PREFACE

History

The State of Florida first mandated statewide building codes during the 1970s at the beginning of the modern construction boom. The first law required all municipalities and counties to adopt and enforce one of the four state-recognized model codes known as the “state minimum building codes.” During the early 1990s a series of natural disasters, together with the increasing complexity of building construction regulation in vastly changed markets, led to a comprehensive review of the state building code system. The study revealed that building code adoption and enforcement was inconsistent throughout the state and those local codes thought to be the strongest proved inadequate when tested by major hurricane events. The consequences of the building codes system failure were devastation to lives and economies and a statewide property insurance crisis. The response was a reform of the state building construction regulatory system that placed emphasis on uniformity and accountability.

The 1998 Florida Legislature amended chapter 553, *Florida Statutes*, Building Construction Standards, to create a single state building code that is enforced by local governments. As of March 1, 2002, the *Florida Building Code*, which is developed and maintained by the Florida Building Commission, supersedes all local building codes. The *Florida Building Code* is updated every three years and may be amended in the interim in accordance with criteria set out in section 553.73, Florida Statutes.

Scope

The *Florida Building Code* is based on national model building codes and national consensus standards, in addition to Florida-specific provisions. The code incorporates all building construction-related regulations for public and private buildings in the State of Florida other than those specifically exempted by section 553.73, Florida Statutes. It has been harmonized with the *Florida Fire Prevention Code*, which is developed and maintained by the Department of Financial Services, Office of the State Fire Marshal, to establish unified and consistent standards.

The model codes used for the *Florida Building Code*, 7th Edition (2020) include: the 2018 editions of the *International Building Code*®; the *International Plumbing Code*®; the *International Mechanical Code*®; the *International Fuel Gas Code*®; the *International Residential Code*®; the *International Existing Building Code*®; the *International Energy Conservation Code*®; the *National Electrical Code*, 2017 edition; or substantive criteria from ASHRAE Standard 90.1-2016. State and local codes adopted and incorporated into the code include the *Florida Building Code*, *Accessibility*, and special hurricane protection standards for the High-Velocity Hurricane Zone.

The code is composed of nine main volumes: the *Florida Building Code, Building*, which also includes state regulations for licensed facilities; the *Florida Building Code, Plumbing*; the *Florida Building Code, Mechanical*; the *Florida Building Code, Fuel Gas*; the *Florida Building Code, Existing Building*; the *Florida Building Code, Residential*; the *Florida Building Code, Energy Conservation*; the *Florida Building Code, Accessibility* and the *Florida Building Code, Test Protocols for High-Velocity Hurricane Zones*. Chapter 27 of the *Florida Building Code, Building*, adopts the *National Electrical Code*, NFPA 70, by reference.

Under certain strictly defined conditions, local governments may amend technical requirements to be more stringent than the code. All local technical amendments to the *Florida Building Code* must be adopted in accordance with the requirements of section 553.73(4), Florida Statutes, and reported to the Florida Building Commission, then posted on www.floridabuilding.org in legislative format for 30 days prior to being enforced. Local amendments to the *Florida Building Code* and the *Florida Fire Prevention Code* may be obtained from the Florida Building Commission website, or from the Florida Department of Business and Professional Regulation or the Florida Department of Financial Services, Office of the State Fire Marshal, respectively.

Adoption and Maintenance

An updated edition of the *Florida Building Code* is adopted triennially by the Florida Building Commission. The code may also be amended between updates in order to incorporate the Florida Building Commission's interpretations into the code, address conflicts, and update standards, among other statutorily specified reasons. Minimum requirements for permitting, plans review and inspections are established by the code, and local jurisdictions may adopt additional administrative requirements that are more stringent. Local technical amendments are subject to strict criteria established by section 553.73(4), Florida Statutes. They are subject to Commission review during each triennial update of the code, and may be either adopted into the updated edition of the code or repealed. Local technical amendments are also subject to appeal according to the procedures established by section 553.73(4), Florida Statutes.

Eleven Technical Advisory Committees (TACs), which are constituted consistent with American National Standards Institute (ANSI) Guidelines, review proposed code changes and clarifications of the code and make recommendations to the Commission. These TACs whose membership is constituted consistent with American National Standards Institute (ANSI) Guidelines include: Accessibility; Joint Building Fire (a joint committee of the Commission and the State Fire Marshal); Building Structural; Code Administration/ Enforcement; Electrical; Energy; Mechanical; Plumbing and Fuel Gas; Roofing; Swimming Pool; and Special Occupancy (state agency construction and facility licensing regulations).

