# TABLE OF CONTENTS

PREFACE.....	.xv
AUTHORS.....	xvi
ACKNOWLEDGEMENTS.....	xviii
SYMBOLS AND NOTATIONS.....	xxiii
INTRODUCTION.....	xxxiii
<b>CHAPTER 1 MATERIALS.....</b>	<b>1</b>
1.1 General.....	1
1.2 Masonry Units.....	1
1.2.1 Clay Masonry.....	2
1.2.2 Concrete Masonry.....	6
1.3 Mortar.....	9
1.3.1 General.....	9
1.3.2 Mortar Materials.....	9
1.3.3 Types of Mortar.....	12
1.3.4 Mixing.....	14
1.3.5 Types of Mortar Joints.....	17
1.4 Grout.....	17
1.4.1 General.....	17
1.4.2 Types of Grout.....	19
1.4.3 Proportions.....	20
1.4.4 Mixing.....	21
1.4.5 Slump of Grout.....	21
1.4.6 Grout Strength Requirements.....	22
1.4.7 Testing Grout Strength.....	22
1.4.8 Methods of Grouting Masonry Walls.....	23
1.4.9 Grout Demonstration Panels.....	27
1.5 Reinforcing Steel.....	27
1.5.1 General.....	27
1.5.2 Types of Reinforcement.....	27
1.6 Questions and Problems.....	29
<b>CHAPTER 2 MASONRY ASSEMBLAGE STRENGTHS AND PROPERTIES.....</b>	<b>31</b>
2.1 General.....	31
2.2 Compression Strength of Masonry Assemblies.....	31
2.2.1 Verification by Prism Tests.....	32
2.2.2 Verification by Unit Strength Method.....	37
2.2.3 Verification by Testing Prisms from Constructed Masonry.....	38
2.2.4 Selection of $f'_m$ for Use in Design.....	39
2.2.5 Selection of Materials to Achieve $f'_m$ in Construction.....	39
2.3 Flexural Strength of Masonry Assemblies.....	40
2.4 Modulus of Elasticity, $E_m$ .....	40
2.4.1 General.....	40
2.4.2 Proposed Evaluation of Modulus of Elasticity.....	41

2.5	Walls of Composite Masonry Materials.....	41
2.6	Fire-Resistant Properties of Masonry Assemblies.....	42
2.7	Sound Transmission Properties of Masonry Assemblies.....	42
2.8	Inspection of Masonry During Construction.....	44
2.8.1	History of Inspection Requirements.....	44
2.8.2	Inspection Requirements.....	44
2.9	CodeMasters.....	50
2.10	Questions and Problems.....	50

**CHAPTER 3 LOADS.....** 51

3.1	General.....	51
3.2	Load Combinations.....	51
3.2.1	Allowable Stress Design Load Combinations.....	52
3.2.2	Strength Design Load Combinations.....	53
3.2.3	Load Combinations with Seismic Overstrength Factor.....	54
3.3	Dead Loads.....	54
3.4	Live Loads.....	55
3.4.1	Uniform Floor Loads.....	58
3.4.2	Uniform Roof Loads.....	59
3.4.3	Concentrated Loads.....	60
3.4.4	Other Live Loads.....	60
3.5	Snow Loads.....	60
3.6	Rain Loads.....	64
3.7	Flood Loads.....	65
3.8	Wind Loads.....	65
3.8.1	Wind Loads on Main Wind Force Resisting Systems.....	66
3.8.2	Wind Loads for Components and Cladding.....	71
3.8.3	Wind and Seismic Detailing.....	74
3.8.4	Examples of Calculation of Wind Pressures.....	74
3.9	Seismic Loads.....	78
3.9.1	General.....	78
3.9.2	Base Shear, V.....	81
3.9.3	Vertical Distribution of Total Seismic Forces.....	89
3.9.4	Seismic Loads on Structural Elements.....	90
3.10	Questions and Problems.....	91

**CHAPTER 4 DISTRIBUTION AND ANALYSIS FOR LATERAL FORCES.....** 93

4.1	General.....	93
4.2	Wall Rigidities.....	94
4.2.1	Cantilever Pier or Wall.....	94
4.2.2	Fixed Pier or Wall.....	95
4.2.3	Combinations of Walls.....	96
4.2.4	Multi-Story Walls.....	96
4.2.5	Walls with Joints and Openings.....	99
4.2.6	Flanged Walls.....	103
4.3	Overturning.....	105
4.3.1	Overturning of Foundations.....	105
4.3.2	Overturning on Walls.....	105
4.4	Horizontal Diaphragms.....	107
4.4.1	Types of Diaphragms.....	110
4.4.2	Forces on Diaphragms.....	114
4.4.3	Deflection of Diaphragms and Walls.....	123
4.5	Building Irregularities.....	124
4.6	Drift and Deformation.....	126
4.7	Questions and Problems.....	127

