PREFACE

History

The State of Florida first mandated statewide building codes during the 1970s at the beginning of the modern construction boom. The first law required all municipalities and counties to adopt and enforce one of the four state-recognized model codes known as the “state minimum building codes.” During the early 1990s a series of natural disasters, together with the increasing complexity of building construction regulation in vastly changed markets, led to a comprehensive review of the state building code system. The study revealed that building code adoption and enforcement was inconsistent throughout the state and those local codes thought to be the strongest proved inadequate when tested by major hurricane events. The consequences of the building codes system failure were devastation to lives and economies and a statewide property insurance crisis. The response was a reform of the state building construction regulatory system that placed emphasis on uniformity and accountability.

The 1998 Florida Legislature amended chapter 553, *Florida Statutes*, Building Construction Standards, to create a single state building code that is enforced by local governments. As of March 1, 2002, the *Florida Building Code*, which is developed and maintained by the Florida Building Commission, supersedes all local building codes. The *Florida Building Code* is updated every three years and may be amended in the interim in accordance with criteria set out in section 553.73, *Florida Statutes*.

Scope

The *Florida Building Code* is based on national model building codes and national consensus standards, in addition to Florida-specific provisions. The code incorporates all building construction-related regulations for public and private buildings in the State of Florida other than those specifically exempted by section 553.73, *Florida Statutes*. It has been harmonized with the *Florida Fire Prevention Code*, which is developed and maintained by the Department of Financial Services, Office of the State Fire Marshal, to establish unified and consistent standards.

The model codes used for the *Florida Building Code*, 7th Edition (2020) include: the 2018 editions of the *International Building Code*®; the *International Plumbing Code*®; the *International Mechanical Code*®; the *International Fuel Gas Code*®; the *International Residential Code*®; the *International Existing Building Code*®; the *International Energy Conservation Code*®; the *National Electrical Code*, 2017 edition; or substantive criteria from ASHRAE Standard 90.1-2016. State and local codes adopted and incorporated into the code include the *Florida Building Code, Accessibility*, and special hurricane protection standards for the High-Velocity Hurricane Zone.

The code is composed of nine main volumes: the *Florida Building Code, Building*, which also includes state regulations for licensed facilities; the *Florida Building Code, Plumbing*; the *Florida Building Code, Mechanical*; the *Florida Building Code, Fuel Gas*; the *Florida Building Code, Existing Building*; the *Florida Building Code, Residential*; the *Florida Building Code, Energy Conservation*; the *Florida Building Code, Accessibility* and the *Florida Building Code, Test Protocols for High-Velocity Hurricane Zones*. Chapter 27 of the *Florida Building Code, Building*, adopts the *National Electrical Code*, NFPA 70, by reference.

Under certain strictly defined conditions, local governments may amend technical requirements to be more stringent than the code. All local technical amendments to the *Florida Building Code* must be adopted in accordance with the requirements of section 553.73(4), *Florida Statutes*, and reported to the Florida Building Commission, then posted on www.floridabuilding.org in legislative format for 30 days prior to being enforced. Local amendments to the *Florida Building Code* and the *Florida Fire Prevention Code* may be obtained from the Florida Building Commission website, or from the Florida Department of Business and Professional Regulation or the Florida Department of Financial Services, Office of the State Fire Marshal, respectively.

Adoption and Maintenance

An updated edition of the *Florida Building Code* is adopted triennially by the Florida Building Commission. The code may also be amended between updates in order to incorporate the Florida Building Commission's interpretations into the code, address conflicts, and update standards, among other statutorily specified reasons. Minimum requirements for permitting, plans review and inspections are established by the code, and local jurisdictions may adopt additional administrative requirements that are more stringent. Local technical amendments are subject to strict criteria established by section 553.73(4), Florida Statutes. They are subject to Commission review during each triennial update of the code, and may be either adopted into the updated edition of the code or repealed. Local technical amendments are also subject to appeal according to the procedures established by section 553.73(4), Florida Statutes.

