PREFACE

HISTORY

The State of Florida first mandated statewide building codes during the 1970s at the beginning of the modern construction boom. The first law required all municipalities and counties to adopt and enforce one of the four state-recognized model codes known as the “state minimum building codes.” During the early 1990s a series of natural disasters, together with the increasing complexity of building construction regulation in vastly changed markets, led to a comprehensive review of the state building code system. The study revealed that building code adoption and enforcement was inconsistent throughout the state and those local codes thought to be the strongest proved inadequate when tested by major hurricane events. The consequences of the building codes system failure were devastation to lives and economies and a statewide property insurance crisis. The response was a reform of the state building construction regulatory system that placed emphasis on uniformity and accountability.

The 1998 Florida Legislature amended Chapter 553, *Florida Statutes*, Building Construction Standards, to create a single state building code that is enforced by local governments. As of March 1, 2002, the *Florida Building Code*, which is developed and maintained by the Florida Building Commission, supersedes all local building codes. The *Florida Building Code* is updated every three years and may be amended in the interim in accordance with criteria set out in Section 553.73, *Florida Statutes*.

SCOPE

The *Florida Building Code* is based on national model building codes and national consensus standards, in addition to Florida-specific provisions. The code incorporates all building construction-related regulations for public and private buildings in the State of Florida other than those specifically exempted by Section 553.73, *Florida Statutes*. It has been harmonized with the *Florida Fire Prevention Code*, which is developed and maintained by the Department of Financial Services, Office of the State Fire Marshal, to establish unified and consistent standards.

The model codes used for the *Florida Building Code*, 9th Edition (2026) include: the 2024 editions of the *International Building Code*®; the *International Plumbing Code*®; the *International Mechanical Code*®; the *International Fuel Gas Code*®; the *International Residential Code*®; the *International Existing Building Code*®; the *International Energy Conservation Code*®; the *National Electrical Code*, 2023 edition; or substantive criteria from ASHRAE Standard 90.1-2022. State and local codes adopted and incorporated into the code include the *Florida Building Code*, *Accessibility*, and special hurricane protection standards for the High-Velocity Hurricane Zone.

The code is composed of nine main volumes: the *Florida Building Code, Building*, which also includes state regulations for licensed facilities; the *Florida Building Code, Plumbing*; the *Florida Building Code, Mechanical*; the *Florida Building Code, Fuel Gas*; the *Florida Building Code, Existing Building*; the *Florida Building Code, Residential*; the *Florida Building Code, Energy Conservation*; the *Florida Building Code, Accessibility* and the *Florida Building Code, Test Protocols for High-Velocity Hurricane Zones*. Chapter 27 of the *Florida Building Code, Building*, adopts the *National Electrical Code*, NFPA 70, by reference.

Under certain strictly defined conditions, local governments may amend technical requirements to be more stringent than the code. All local technical amendments to the *Florida Building Code* must be adopted in accordance with the requirements of Section 553.73(4), *Florida Statutes*, and reported to the Florida Building Commission, then posted on www.floridabuilding.org in legislative format for 30 days prior to being enforced. Local amendments to the *Florida Building Code* and the *Florida Fire Prevention Code* may be obtained from the Florida Building Commission website, or from the Florida Department of Business and Professional Regulation or the Florida Department of Financial Services, Office of the State Fire Marshal, respectively.

ADOPTION AND MAINTENANCE

An updated edition of the *Florida Building Code* is adopted triennially by the Florida Building Commission. The code may also be amended between updates in order to incorporate the Florida Building Commission’s interpretations into the code, address conflicts, and update standards, among other statutorily specified reasons. Minimum requirements for permitting, plans review and inspections are established by the code, and local jurisdictions may adopt additional administrative requirements that are more stringent. Local technical amendments are subject to strict criteria established by Section 553.73(4), *Florida Statutes*. They are subject to Commission review during each triennial update of the code, and may be either adopted into the updated edition of the code or repealed. Local technical amendments are also subject to appeal according to the procedures established by Section 553.73(4), *Florida Statutes*.

Eleven Technical Advisory Committees (TACs), which are constituted consistent with American National Standards Institute (ANSI) Guidelines, review proposed code changes and clarifications of the code and make recommendations to the Commission. These TACs whose membership is constituted consistent with American National Standards Institute (ANSI) Guidelines include: Accessibility; Joint Building Fire (a joint committee of the Commission and the State Fire Marshal); Building Structural; Code Administration/ Enforcement; Electrical; Energy; Mechanical; Plumbing and Fuel Gas; Roofing; Swimming Pool; and Special Occupancy (state agency construction and facility licensing regulations).

