Los Angeles County Code Title 26
Based on the 2013 CBC and 2012 IBC®

Effective January 1, 2014
Official Compilation
Edited and Proofread by Building and Safety Division, Department of Public Works, County of Los Angeles

Fees are based on the effective date and adjusted annually based on the Consumer Price Index (CPI) pursuant to Section 107.17.
PREFACE

This document is Part 2 of 12 parts of the official triennial compilation and publication of the adoptions, amendments and repeal of administrative regulations to California Code of Regulations, Title 24, also referred to as the California Building Standards Code. This Part is known as the California Building Code.

The California Building Standards Code is published in its entirety every three years by order of the California Legislature; with supplements published in intervening years. The California Legislature delegated authority to various State agencies, boards, commissions and departments to create building regulations to implement the State’s statutes. These building regulations or standards have the same force of law, and take effect 180 days after their publication unless otherwise stipulated. The California Building Standards Code applies to all occupancies in the State of California as annotated.

The County of Los Angeles has established more restrictive building standards reasonably necessary because of local climatic, geological or topographical conditions. Findings of the local condition(s) and the adopted local building standard(s) have been filed with the California Building Standards Commission to become effective and may not be effective sooner than the effective date of this edition of the California Building Standards Code.

Should you find publication (e.g., typographical) errors or inconsistencies in this code or wish to offer comments toward improving its format, please address your comments to:

ACKNOWLEDGEMENTS

The 2013 California Building Standards Code (Code) was developed through the outstanding collaborative efforts of the Department of Housing and Community Development, the Division of State Architect, the Office of the State Fire Marshal, the Office of Statewide Health Planning and Development, the California Energy Commission, the California Department of Public Health, the California State Lands Commission, the Board of State and Community Corrections, and the California Building Standards Commission (Commission).

This collaborative effort included the assistance of the Commission’s Code Advisory Committees and many other volunteers who worked tirelessly to assist the Commission in the production of this Code.

Governor Edmund G. Brown Jr.

Members of the California Building Standards Commission

Secretary Anna Caballaro – Chair
James Barthman – Vice-Chair

Stephen Jensen
Randy Twist
Richard Sawhill
Kent Sasaki

Rose Conroy
Sheila Lee
Richard Sierra
Steven Winkel

Erick Mikiten

Jim McGowan – Executive Director
Michael L. Nearman – Deputy Executive Director

PREFACE

To the County of Los Angeles Amendments

Title 26 of the Los Angeles County Code is substantially the California Building Code (CBC), with certain local deviations and additions.

The California Building Code is published and promulgated by the California Building Standards Commission. New, updated editions of this code are published every three years.

This 2014 edition of Title 26 adopts Chapters 2 through 35 of the 2013 edition of the California Building Code (including certain appendices) with local County amendments. The complete California Building Code is included in this book. Colored replacement pages containing local County amendments are supplied in a separate packet. The purpose is to allow the colored pages to remain as a unit or individually be substituted for the pages of the California Building Code, where applicable.

The following margin symbols are used to differentiate between California Building Code text and County of Los Angeles amendments:

- This symbol indicates a revision to the California Building Code by the County of Los Angeles.
- This symbol indicates deletion of IBC or CBC language by the County of Los Angeles.

Margin symbols that were used in the printing of the California Building Code still remain. Explanations of these symbols are located in the preface to that code.

The format of the County of Los Angeles Building Code is similar to that of the California Code of Regulations, Title 24, Part 2, entitled “California Building Code” and is arranged as follows:

Chapter 1. Administrative Provisions. This chapter contains provisions similar to those found in the California Building Code plus others that are unique to the County. Section 101 designates Title 26 as the “Building Code.”

Chapters 2–35. Occupancy and Construction Requirements. The California Building Code is used except where specifically amended. Amendments are printed on colored paper and are signaled in the margin as noted above.

Chapters 65–99. Special County Requirements. These chapters have been implemented to meet the special needs of the County. The subjects covered are identified in the table of contents.
TABLE OF CONTENTS

VOLUME 1

CHAPTER 1  ADMINISTRATION .................. 3
   Section
   100 Adoption by Reference .................... 3
   101 Title, Purpose and Intent .................. 3
   102 Unsafe Buildings .......................... 4