Eleven Technical Advisory Committees (TACs), which are constituted consistent with American National Standards Institute (ANSI) Guidelines, review proposed code changes and clarifications of the code and make recommendations to the Commission. These TACs whose membership is constituted consistent with American National Standards Institute (ANSI) Guidelines include: Accessibility; Joint Building Fire (a joint committee of the Commission and the State Fire Marshal); Building Structural; Code Administration/ Enforcement; Electrical; Energy; Mechanical; Plumbing and Fuel Gas; Roofing; Swimming Pool; and Special Occupancy (state agency construction and facility licensing regulations).

The Commission may only issue official code interpretations using procedures set out by Chapter 120, Florida Statutes. To obtain such an interpretation, a request for a declaratory statement must be made to the Florida Building Commission in a manner that establishes a clear set of facts and circumstances and identifies the section of the code in question. Requests are analyzed by staff, reviewed by the appropriate Technical Advisory Committee, and sent to the Florida Building Commission for action. These interpretations establish precedents for situations having similar facts and circumstances and are typically incorporated into the code in the next code amendment cycle. Non-binding interpretations are available from the Building Officials Association of Florida's website (www.BOAF.net) and a binding interpretation process is available online at www.floridabuilding.org.

Marginal Markings

Solid vertical lines in the margins within the body of the code indicate a change from the requirements of the *Florida Building Code, Mechanical*, 6th Edition (2017) to the *Florida Building Code, Mechanical*, 7th Edition (2020) effective December 31, 2020.

Sections deleted from the base code are designated "Reserved" in order to maintain the structure of the base code.

Italicized Terms

Selected terms set forth in Chapter 2, Definitions, are italicized where they appear in code text. Such terms are not italicized where the definition set forth in Chapter 2 does not impart the intended meaning in the use of the term. The terms selected have definitions that the user should read carefully to facilitate better understanding of the code.

Acknowledgments

The *Florida Building Code* is produced through the efforts and contributions of building designers, contractors, product manufacturers, regulators and other interested parties who participate in the Florida Building Commission's consensus processes, Commission staff and the participants in the national model code development processes.

TABLE OF CONTENTS

CHAPTER 1 SCOPE AND ADMINISTRATION 1	CHAPTER 4 VENTILATION 25
PART 1—SCOPE AND APPLICATION. 1	Section
Section	401 General. 25
101 General 1	402 Natural Ventilation. 25
102 Applicability (Reserved) 1	403 Mechanical Ventilation 26
PART 2—ADMINISTRATION AND ENFORCEMENT. 1	404 Enclosed Parking Garages 29
103 Department of Mechanical Inspection (Reserved). 1	405 Systems Control 29
104 Duties and Powers of the Code Official (Reserved) 1	406 Ventilation of Uninhabited Spaces 29
105 Approval (Reserved) 1	407 Ambulatory Care Facilities and Group I-2 Occupancies 29
106 Permits (Reserved) 1	CHAPTER 5 EXHAUST SYSTEMS. 35
107 Inspections and Testing (Reserved) 1	Section
108 Violations (Reserved). 1	501 General. 35
109 Means of Appeal (Reserved) 1	502 Required Systems. 36
110 Temporary Equipment, Systems and Uses (Reserved). 1	503 Motors and Fans. 43
CHAPTER 2 DEFINITIONS 3	504 Clothes Dryer Exhaust. 43
Section	505 Domestic Kitchen Exhaust Equipment 45
201 General 3	506 Commercial Kitchen Hood Ventilation System Ducts and Exhaust Equipment 46
202 General Definitions 3	507 Commercial Kitchen Hoods. 51
CHAPTER 3 GENERAL REGULATIONS 15	508 Commercial Kitchen Makeup Air 54
Section	509 Fire Suppression Systems 54
301 General 15	510 Hazardous Exhaust Systems 54
302 Protection of Structure 16	511 Dust, Stock and Refuse Conveying Systems. 57
303 Equipment and Appliance Location. 17	512 Subslab Soil Exhaust Systems. 58
304 Installation 17	513 Smoke Control Systems. 58
305 Piping Support 19	514 Energy Recovery Ventilation Systems 62
306 Access and Service Space 19	515 Mausoleum Relief Vent. 62
307 Condensate Disposal 21	516 Carbon Monoxide Control Systems. 63
308 Clearance Reduction. 22	CHAPTER 6 DUCT SYSTEMS. 65
309 Temperature Control 24	Section
310 Explosion Control. 24	601 General. 65
311 Smoke and Heat Vents 24	602 Plenums 66
312 Heating and Cooling Load Calculations 24	603 Duct Construction and Installation 68
	604 Insulation 70
	605 Air Filters. 71
	606 Smoke Detection Systems Control 71
	607 Duct and Transfer Openings 72