The Commission may only issue official code interpretations using procedures set out by Chapter 120, *Florida Statutes*. To obtain such an interpretation, a request for a declaratory statement must be made to the Florida Building Commission in a manner that establishes a clear set of facts and circumstances and identifies the section of the code in question. Requests are analyzed by staff, reviewed by the appropriate Technical Advisory Committee, and sent to the Florida Building Commission for action. These interpretations establish precedents for situations having similar facts and circumstances and are typically incorporated into the code in the next code amendment cycle. Nonbinding interpretations are available from the Building Officials Association of Florida’s website (www.BOAF.net) and a binding interpretation process is available online at www.floridabuilding.org.

MARGINAL MARKINGS

Solid vertical lines in the margins within the body of the code indicate a change from the requirements of the *Florida Building Code, Fuel Gas*, 8th Edition (2023) to the *Florida Building Code, Fuel Gas*, 9th Edition (2026) effective December 31, 2026.

Sections deleted from the base code are designated “Reserved” in order to maintain the structure of the base code. Deletion indicators in the form of a solid dot (•) are noted in the margin to indicate deleted text.

ITALICIZED TERMS

Selected terms set forth in Chapter 2, Definitions, are italicized where they appear in code text. Such terms are not italicized where the definition set forth in Chapter 2 does not impart the intended meaning in the use of the term. The terms selected have definitions that the user should read carefully to facilitate better understanding of the code.

ACKNOWLEDGMENTS

The *Florida Building Code* is produced through the efforts and contributions of building designers, contractors, product manufacturers, regulators and other interested parties who participate in the Florida Building Commission’s consensus processes, Commission staff and the participants in the national model code development processes.

TABLE OF CONTENTS

CHAPTER 1	SCOPE AND ADMINISTRATION	1	410	Flow Controls (IFGC)	74
PART 1—SCOPE AND APPLICATION	1		411	Appliance and Manufactured Home Connections (IFGC)	74
101	Scope and General Requirements (IFGC)	1	412	Liquefied Petroleum Gas Motor Vehicle Fuel-Dispensing Facilities (IFGC)	75
102	Applicability (IFGC) (Reserved)	1	413	Compressed Natural Gas Motor Vehicle Fuel-Dispensing Facilities (IFGC)	77
PART 2—ADMINISTRATION AND ENFORCEMENT	2		414	Supplemental and Standby Gas Supply (IFGC)	78
103	Department of Inspection (IFGC) (Reserved)	2	415	Piping Support Intervals (IFGS)	79
104	Duties and Powers of the Code Official (IFGC) (Reserved)	2	416	Overpressure Protection Devices (IFGS)	79
105	Approval (IFGC) (Reserved)	2	CHAPTER 5	CHIMNEYS AND VENTS	81
106	Permits (IFGC) (Reserved)	2	501	General (IFGC)	81
107	Inspections and Testing (IFGC) (Reserved)	2	502	Vents (IFGC)	82
108	Violations (IFGC) (Reserved)	2	503	Venting of Appliances (IFGS)	83
109	Means of Appeal (IFGC) (Reserved)	2	504	Sizing of Category I Appliance Venting Systems (IFGS)	94
110	Temporary Equipment, Systems and Uses (IFGC) (Reserved)	2	505	Direct-Vent, Integral Vent, Mechanical Vent and Ventilation/Exhaust Hood Venting (IFGC)	115
CHAPTER 2	DEFINITIONS	3	506	Factory-Built Chimneys (IFGC)	116
201	General (IFGC)	3	CHAPTER 6	SPECIFIC APPLIANCES	117
202	General Definitions (IFGC)	3	601	General (IFGC)	117
CHAPTER 3	GENERAL REGULATIONS	11	602	Decorative Appliances for Installation in Fireplaces (IFGC)	117
301	General (IFGC)	11	603	Log Lighters (IFGC)	117
302	Structural Safety (IFGC)	12	604	Vented Gas Fireplaces (Decorative Appliances) (IFGC)	117
303	Appliance Location (IFGC)	12	605	Vented Gas Fireplace Heaters (IFGC)	117
304	Combustion, Ventilation and Dilution Air (IFGS)	13	606	Incinerators and Crematories (IFGC)	117
305	Installation (IFGC)	17	607	Commercial-Industrial Incinerators (IFGC)	117
306	Access and Service Space (IFGC)	18	608	Vented Wall Furnaces (IFGC)	117
307	Condensate Disposal (IFGC)	20	609	Floor Furnaces (IFGC)	118
308	Clearance Reduction (IFGS)	20	610	Duct Furnaces (IFGC)	118
309	Electrical (IFGC)	23	611	Nonrecirculating Direct-Fired Industrial Air Heaters (IFGC)	118
310	Electrical Bonding (IFGS)	23	612	Recirculating Direct-Fired Industrial Air Heaters (IFGC)	119
311	Carbon Monoxide Control Systems	23	613	Clothes Dryers (IFGC)	119
CHAPTER 4	GAS PIPING INSTALLATIONS	25	614	Clothes Dryer Exhaust (IFGC)	119