**CHAPTER 5 DESIGN OF STRUCTURAL MEMBERS BY ALLOWABLE STRESS DESIGN (ASD)..129**

5.1	History.....	129
5.2	Flexure.....	129
5.2.1	General, Flexural Stress.....	129
5.2.2	Strain Compatibility.....	130
5.2.3	Derivation of Flexural Formulas.....	131
5.2.4	Summary and Examples.....	137
5.2.5	Compression Reinforcement.....	139
5.3	Shear.....	142
5.3.1	Allowable Shear – Masonry.....	145
5.3.2	Allowable Shear – Reinforcement.....	145
5.4	Compression.....	146
5.4.1	General.....	146
5.5	Combined Flexure and Compression.....	147
5.5.1	General.....	147
5.5.2	Methods of Design for Interaction of Axial Load and Moment.....	151
5.6	Development.....	170
5.6.1	Reinforcing Steel.....	170
5.6.2	Anchor Bolts.....	175
5.7	Bearing.....	180
5.8	Beams.....	181
5.8.1	Flexure.....	181
5.8.2	Shear.....	182
5.8.3	Deflection.....	185
5.8.4	Deep Beams.....	187
5.9	Columns.....	189
5.9.1	General.....	189
5.9.2	Compression.....	190
5.9.3	Flexure and Compression.....	190
5.9.4	Special Topics.....	192
5.10	Walls.....	193
5.10.1	Compression.....	193
5.10.2	Out-of-Plane Loads.....	195
5.10.3	In-Plane Loads.....	205
5.11	Questions and Problems.....	216

**CHAPTER 6 DESIGN OF STRUCTURAL MEMBERS BY STRENGTH DESIGN (SD).....219**

6.1	Introduction.....	219
6.1.1	History.....	219
6.1.2	Concepts.....	219
6.1.3	Design Assumptions.....	220
6.1.4	Strength Reduction Factor, $\phi$ .....	221
6.2	Flexure.....	221
6.2.1	Flexural Behavior.....	222
6.2.2	Derivation of Flexural Formulas.....	224
6.2.3	Compression Reinforcement.....	226
6.2.4	Reinforcement Limits.....	230
6.3	Shear.....	233
6.3.1	Shear Capacity – Masonry.....	233
6.3.2	Shear Capacity – Reinforcement.....	233
6.3.3	Shear Capacity – Limits.....	233
6.3.4	Shear Reinforcement – Limits.....	234
6.4	Compression.....	234
6.5	Combined Flexure and Compression.....	234
6.5.1	Simplified Approach.....	234
6.5.2	Sections with Tension Only Reinforcement.....	238

6.5.3	Sections with Confined Compression Reinforcement.....	239
6.5.4	Interaction Diagrams.....	240
6.6	Development.....	242
6.6.1	Reinforcing Steel.....	242
6.6.2	Anchor Bolts.....	245
6.7	Bearing.....	246
6.8	Beams.....	246
6.8.1	Flexure.....	246
6.8.2	Shear.....	248
6.8.3	Deflection.....	250
6.8.4	Deep Beams.....	251
6.9	Columns.....	253
6.9.1	General.....	253
6.9.2	Compression.....	254
6.9.3	Flexure and Compression.....	254
6.9.4	Special Topics.....	255
6.10	Walls.....	255
6.10.1	Compression.....	255
6.10.2	Out-of-Plane Loads.....	255
6.10.3	In-Plane Loads.....	268
6.11	Piers.....	290
6.12	Special Topics.....	290
6.12.1	Wall Frames.....	290
6.12.2	The Core Method of Design.....	294
6.12.3	Limit State.....	300
6.13	Questions and Problems.....	303