The Commission may only issue official code interpretations using procedures set out by Chapter 120, Florida Statutes. To obtain such an interpretation, a request for a declaratory statement must be made to the Florida Building Commission in a manner that establishes a clear set of facts and circumstances and identifies the section of the code in question. Requests are analyzed by staff, reviewed by the appropriate Technical Advisory Committee, and sent to the Florida Building Commission for action. These interpretations establish precedents for situations having similar facts and circumstances and are typically incorporated into the code in the next code amendment cycle. Non-binding interpretations are available from the Building Officials Association of Florida's website (www.BOAF.net) and a binding interpretation process is available online at www.floridabuilding.org.

Marginal Markings

Solid vertical lines in the margins within the body of the code indicate a change from the requirements of the *Florida Building Code, Plumbing*, 6th Edition (2017) to the *Florida Building Code, Plumbing*, 7th Edition (2020) effective December 31, 2020.

Sections deleted from the base code are designated "Reserved" in order to maintain the structure of the base code.

Italicized Terms

Selected terms set forth in Chapter 2, Definitions, are italicized where they appear in code text. Such terms are not italicized where the definition set forth in Chapter 2 does not impart the intended meaning in the use of the term. The terms selected have definitions that the user should read carefully to facilitate better understanding of the code.

Acknowledgments

The *Florida Building Code* is produced through the efforts and contributions of building designers, contractors, product manufacturers, regulators and other interested parties who participate in the Florida Building Commission's consensus processes, Commission staff and the participants in the national model code development processes.

TABLE OF CONTENTS

CHAPTER 1		SCOPE AND ADMINISTRATION... 1	312	Tests and Inspections	15
PART 1—SCOPE AND APPLICATION..... 1			313	Equipment Efficiencies	16
Section			314	Condensate Disposal	16
101	General	1	315	Penetrations	17
102	Applicability (Reserved)	1	316	Alternative Engineered Design	17
PART 2—ADMINISTRATION AND ENFORCEMENT..... 1			317	Public Food Service Establishments and Food Establishments	18
Section			318	Irrigation.	18
103	Department of Plumbing Inspection (Reserved).	1	CHAPTER 4		
104	Duties and Powers of the Code Official (Reserved).	1	FIXTURES, FAUCETS AND FIXTURE FITTINGS..... 19		
105	Approval (Reserved)	1	Section		
106	Permits (Reserved)	1	401	General.	19
107	Inspections and Testing (Reserved)	1	402	Fixture Materials	19
108	Violations (Reserved).	1	403	Minimum Plumbing Facilities	19
109	Means of Appeal (Reserved)	1	404	Accessible Plumbing Facilities	23
110	Temporary Equipment, Systems and Uses (Reserved).	1	405	Installation of Fixtures	23
CHAPTER 2		DEFINITIONS..... 3	406	Automatic Clothes Washers.	25
Section			407	Bathtubs	25
201	General	3	408	Bidets	25
202	General Definitions	3	409	Dishwashing Machines	25
CHAPTER 3		GENERAL REGULATIONS..... 11	410	Drinking Fountains	25
Section			411	Emergency Showers and Eyewash Stations	26
301	General	11	412	Faucets and Fixture Fittings.	26
302	Exclusion of Materials Detrimental to the Sewer System	11	413	Floor and Trench Drains	27
303	Materials.	11	414	Floor Sinks.	27
304	Rodentproofing.	12	415	Flushing Devices for Water Closets and Urinals.	27
305	Protection of Pipes and Plumbing System Components	12	416	Food Waste Disposer Units	27
306	Trenching, Excavation and Backfill.	12	417	Garbage Can Washers	27
307	Structural Safety	13	418	Laundry Trays	28
308	Piping Support	13	419	Lavatories.	28
309	Flood Hazard Resistance	14	420	Manual Food and Beverage Dispensing Equipment.	28
310	Washroom and Toilet Room Requirements	15	421	Showers	28
311	Toilet Facilities for Workers	15	422	Sinks.	29
			423	Specialty Plumbing Fixtures	29
			424	Urinals	29
			425	Water Closets.	30
			426	Whirlpool Bathtubs	30

