SIGNIFICANT CHANGES TO THE International Plumbing Code

PART 1
International Plumbing Code Chapters 1 through 15

■ 202 Definition of Copper Alloy 5
■ 202 Definition of Public and Private 6
■ 202 Definition of Water Dispenser 7
■ 308.9 Bundled Hot Water Piping Insulation 8
■ 403.1.1 Fixture Quantity Calculations for Multiple User Facilities 9
■ 403.1.2 Fixtures in Single-user Toilet Rooms Count Towards Total Required Quantities 11
■ 403.2 Multiple-user Nonseparated Toilet Facilities 13
■ 403.3.1, 403.5 Facilities and Drinking Fountains on Accessible Routes 15
■ 403.3.3 Group S Toilet Facility Location 16
■ 403.6 Service Sink Location 18
■ 405.4.3 Wall Hung Fixture Carrier Standard for Water Closets 19
■ 407.2 Bathtubs are Not Required to have Overflow Outlets 20
■ 410.3.2 Quantities of Standing versus Wheelchair Drinking Fountains 21
■ 410.4 Drinking Fountain Substitution using Water Dispensers 23
■ 411.3 Water Heaters for Emergency Showers and Eye Wash Stations 24
■ 412.3 Shower Control Valves to be Rated for the Installed Shower Head 25
■ 412.5 Methods for Limiting Water Temperature Discharged to Bathtubs 26
■ 412.10 Methods for Temperature Limitation at Head Shampoo Sinks and Footbaths 27
■ 419.5 Tempered Water for Public Hand-Washing Lavatories 28
## CONTENTS

- **421.3.1**  
  Standard for Shower Waste Fittings  
  29
- **501.2**  
  ASSE 1017 Temperature Actuated Mixing Valves  
  30
- **602.3.5**  
  Potable Water Pumps to Comply with NSF 61  
  31
- **605.12.3, 605.13.6**  
  Solder and Flux to Conform to NSF 61  
  32
- **606.1**  
  Individual Tenant Water Shut-off Valve  
  33
- **607.1.1, 607.1.2**  
  Water Heaters Providing Tempered Water to Fixtures  
  34
- **608.15.2.1**  
  Discharge from Backflow Preventer Relief Opening  
  35
- **608.17.2**  
  Backflow Device for Low Hazard Boiler Applications  
  36
- **609.2**  
  Two Water Service Pipes for Group I-2, Condition 2 Healthcare Facilities  
  37
- **609.2.1**  
  Tracer Wire for Buried Nonmetallic Water Service Piping  
  38
- **Table 702.3**  
  ABS Building Sewer Pipe Standard  
  39
- **705.2.4, 705.10.4**  
  PVC and ABS Push-fit DWV Fittings  
  40
- **708.1.6**  
  Removable Fixture Traps Serving as Cleanouts  
  41
- **717, 718**  
  Methods for Restoring Building Sewer Piping  
  42
- **903.1.3**  
  Protected Outdoor Vent Termination Method  
  45
- **915.1**  
  Food Waste Disposers on Combination Waste and Vent Systems  
  46
- **1002.1**  
  Direct Connection to Hydromechanical Grease Interceptor  
  47
- **1002.4.1.5**  
  Fixture Drains Serving as a Trap Priming Method  
  49
- **1102.6**  
  Roof Drains to be Tested and Rated for Flow  
  50
- **1106.2.1**  
  Rainfall Rate Conversion Method  
  51
- **1202.1**  
  Nonflammable Medical Gas Systems  
  52
- **1301.1**  
  Nonpotable Rainwater Standard Alternative  
  53

### SIGNIFICANT CHANGES TO THE International Mechanical Code

#### PART 2

**International Mechanical Code**  
**Chapters 1 through 15**  
**56**

- **307.2.1.1**  
  Condensate Discharge  
  58
- **401.2, 403.1**  
  Mechanical Ventilation for Dwelling Units  
  60
- **401.4, 501.3.1**  
  Intake Opening and Exhaust Outlet Locations  
  62
- **Table 403.3.1.1**  
  Recirculation of Mechanical Exhaust Prohibited  
  64
- **403.3.1.3**  
  Demand Controlled Ventilation  
  66
- **403.3.2.1**  
  Outdoor Air for Dwelling Units  
  67
- **502.20**  
  Manicure and Pedicure Station Exhaust System  
  69
- **504.4.1**  
  Termination Location for Dryer Exhaust  
  71
- **506.3.7**  
  Factory-Built Grease Duct Slope  
  72
- **507.1**  
  Smoker Ovens with Integral Exhaust  
  74
- **514.2**  
  Energy Recovery Ventilation Systems  
  77
- **602.2.1.8**  
  Pipe and Duct Insulation Within Plenums  
  79
- **607.5.2**  
  Duct Penetrations of Fire Barriers  
  81
SIGNIFICANT CHANGES TO THE
International Fuel Gas Code

PART 3
International Fuel Gas Code
Chapters 1 through 8

- 202
  Definition of Point of Delivery 104

- 307.2
  Concealed Condensate Piping 106

- 402.7, 202
  Press-Connect Joint 108

- 403.8.3
  Threaded Joint Sealing 109

- 404.5
  Fittings in Concealed Locations 110

- 503.5.6.1
  Chimney Lining 111

- 503.8
  Venting System Terminal Clearances 113

- 503.10.7
  Vent Connector Junctions 117

- 614.7
  Clothes Dryer Makeup Air 119

- 618.6
  Return Air from Mechanical Room 120

- 623.2
  Commercial Cooking Appliances 12
The purpose of Significant Changes to the International Plumbing Code®, International Mechanical Code®, International Fuel Gas Code® 2021 Edition is to familiarize plumbing and mechanical officials, building officials, fire officials, plans examiners, inspectors, design professionals, contractors and others in the building construction industry with many of the important changes to these codes. This publication is designed to assist code users in identifying the specific code changes that have occurred and, more importantly, in understanding the reasons behind the changes. It is also a valuable resource for jurisdictions in their code-adoption process.