**CHAPTER 7 DETAILS OF REINFORCEMENT AND CONSTRUCTION.....305**

7.1	Introduction.....	305
7.2	General Requirements.....	305
7.2.1	Maximum Bar Size.....	305
7.2.2	Hooks and Laps.....	306
7.2.3	Placement of Steel.....	308
7.2.4	Clearances.....	310
7.2.5	Cover Over Reinforcement.....	311
7.2.6	Site Tolerances.....	312
7.3	Beams.....	314
7.3.1	Flexural Reinforcement.....	314
7.3.2	Shear Reinforcement Requirements in Beams.....	317
7.3.3	Deep Beams.....	319
7.4	Columns.....	319
7.4.1	General.....	319
7.4.2	Projecting Wall Columns or Pilasters.....	321
7.4.3	Flush Wall Columns.....	322
7.4.4	Column Tie Requirements.....	322
7.4.5	Lateral Tie Spacing for Columns.....	323
7.5	Walls.....	324
7.5.1	Shear Walls.....	325
7.5.2	Non-Participating Walls.....	331
7.5.3	Out-of-Plane Walls.....	333
7.6	Questions and Problems.....	335

**CHAPTER 8 BUILDING DETAILS.....337**

8.1	General Connections.....	337
8.2	Wall to Wall Connections.....	337
8.3	Lintel and Bond Beam Connection.....	339
8.4	Wall to Wood Diaphragm Connections.....	339

8.5	Wall to Concrete Diaphragm Connections.....	341
8.6	Wall to Steel Diaphragm Connections.....	342
8.7	Wall Foundation Details.....	343
<b>CHAPTER 9 SPECIAL TOPICS.....</b>		<b>345</b>
9.1	Movement Joints.....	345
9.1.1	General.....	345
9.1.2	Movement Joints for Clay Masonry Structures.....	345
9.1.3	Movement Joints in Concrete Masonry Structures.....	348
9.1.4	Caulking Details.....	352
9.2	Waterproofing Masonry Structures.....	352
9.2.1	General.....	352
9.2.2	Design Considerations.....	352
9.2.3	Material Selection.....	354
9.2.4	Construction Procedures and Application Methods.....	354
9.2.5	Waterproofing.....	355
9.2.6	Maintenance of Waterproofing Systems.....	357
9.3	Fire Resistance.....	357
9.3.1	General.....	357
9.4	International System of Units (SI, System).....	360
9.4.1	General.....	360
9.4.2	Measurement Conversion Factors.....	360
9.5	Questions and Problems.....	362
<b>CHAPTER 10 FORMULAS FOR REINFORCED MASONRY DESIGN.....</b>		<b>363</b>
10.1	General.....	363
10.2	Allowable Stress Design (ASD) Formulas.....	363
	Table 10.1 Allowable Stress Design (ASD) Equations.....	363
	Table 10.2 Design Formulas — Allowable Stress Design.....	368
10.3	Strength Design (SD) Formulas.....	372
	Table 10.3 Strength Design (SD) Equations.....	372
	Table 10.4 Design Formulas — Strength Design.....	377
<b>CHAPTER 11 DESIGN OF ONE-STORY INDUSTRIAL BUILDING.....</b>		<b>381</b>
11.1	Design Criteria: Allowable Stress Design.....	381
11.1.1	Materials and Allowable Stresses.....	381
11.1.2	Loads.....	384
11.2	Design of West Masonry Bearing Wall – Section 1-1 (Allowable Stress Design).....	386
11.2.1	Vertical Loads on Wall.....	386
11.2.2	Lateral Forces on Wall.....	386
11.2.3	Vertical Load on Wall at Mid-Height.....	387
11.2.4	Design Wall for Condition at Mid-Height – Section 1-1.....	387
11.3	Design of South Masonry Wall – Section 2-2 (Strength Design).....	388
11.3.1	Slender Wall.....	388
11.4	Design of Lintel Beam South Wall – Elevation 3-3 (Allowable Stress Design).....	390
11.4.1	Flexural Design.....	390
11.4.2	Lateral Wind Load on Beam.....	390
11.4.3	Deep Lintel Beams.....	391
11.5	Design of Flush Wall Pilaster North Wall – Section 4-4. Designed as a Wall not a Column (Allowable Stress Design).....	391
11.5.1	Loads.....	391
11.5.2	Bearing Plate Design.....	392
11.5.3	Wall Pier Design.....	393
11.6	Design of Elevation 5-5 for Vertical and Lateral Loads (Strength Design).....	393
11.7	Wind and Seismic Forces on Total Building.....	395
11.7.1	Loads (Allowable Stress Design).....	395