TABLE OF CONTENTS

CHAPTER 5 WATER HEATERS31

Section

501	General	31
502	Installation	31
503	Connections	31
504	Safety Devices	32
505	Insulation	33

CHAPTER 6 WATER SUPPLY AND DISTRIBUTION35

Section

601	General	35
602	Water Required	35
603	Water Service	36
604	Design of Building Water Distribution System	36
605	Materials, Joints and Connections	38
606	Installation of the Building Water Distribution System	44
607	Hot Water Supply System	45
608	Protection of Potable Water Supply	46
609	Health Care Plumbing	52
610	Disinfection of Potable Water System	52
611	Water Treatment Units	52
612	Solar Systems	53
613	Temperature Control Devices and Valves	53
614	Well Pumps and Tanks Used for Private Potable Water Systems	53

CHAPTER 7 SANITARY DRAINAGE55

Section

701	General	55
702	Materials	55
703	Building Sewer	57
704	Drainage Piping Installation	57
705	Joints	58
706	Connections between Drainage Piping and Fittings	60
707	Prohibited Joints and Connections	61
708	Cleanouts	61
709	Fixture Units	62
710	Drainage System Sizing	64
711	Offsets in Drainage Piping in Buildings of Five Stories or More	64
712	Sumps and Ejectors	65

713	Computerized Drainage Design	66
714	Backwater Valves	66
715	Vacuum Drainage Systems	66
716	Replacement of Underground Building Sewers and Building Drains by Pipe-Bursting Methods	67

CHAPTER 8 INDIRECT/SPECIAL WASTE 69

Section

801	General	69
802	Indirect Wastes	69
803	Special Wastes	70

CHAPTER 9 VENTS 71

Section

901	General	71
902	Materials	71
903	Vent Terminals	71
904	Outdoor Vent Extensions	71
905	Vent Connections and Grades	72
906	Vent Pipe Sizing	72
907	Vents for Stack Offsets	72
908	Relief Vents—Stacks of More Than 10 Branch Intervals	74
909	Fixture Vents	74
910	Individual Vent	74
911	Common Vent	74
912	Wet Venting	75
913	Waste Stack Vent	75
914	Circuit Venting	76
915	Combination Waste and Vent System	76
916	Island Fixture Venting	76
917	Single Stack Vent System	77
918	Air Admittance Valves	78
919	Engineered Vent Systems	78
920	Computerized Vent Design	79

CHAPTER 10 TRAPS, INTERCEPTORS AND SEPARATORS..... 81

Section

1001	General	81
1002	Trap Requirements	81
1003	Interceptors and Separators	82
1004	Materials, Joints and Connections	84

CHAPTER 11 STORM DRAINAGE 85	APPENDIX B RATES OF RAINFALL FOR VARIOUS CITIES. 123
Section	
1101 General 85	
1102 Materials 85	
1103 Traps 86	
1104 Conductors and Connections 87	
1105 Roof Drains 87	
1106 Size of Conductors, Leaders and Storm Drains. 87	
1107 Siphonic Roof Drainage Systems 88	
1108 Secondary (Emergency) Roof Drains. 88	
1109 Combined Sanitary and Storm Public Sewer 94	
1110 Controlled Flow Roof Drain Systems 94	
1111 Subsoil Drains 94	
1112 Building Subdrains 94	
1113 Sumps and Pumping Systems. 94	
CHAPTER 12 SPECIAL PIPING AND STORAGE SYSTEMS 95	APPENDIX C STRUCTURAL SAFETY. 125
Section	Section
1201 General 95	C101 Cutting, Notching and Boring in Wood Members 125
1202 Medical Gases 95	
1203 Oxygen Systems 95	APPENDIX D DEGREE DAY AND DESIGN TEMPERATURES 127
CHAPTER 13 NONPOTABLE WATER SYSTEMS. 97	APPENDIX E SIZING OF WATER PIPING SYSTEM. 133
Section	Section
1301 General 97	E101 General 133
1302 On-site Nonpotable Water Reuse Systems. 99	E102 Information Required. 133
1303 Nonpotable Rainwater Collection and Distribution Systems 101	E103 Selection of Pipe Size 133
1304 Reclaimed Water Systems 103	E201 Selection of Pipe Size 150