Only portions of the total number of code changes to the International Plumbing Code, International Mechanical Code and International Fuel Gas Code are discussed in this book. The changes selected were identified for a number of reasons, including their frequency of application, special significance or change in application. However, the importance of the changes not included is not to be diminished. Further information on all code changes can be found in the Complete Revision History to the 2021 I-Codes: Successful and Public Comments, available in 2021 from the International Code Council® (ICC®) online store, http://shop.iccsafe.org. This resource collection provides the published documentation for each successful code change contained in the 2021 International Plumbing Code and International Mechanical Code.

Throughout this Significant Changes book, each change is accompanied by a photograph or an illustration to assist in and enhance the reader’s understanding of the specific change. A summary and a discussion of the significance of the change are also provided. Each code change is identified by type, be it an addition, modification, clarification or deletion.

The code change itself is presented in a legislative format similar to the style utilized for code-change proposals. Deleted code language is shown with a strikethrough, and new code text is indicated by underlining. As a result, the actual 2021 code language is provided as well as a comparison with the 2018 language, so the user can easily determine changes to the specific code text.
As with any code-change text, Significant Changes to the International Plumbing Code, International Mechanical Code, International Fuel Gas Code 2021 Edition is best used as a companion to the 2021 IPC, 2021 IMC and 2021 IFGC. Because only a limited discussion of each change is provided, the reader should reference the code itself to gain a more comprehensive understanding of the code change and its application.

The commentary and opinions set forth in this text are those of the authors and do not necessarily represent the official position of ICC. In addition, they may not represent the views of any enforcing agency, as such agencies have the sole authority to render interpretations of the IPC, IMC and IFGC. In many cases, the explanatory material is derived from the reasoning expressed by code-change proponents.

Comments concerning this publication are encouraged and may be directed to ICC at significantchanges@icc.org.

About the International Plumbing Code, International Mechanical Code and International Fuel Gas Code

Code officials, design professionals, contractors and others involved in the building construction industry recognize the need for modern, up-to-date codes addressing the design and installation of plumbing, mechanical and fuel gas systems through both prescriptive and performance requirements. The 2021 editions of the International Plumbing Code (IPC®), International Mechanical Code (IMC®) and International Fuel Gas Code (IFGC®) are intended to meet these needs through model code regulations that safeguard the public health and safety in all communities, large and small. The IPC, IMC and IFGC are kept up to date through ICC’s open code-development process. The provisions of the 2018 editions, along with those code changes approved through 2019, make up the 2021 editions.

The IPC, IMC and IFGC are three codes in a family of International Codes® published by ICC. These comprehensive codes establish minimum regulations for plumbing, mechanical and fuel gas systems by means of prescriptive and performance-related provisions, and are founded on broad-based principles that make possible the use of new materials and new system designs. The IPC, IMC and IFGC are available for adoption and use by jurisdictions internationally. Their use within a governmental jurisdiction is intended to be accomplished through adoption by reference, in accordance with proceedings establishing the jurisdiction’s laws.
Acknowledgments

Fred Grable, author of the IPC section, thanks all of the people who have called him over the years with questions about the requirements in the many editions of the IPC. The conversations have led to his greater understanding of how the codes are applied in the built environment and have enabled him to better help others.

Gregg Gress, author of the IMC and IFGC portions of this book, thanks fellow ICC staff, the graphic artists and all those who donated photographs.

About the Authors

Fred Grable, P.E.
International Code Council
Senior Staff Engineer, Technical Services

Fred Grable, ICC Senior Staff Engineer and former master plumber, brings extensive experience as both a plumbing contractor and engineer. He has nearly two decades of experience as an engineer for an industrial pressure piping manufacturer and in wastewater treatment equipment field services. He also founded his own plumbing company and managed new construction, remodeling, and repair of residential and commercial plumbing and gas systems. Fred is a registered professional engineer in two states. He has worked for the ICC for over ten years in the Codes and Standards Department and is the Secretariat for the International Plumbing Code (IPC) and the plumbing portion of the International Residential Code® (IRC®), the International Private Sewage Disposal Code® (IPSDC®), the International Swimming Pool and Spa Code® (ISPSC®) and the residential provisions of the International Energy Conservation Code® (IECC®).

Gregg Gress
International Code Council
Senior Technical Staff, Technical Services

Gregg Gress is a former Senior Technical Staff member of the ICC and was responsible for the maintenance of the International Mechanical Code (IMC) and International Fuel Gas Code (IFGC), the commercial portion of the International Energy Conservation Code (IECC) and the mechanical and electrical parts of the International Residential Code (IRC). He is also an author of the IMC, IRC and IFGC Commentary books and has provided training and code interpretations of the ICC codes. Gregg was formerly a code official for a municipality and has worked in the plumbing, mechanical/HVAC and electrical trades and has been employed by BOCA and the ICC for 25 years. Gregg has served on multiple AGA, NFPA and ASHRAE project committees.
About the International Code Council®

The International Code Council is a nonprofit association that provides a wide range of building safety solutions including product evaluation, accreditation, certification, codification and training. It develops model codes and standards used worldwide to construct safe, sustainable, affordable and resilient structures. ICC Evaluation Service (ICC-ES) is the industry leader in performing technical evaluations for code compliance, fostering safe and sustainable design and construction.