11.7.2 Ledger Bolt and Ledger Beam Design.....	397
11.8 Distribution of Shear Force in End Walls.....	398
11.8.1 Design of Shear Reinforcement in Piers 3 and 4 (Strength Design).....	399
11.9 Questions and Problems.....	400

**CHAPTER 12 DESIGN OF SEVEN-STORY MASONRY LOAD BEARING WALL APARTMENT BUILDING.....401**

12.1 General.....	401
12.1.1 Design Criteria, Elevation and Plan.....	402
12.1.2 Floor and Roof Systems.....	402
12.1.3 Structural Wall System.....	404
12.1.4 Dead and Live Loads on the Masonry Walls.....	404
12.1.5 Seismic Loading.....	408
12.1.6 Wind Design.....	411
12.2 Design of Wall "j" on First Story, Base Level – Allowable Stress Design.....	411
12.2.1 Load Combinations.....	412
12.2.2 Shear.....	412
12.2.3 Compression Limit: Equation 16-14.....	413
12.2.4 Tension Limit: Equation 16-16.....	413
12.2.5 Limits on Reinforcement.....	414
12.3 Design of Wall "j" on First Story, Base Level – Strength Design.....	414
12.3.1 Load Combinations.....	414
12.3.2 Compression.....	414
12.3.3 Combined Compression and Flexure.....	415
12.3.4 Shear.....	415
12.3.5 Limits on Reinforcement.....	417
12.4 Design of Wall "f" on First Story, Base Level.....	417
12.4.1 General.....	417
12.4.2 Allowable Stress Design.....	419
12.4.3 Limits on Reinforcement.....	422
12.5 Strength Design.....	422
12.5.1 Load Combinations.....	422
12.5.2 Combined Compression and Flexure – Flange in Tension.....	423
12.5.3 Combined Compression and Flexure – Flange in Compression.....	423
12.5.4 Shear.....	424
12.5.5 Limits on Reinforcement.....	424
12.6 History of Wall j.....	425
12.7 Additional Considerations in the Design of Multi-Story Shear Wall Structures.....	425
12.8 Questions and Problems.....	427

**CHAPTER 13 RETAINING WALLS.....429**

13.1 General.....	429
13.2 Types of Retaining Walls.....	429
13.2.1 Gravity Walls.....	429
13.2.2 Counterfort or Buttress Walls.....	429
13.2.3 Cantilever Retaining Walls.....	431
13.2.4 Supported Walls.....	431
13.3 Design of Retaining Walls.....	432
13.3.1 Effect of Corners on Lateral Supporting Capacity of Retaining Walls.....	432
13.3.2 Preliminary Proportioning of Retaining Walls.....	433
13.3.3 Retaining Wall Stability.....	434
13.4 Cantilever Retaining Wall Design Example.....	434
13.4.1 Design Criteria.....	434
13.4.2 Stem Design.....	435
13.4.3 Footing Design.....	440
13.5 Questions and Problems.....	447

