....	597	AP201	Selection of Pipe Size .....	640
<b>APPENDIX AI</b>	<b>PRIVATE SEWAGE DISPOSAL</b> .....	<b>601</b>	<b>APPENDIX AQ</b>	<b>TINY HOUSES</b> .....	<b>643</b>
AI101	General.....	601	AQ101	General .....	643
<b>APPENDIX AJ</b>	<b>EXISTING BUILDINGS AND STRUCTURES</b> .....	<b>603</b>	AQ102	Definitions.....	643
AJ101	Purpose and Intent .....	603	AQ103	Ceiling Height.....	643
AJ102	Compliance.....	603	AQ104	Lofts .....	643
AJ103	Preliminary Meeting .....	604	AQ105	Emergency Escape and Rescue Openings.....	644
AJ104	Evaluation of an Existing Building.....	604	AQ106	Energy Conservation .....	644
AJ105	Permit .....	604	<b>APPENDIX AR</b>	<b>LIGHT STRAW-CLAY CONSTRUCTION</b> .....	<b>645</b>
AJ201	Definitions.....	604	AR101	General .....	645
AJ301	Repairs.....	605	AR102	Definitions.....	645
AJ401	Renovations .....	605	AR103	Nonbearing Light Straw-Clay Construction.....	645
AJ501	Alterations.....	605	AR104	Thermal Insulation .....	646
AJ601	Reconstruction.....	606	AR105	Referenced Standard .....	646
AJ701	Additions .....	607	<b>APPENDIX AS</b>	<b>STRAWBALE CONSTRUCTION</b> .....	<b>647</b>
<b>APPENDIX AK</b>	<b>SOUND TRANSMISSION</b> .....	<b>609</b>	AS101	General .....	647
AK101	General.....	609	AS102	Definitions.....	647
AK102	Air-Borne Sound .....	609	AS103	Bales.....	647
AK103	Structural-Borne Sound.....	609	AS104	Finishes .....	648
AK104	Referenced Standards .....	609	AS105	Strawbale Walls—General.....	649
<b>APPENDIX L</b>	<b>PERMIT FEES</b> .....	<b>611</b>	AS106	Strawbale Walls—Structural.....	651
<b>APPENDIX AM</b>	<b>HOME DAY CARE—R-3 OCCUPANCY</b> ..	<b>613</b>	AS107	Fire Resistance.....	654
AM101	General.....	613	AS108	Thermal Insulation .....	654
			AS109	Referenced Standards .....	654
			<b>APPENDIX T</b>	<b>RECOMMENDED PROCEDURE FOR WORST-CASE TESTING OF ATMOSPHERIC VENTING SYSTEMS UNDER N1102.4 OR N1105 CONDITIONS ≤ 5ACH<sub>50</sub></b> .....	<b>655</b>
			T101	Scope.....	655
			T202	General Definitions.....	655

T301 Testing Procedure..... 655

**APPENDIX AU COB CONSTRUCTION ..... 657**

AU101 General..... 657

AU102 Definitions..... 657

AU103 Materials, Mixing and Installation ..... 658

AU104 Finishes ..... 659

AU105 Cob Walls—General..... 659

AU106 Cob Walls—Structural..... 662

AU107 Cob Floors..... 671

AU108 Fire Resistance..... 672

AU109 Thermal Performance ..... 672

AU110 Referenced Standards ..... 672

**APPENDIX AV BOARD OF APPEALS..... 673**

AV101 General..... 673

**APPENDIX AW 3D-PRINTED BUILDING  
CONSTRUCTION..... 675**

AW101 General..... 675

AW102 Definitions..... 675

AW103 Building Design ..... 675

AW104 Building Construction ..... 675

AW105 Special Inspections..... 675

AW106 Referenced Standards ..... 676

**APPENDIX UX SOLAR-READY PROVISIONS—  
DETACHED ONE- AND TWO-FAMILY  
DWELLINGS, MULTIPLE SINGLE-FAMILY  
DWELLINGS (TOWNHOUSES) ..... 677**

UX101 Scope ..... 677

UX102 General Definition ..... 677

UX103 Solar-Ready Zone ..... 677

**INDEX ..... 679**