TABLE OF CONTENTS

CHAPTER 7 COMBUSTION AIR 79

Section

701 General	79
-------------------	----

CHAPTER 8 CHIMNEYS AND VENTS..... 81

Section

801 General	81
802 Vents	82
803 Connectors	83
804 Direct-vent, Integral Vent and Mechanical Draft Systems	84
805 Factory-built Chimneys	85
806 Metal Chimneys	86

CHAPTER 9 SPECIFIC APPLIANCES, FIREPLACES AND SOLID FUEL- BURNING EQUIPMENT 87

Section

901 General	87
902 Masonry Fireplaces	87
903 Factory-built Fireplaces	87
904 Pellet Fuel-burning Appliances	87
905 Fireplace Stoves and Room Heaters	87
906 Factory-built Barbecue Appliances	87
907 Incinerators and Crematories	87
908 Cooling Towers, Evaporative Condensers and Fluid Coolers	88
909 Vented Wall Furnaces	88
910 Floor Furnaces	88
911 Duct Furnaces	89
912 Infrared Radiant Heaters	89
913 Clothes Dryers	89
914 Sauna Heaters	89
915 Engine and Gas Turbine-powered Equipment and Appliances	89
916 Pool and Spa Heaters	89
917 Cooking Appliances	90
918 Forced-air Warm-air Furnaces	90
919 Conversion Burners	90
920 Unit Heaters	90
921 Vented Room Heaters	90
922 Kerosene and Oil-fired Stoves	90
923 Small Ceramic Kilns	90
924 Stationary Fuel Cell Power Systems	90
925 Masonry Heaters	90
926 Gaseous Hydrogen Systems	91

927 Radiant Heating Systems	91
928 Evaporative Cooling Equipment	91
929 Large-diameter Ceiling Fans	91

CHAPTER 10 BOILERS, WATER HEATERS AND PRESSURE VESSELS..... 93

Section

1001 General	93
1002 Water Heaters	93
1003 Pressure Vessels	93
1004 Boilers	94
1005 Boiler Connections	95
1006 Safety and Pressure Relief Valves and Controls	95
1007 Boiler Low-water Cutoff	95
1008 Bottom Blowoff Valve	95
1009 Hot Water Boiler Expansion Tank	96
1010 Gauges	96
1011 Tests	96

CHAPTER 11 REFRIGERATION 97

Section

1101 General	97
1102 System Requirements	97
1103 Refrigeration System Classification	98
1104 System Application Requirements	103
1105 Machinery Room, General Requirements	104
1106 Machinery Room, Special Requirements	105
1107 Refrigerant Piping	106
1108 Field Test	107
1109 Periodic Testing	107

CHAPTER 12 HYDRONIC PIPING..... 109

Section

1201 General	109
1202 Material	109
1203 Joints and Connections	110
1204 Pipe Insulation	111
1205 Valves	112
1206 Piping Installation	112
1207 Transfer Fluid	112
1208 Tests	112
1209 Embedded Piping	113
1210 Plastic Pipe Ground-source Heat Pump Loop Systems	113

CHAPTER 13 FUEL OIL PIPING AND STORAGE	117
Section	
1301 General	117
1302 Material	117
1303 Joints and Connections	117
1304 Piping Support	118
1305 Fuel Oil System Installation	118
1306 Oil Gauging	119
1307 Fuel Oil Valves	119
1308 Testing	119
CHAPTER 14 SOLAR SYSTEMS	121
Section	
1401 General	121
1402 Installation	121
1403 Heat Transfer Fluids	122
1404 Materials	122
CHAPTER 15 REFERENCED STANDARDS	123
APPENDIX A CHIMNEY CONNECTOR PASS-THROUGHS	135
APPENDIX B RECOMMENDED PERMIT FEE SCHEDULE	137