**CHAPTER 14 TABLES AND DIAGRAMS.....449****ALLOWABLE STRESS DESIGN TABLES AND DIAGRAMS**

Table ASD-1a	Compressive Strength of Clay Masonry/Unit Strength Method.....	450
Table ASD-1b	Compressive Strength of Concrete Masonry/Unit Strength Method.....	450
Table ASD-2a	Clay Masonry $f'_m$ , $E_m$ , $n$ and $E_v$ Values Based on the Clay Masonry Unit Strength and the Mortar Type.....	451
Table ASD-2b	Concrete Masonry $f'_m$ , $E_m$ , $n$ and $E_v$ Values Based on the Concrete Masonry Unit Strength and the Mortar Type.....	452
Table ASD-3	Maximum Allowable Working Stresses (psi), for Reinforced Solid and Hollow Unit Masonry.....	453
Table ASD-4	Allowable Steel Working Stresses, psi.....	455
Table ASD-5a	Allowable Shear Stress Provided by Masonry, $F_{vm}$ (psi).....	456
Diagram ASD-5a	Allowable Shear Stress Provided by Masonry, $F_{vm}$ (psi).....	456
Table ASD-5b	Allowable Shear Stress Provided by Masonry, $F_{vm}$ (psi)/Special Reinforced Shear Walls.....	457
Diagram ASD-5b	Allowable Shear Stress Provided by Masonry, $F_{vm}$ (psi)/Special Reinforced Shear Walls.....	457
Table ASD-6	Maximum Allowable Shear Stress in Masonry and Reinforcement, $F_{v,max}$ (psi).....	458
Diagram ASD-6	Maximum Allowable Shear Stress in Masonry and Reinforcing Steel, $F_{v,max}$ (psi).....	458
Table ASD-7a	Allowable Tension $B_{ab}$ (lbs) for Headed and Bent-Bar Anchor Bolts in Clay and Concrete Masonry Based on the Masonry Breakout Strength.....	459
Table ASD-7b	Allowable Tension $B_{ap}$ (lbs) for Bent-Bar Anchor Bolts in Clay and Concrete Masonry Based on the Masonry Pull-Out Strength.....	459
Table ASD-7c	Reduction in Masonry Allowable Tension Breakout, Shear Breakout and Shear Pry-Out Force Due to Anchor Spacing and Edge Distance.....	460
Table ASD-7d	Allowable Tension $B_{as}$ (lbs) for Embedded Headed Anchor Bolts in Clay and Concrete Masonry Based on A307 Anchor Bolts.....	461
Table ASD-8a	Allowable Shear $B_{vb}$ (lbs) for Headed and Bent-Bar Anchor Bolts in Clay and Concrete Masonry Based on the Masonry Breakout Strength.....	462
Table ASD-8b	Allowable Shear $B_{vpny}$ (lbs) for Headed and Bent-Bar Anchor Bolts in Clay and Concrete Masonry Based on the Masonry Pryout Strength.....	462
Table ASD-8c	Allowable Shear $B_{vc}$ (lbs) for Embedded Anchor Bolts in Clay and Concrete Masonry Based on the Masonry Crushing Strength and Strength of ASTM A307 Anchor Bolt Material.....	463
Table ASD-9a	Allowable Axial Wall Compressive Stresses $F_a = 0.25 f'_m R$ (psi) and $R = [1 - (h/140r)^2]$ .....	464
Table ASD-9b	Allowable Axial Wall Compressive Stresses $F_a = 0.25 f'_m R$ (psi) and $R = [1 - (h/140r)^2]$ .....	465
Table ASD-9c	Allowable Axial Wall Compressive Stresses $F_a = 0.25 f'_m R$ (psi) and $R = (70r/h)^2$ .....	466
Table ASD-10	Allowable Flexural Tension of Clay and Concrete Masonry (psi).....	467
Table ASD-22	Standard Reinforcement Bends and Hooks.....	467
Table ASD-24a	Flexural Design Coefficients for Allowable Stresses (Clay Masonry) for $f'_m = 1500$ psi, $f_y = 60,000$ psi and $n = 27.6$ .....	468
Diagram ASD-24a	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Clay Masonry, $f'_m = 1500$ psi, $n = 27.6$ .....	469
Table ASD-24b	Flexural Design Coefficients for Allowable Stresses (Concrete Masonry) for $f'_m = 1500$ psi, $f_y = 60,000$ psi and $n = 21.5$ .....	470
Diagram ASD-24b	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Concrete Masonry, $f'_m = 1500$ psi, $n = 21.5$ .....	471
Table ASD-25a	Flexural Design Coefficients for Allowable Stresses (Clay Masonry) for $f'_m = 2000$ psi, $f_y = 60,000$ psi and $n = 20.7$ .....	472

Diagram ASD-25a	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Clay Masonry, $f'_m = 2000$ psi, $n = 20.7$ .....	473
Table ASD-25b	Flexural Design Coefficients for Allowable Stresses (Concrete Masonry) for $f'_m = 2000$ psi, $f_y = 60,000$ psi and $n = 16.1$ .....	474
Diagram ASD-25b	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Concrete Masonry, $f'_m = 2000$ psi, $n = 16.1$ .....	475
Table ASD-26a	Flexural Design Coefficients for Allowable Stresses (Clay Masonry) for $f'_m = 2500$ psi, $f_y = 60,000$ psi and $n = 16.6$ .....	476
Diagram ASD-26a	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Clay Masonry, $f'_m = 2500$ psi, $n = 16.6$ .....	477
Table ASD-26b	Flexural Design Coefficients for Allowable Stresses (Concrete Masonry) for $f'_m = 2500$ psi, $f_y = 60,000$ psi and $n = 12.9$ .....	478
Diagram ASD-26b	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Concrete Masonry, $f'_m = 2500$ psi, $n = 12.9$ .....	479
Table ASD-27a	Flexural Design Coefficients for Allowable Stresses (Clay Masonry) for $f'_m = 3000$ psi, $f_y = 60,000$ psi and $n = 13.8$ .....	480
Diagram ASD-27a	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Clay Masonry, $f'_m = 3000$ psi, $n = 13.8$ .....	481
Table ASD-27b	Flexural Design Coefficients for Allowable Stresses (Concrete Masonry) for $f'_m = 3000$ psi, $f_y = 60,000$ psi and $n = 10.7$ .....	482
Diagram ASD-27b	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Concrete Masonry, $f'_m = 3000$ psi, $n = 10.7$ .....	483
Table ASD-28a	Flexural Design Coefficients for Allowable Stresses (Clay Masonry) for $f'_m = 3500$ psi, $f_y = 60,000$ psi and $n = 11.8$ .....	484
Diagram ASD-28a	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Clay Masonry, $f'_m = 3500$ psi, $n = 11.8$ .....	485
Table ASD-28b	Flexural Design Coefficients for Allowable Stresses (Concrete Masonry) for $f'_m = 3500$ psi, $f_y = 60,000$ psi and $n = 9.2$ .....	486
Diagram ASD-28b	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Concrete Masonry, $f'_m = 3500$ psi, $n = 9.2$ .....	487
Table ASD-29a	Flexural Design Coefficients for Allowable Stresses (Clay Masonry) for $f'_m = 4000$ psi, $f_y = 60,000$ psi and $n = 10.4$ .....	488
Diagram ASD-29a	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Clay Masonry, $f'_m = 4000$ psi, $n = 10.4$ .....	489
Table ASD-29b	Flexural Design Coefficients for Allowable Stresses (Concrete Masonry) for $f'_m = 4000$ psi, $f_y = 60,000$ psi and $n = 8.1$ .....	490
Diagram ASD-29b	$K_f$ Versus $\rho$ for Various Masonry and Steel Stresses, Concrete Masonry, $f'_m = 4000$ psi, $n = 8.1$ .....	491
Diagram ASD-34	$K_f$ Versus $n\rho$ for Various Masonry and Stresses $f_b$ .....	492
Table ASD-34a	Flexural Coefficients Based on $n\rho$ Values.....	493
Table ASD-34b	Flexural Coefficients Based on $n\rho$ Values.....	494
Table ASD-36	Moment Capacity of Walls and Beams for Balanced Design Conditions for $f'_m = 1500$ psi and $f_y = 60,000$ psi.....	495
Table ASD-37	Moment Capacity of Walls and Beams for Balanced Design Conditions for $f'_m = 2000$ psi and $f_y = 60,000$ psi.....	496
Table ASD-38	Moment Capacity of Walls and Beams for Balanced Design Conditions for $f'_m = 2500$ psi and $f_y = 60,000$ psi.....	497
Table ASD-39	Moment Capacity of Walls and Beams for Balanced Design Conditions for $f'_m = 3000$ psi and $f_y = 60,000$ psi.....	498

<b>CHAPTER 16 INDEX.....</b>	<b>635</b>	

# PREFACE

In 1970, James Amrhein recognized that a comprehensive engineering design handbook was needed which would encompass the coefficients, tables, charts and design data required for the design of reinforced masonry structures. Mr. Amrhein tried to fulfill these requirements with the first edition of this publication. Since then, subsequent editions have been improved and expanded to comply with applicable editions of the Uniform Building Code and International Building Code keeping pace with the growth of reinforced masonry engineering.

The authors would like this book to be as useful as possible to designers of reinforced masonry by eliminating repetitious and routine calculations. This publication will increase the understanding and reduce the time required for masonry design.

The detail and design requirements included in this book are based upon the 2012 edition of the International Building Code published by the International Code Council, and ASCE/SEI 7-10, Minimum Design Loads for Buildings and Other Structures published by the American Society of Civil Engineers. Also included in this edition is information and design tables based on the code reference document, TMS 402/ACI 530/ASCE 5 Building Code Requirements for Masonry Structures.

In addition to the code requirements, this publication includes sound engineering practices to serve as a guide to the engineer and designer.

There may be several design and analysis methods and the results for the design can be somewhat different. Techniques included in this publication have been reviewed by competent engineers who have found the results to be satisfactory and safe. The authors welcome recommendations for the extension and improvement of the material and any new design techniques for future editions.
